

MADHYASTH DARSHAN · AKHAND SAMAJ

How Undivided Society Is Established

A consolidated architectural account — one connected chain from coexistence, through awakening, to social evidence — drawn from the primary works of Shri A. Nagraj.

THE STARTING POINT

The human problem — and the path out

Humans live in fear, conflict, and defensive groupings because they mistake the body for the self. Under that delusion, evaluation organises around pleasure, profit, and accumulation — producing sectarian identity, exploitation, and recurring confrontation even when most people want neither war nor disorder.

The path runs in one direction:

“

Realising coexistence closes the knowledge-order gate. When awakened humans evidence completeness in activity and conduct, undivided society and universal orderliness become livable tradition rather than aspiration alone.

— Synthesis of JVD pp. 16–18; MVD Ch. 4

Not utopia — an achieved telos

Akhand samaj is not an automatic scale-up of physical regulation, nor a harmony engineered onto a competitive substrate. It is achieved at the knowledge order — paired with universal orderliness — when awakened humans close the justice cycle.

Nature is inherently complementary

Division is the aberration of a blocked design — not the baseline.
Complementarity is already present at every order.

Establishment = un-blocking

Building undivided society means un-blocking a complementarity that already exists, not forcing order onto chaos.

Reachable, not utopian

Because the design is complementary at root, the telos is achievable — the same design runs from atoms to humankind.

Five layers and a telos

0

Layer 0 • Coexistence ground

satta + units · saturation · complementarity · regulation ladder

1

Layer 1 • Composition through orders

four orders · niyati-vidhi conformance · six kinds of value

2

Layer 2 • Sentience threshold

vikas-kram · T1 constitutional completeness · jeevan—body joint form

3

Layer 3 • Knowledge-order gate

six perspectives · justice cycle · awakening · T2 / T3 — the narrow gate

4

Layer 4 • Social establishment

production chain · four goals · assembly composition · orderliness

TELOS • Undivided society + universal orderliness

Reading the stack

- Each layer depends on the one below and enables the one above.
- Matter and regulation flow easily through Layers 0–2.
- Layer 3 is a narrow gate: every human unit must pass through awakening.
- A unit that fails loops back to delusion; the telos can't close while that loop dominates.

0

LAYER 0 · COEXISTENCE GROUND

What coexistence already provides

Coexistence & saturation

Existence is ever-present coexistence: formless satta and countless bounded units, co-eternal. Each unit is surrounded, submerged, and soaked in satta — carrying inherent energy and regulatory order within it.

Satta is actionless

Satta performs no action (kriya-shunya). It is the sustaining ground — “supreme cause” — through which unit-activity is energised and regulated, never the trigger of particular change. The work of change is done by units.

Mediative regulation

Madhyasth means mediative: satta regulates and conserves every unit without itself acting. The same pattern recurs at the atomic nucleus and, in sentient jeevan, at atma.

“

Nature, saturated in Omnipotence, exists as countless units. Each unit, being saturated in Omnipotence, remains surrounded, submerged, and soaked in it.

— SB, p. 48

“

Every entity of nature recognises another; that is why it fulfils. An atomic particle too recognises another... these particles abide in orderliness.

— JV, p. 69

0

LAYER 0 · COEXISTENCE GROUND

Complementarity and the regulation ladder

Complementarity is the essence of coexistence

Value reciprocated and mutually recognised in mutuality — the whole structure by which units fulfil one another's essentiality. Nothing is isolated, so the same design runs unbroken from atomic particles, through molecules and bodies, to human assemblies. This is the fact on which the entire establishment rests.

Natural state

Unit moves toward development, reciprocating in complementarity.

Excited state

Complementarity falls short; the unit moves toward decline.

The regulation ladder (reads upward)

6

Assembly order — human compositions persist while relationships fulfilled

5

Justice — evaluative closure of the relational cycle

4

Inward regulation — mediative atma disciplining the faculties

3

Order conformance — definiteness of conduct at each order

2

Law — mutual-recognition provision, structurally real

1

Saturation — inherent energy and order in each unit

1

LAYER 1 · COMPOSITION THROUGH ORDERS

Four orders and the way of existence

Saturated units compose through four orders, each conforming to its own definite way. Higher orders include the lower dharmas cumulatively. Insentient matter and bio belong to the lower orders; “hope to live” enters at the animal order.

Order	Conformance mode	Definite or achieved
Material (padarth)	Result- / structural-conformance	Definite
Bio / pranic (pran)	Seed-conformance (genetic code, lineage)	Definite
Animal (jeev)	Species-conformance	Definite
Knowledge / human (gyan)	Sanskar-conformance	ACHIEVED — knowing → believing → recognising → fulfilling

Why human society is different

Humans conform to sanskar — understanding and conditioning — not to genetic code or lineage. So the method of composing human society cannot be transmitted biologically. A stable assembly must perpetuate itself by transmitting realised understanding across generations. That makes education-sanskar the primary engine of undivided society.

1

LAYER 1 · COMPOSITION THROUGH ORDERS

Six kinds of value

What units reciprocate is value — essentiality in every order. At the knowledge order, essentiality sorts into six kinds. Justice is the operation on these values; it is not one of them.

1 Utility (upyogita)

Usefulness of natural abundance through labour.

2 Art (kala)

Aesthetic enhancement layered on usefulness.

3 Jeevan values

Happiness, peace, contentment, bliss — harmonies within the sentient unit.

4 Human values

Humane living grasped through coexistence understanding.

5 Established values

Trust, affection, gratitude, love, reverence — flowing when relationships are recognised.

6 Expression values

Right-use of body, mind and wealth; civic conduct in the social order.

2

LAYER 2 · SENTIENCE THRESHOLD

Crossing from matter to sentient jeevan (T1)

Within the atom, development (vikas-kram) proceeds through hungry atoms (deficient in particles) and overfull atoms (bearing excess). Incorporation and expulsion cycle until the required constitution closes.

At gathanpurnata the atom is satiated — qualitative change without quantitative change. Latent intelligibility in satta is actualised as active sentience: not strong emergence from dead matter. T1 is irreversible.

“

When the contraction and expansion activity increases in this atom, it instantly breaks free from its group and attains constitutional completeness, becoming a jeevan atom.

— MVD, p. 91

T1

Constitutional completeness

Molecular- and weight-bondage break; hope-bondage replaces them as the sentient mode's defining bondage. Sentient jeevan, and “hope to live”, begins.

2

LAYER 2 · SENTIENCE THRESHOLD

The jeevan-body joint form

An animal or human is the joint form of a constitutionally complete jeevan working through a body of that order. Identity recurs at two scales — not mere analogy.

Atomic scale

nucleus

The nucleus is mediative activity, regulating generative and degenerative orbiting particles.

=

Sentient scale

atma

In jeevan, inward regulation under mediative atma is the sentient-scale counterpart — disciplining the faculties.

3

LAYER 3 · KNOWLEDGE-ORDER GATE

The narrow gate: six perspectives

Only jeevan at the knowledge order evaluates — and with evaluation come both delusion and the possibility of awakening. All human behaviour manifests in six built-in perspectives, organised under two refuges.

Inhumane refuge

priya · hita · labh

- Pleasant—unpleasant
- Healthy—unhealthy
- Profit—loss

Organised around instinct, body and material gain — legitimate in its domain, but not sufficient as the standpoint of a knowledge-order being.

Humane refuge

nyaya · dharma · satya

- Justice—injustice → regulates conduct
- Dharma—adharma → thought toward resolution
- Truth—untruth → realisation in existence

Awakening reorganises evaluation here. Delusion — body mistaken for self — is complementarity blocked at the knowledge order, not nature turning competitive.

3

LAYER 3 · KNOWLEDGE-ORDER GATE

Justice: evaluative closure, not mere compliance

“

Recognising relationships, fulfilling values, evaluating, and achieving mutual satisfaction is justice.

— MVD, p. 311

Three registers must be kept apart:

Regulation / law

ALL FOUR ORDERS

Inherent orderliness with -ness — definite below the knowledge order.

Justice (nyaya)

KNOWLEDGE ORDER

The complete relational cycle, with evaluation.
Names closure of values in relationships.

Statutory / public law

HUMAN ASSEMBLIES

Codified order — may satisfy legality while still violating justice.

3

LAYER 3 · KNOWLEDGE-ORDER GATE

The awakening path

Knowledge-order fulfilment runs in a definite sequence — outwardly through study, and inwardly through a steady epistemic rhythm. Jeevan Vidya is the named catalyst.

Outward — three stages

Study → Experiment & practice → Realisation, evidenced in conduct

The third stage is accomplishment and success — humaneness apparent in work and behaviour, within family and world-family order.

Inward — shanka · swada · bodh

Doubting or verifying within oneself, believing or tasting what study offers, and understanding. Inward regulation — mediative atma disciplining buddhi, chitta, vritti, mun and the body — stabilises humane evaluation, moving a human through T2 toward T3. Janvad is the collective counterpart.

3

LAYER 3 · KNOWLEDGE-ORDER GATE

Three completeness transitions

Completeness (purnata) means structural saturation — not moral perfection. Each transition closes a definite bondage mode. T2 and T3 belong to awakening progression (jagriti-kram) within constitutionally complete jeevan.

T1

Constitutional completeness

gathanpurnata

Sentient jeevan; “hope to live.” Structural saturation of the atom.

T2

Activity completeness

kriyapurnata

Orderliness with -ness, evidenced in awakened human activity. The deific plane.

T3

Conduct completeness

vyavaharpurnata

Living proof (pramanikta) in work and behaviour — awakening completeness. The divine plane.

3

LAYER 3 · KNOWLEDGE-ORDER GATE

What awakened humans do: five traditions

“

While in the state of awakening, all humans are naturally found to be working towards establishing the harmonious tradition of non-accumulation, of affection, of knowledge, of simplicity, and of fearlessness.

— AVD, p. 14

Non-accumulation

by way of prosperity

Affection

by complementariness

Knowledge

by knowledge of jeevan

Simplicity

by holistic view of coexistence

Fearlessness

by humane conduct

The delusionlessness ladder

“

*Delusionlessness is awakening; awakening is enlightenment;
enlightenment is lordship; lordship is sovereignty;
sovereignty is undivided society and universal orderliness.*

— MVD, p. 27

Undivided society + universal orderliness

Sovereignty

Lordship

Enlightenment

Awakening

Delusionlessness

Layer 3 closes the gate (delusionlessness → enlightenment); Layer 4 evidences lordship and sovereignty in assemblies; the telos is undivided society with universal orderliness.

4

LAYER 4 · SOCIAL ESTABLISHMENT

Undivided society, defined

Undivided society (akhand samaj) is humankind living as one complementary whole — every person resolved, families prosperous and trusting, relationships fulfilled from household to world-family, with orderliness self-governed from understanding rather than imposed from above. It is the inherent complementarity of Layer 0, un-blocked across humankind.

Vyavastha names inherent orderliness — not a top-down apparatus. Akhand samaj is emergent orderliness in tradition. Unity and undividedness is the natural expression of awakening; division appears only under delusion.

“

In the awakened human tradition, undivided society is evidenced along with the universal orderliness.

— MVD, Ch. 4

“

Society is humane only when it is undivided. Societal functioning means participation in universal orderliness.

— JVD, p. 157

4

LAYER 4 · SOCIAL ESTABLISHMENT

The sociality–production chain

Establishment follows a definite chain — powered psychologically not by physical need alone, but by reoriented ichcha (desire) in jeevan: desire for happiness and resolution. The chain is a cycle that returns to sociality.

↻ *humaneness gives rise to sociality — meaningful when it is toward undivided sociality*

Material prerequisite

Prosperity requires more production than need. Awakening is evidenced only by right-use (sadupyog) conduct — otherwise decline is inevitable.

From accumulation to trust

Borders and divisions are driven by fear of scarcity and group accumulation (sangraha). Surplus dedicated to right-use turns accumulation into trust and mutual distribution (a-sangraha) — neutralising the economic motive for division.

Four human goals, jointly evidenced

The four goals are joint human telos, evidenced together when the justice cycle closes. They map to jeevan's harmonies across levels of existence.

Level of existence	Human goal	Manifested harmony (jeevan value)
Individual	Resolution (samadhan)	Happiness (sukh)
Family	Prosperity (samridhi)	Peace (shanti)
Society	Fearlessness / trust (abhaya)	Contentment (santosh)
Nature / existence	Coexistence (saha-astitva)	Bliss (anand)

“

The goal of jeevan is happiness, and the human goal is resolution, prosperity, fearlessness, and coexistence. Resolution = happiness; we realise happiness wherever we are resolved.

— JV, pp. 61, 165

Synthesis from JV's separate statements of goals and harmonies — not presented as a single table in the source.

4

LAYER 4 · SOCIAL ESTABLISHMENT

Composing upward — and the five dimensions

Assembly composition

Establishing akhand samaj is transmutation, not abolition: as humans within a sect awaken, the same assembly reorganises under humaneness — sect-based samaj becomes completeness-oriented sampradaya.

Five dimensions of universal orderliness

Family is the first tier — kutumb shiksha is the micro-engine. The same body is sabha (council) in deliberation and parivar (family) in implementation, scaling to a world-family council.

WHY IT HAS NOT CLOSED AT SCALE

Two engines

The texts contrast the deluded engine — which explains why undivided society has not closed at scale — with the awakening engine that establishes it when the gate opens.

Janvad — structured public dialogue — makes the contrast publicly accessible, posing whether humanity should live in undivided society or remain in fragmented structures.

The complete architecture

The exposition runs several ordered sequences — not rivals, but different views of one ascent. The delusionlessness ladder is the spine; each other reading sees the same climb from a different angle.

Spine (delusionlessness)	Layer	Regulation ladder	Progression	Completeness
Ground (pre-gate)	0	saturation, law	—	—
Composition (pre-gate)	1	order conformance	niyati-kram / -vidhi	—
Sentence reached	2	—	vikas-kram	T1 constitutional
Delusionlessness → enlightenment	3	inward regulation, justice	jagriti-kram	T2 activity, T3 conduct
Lordship → sovereignty	4	assembly order	—	evidenced in tradition
Undivided society + universal orderliness	Telos	—	—	—

Society is stabilised at sentient scale by inward mediative atma and the justice cycle closing in assemblies — parallel to the mediative nucleus at the atomic scale. Satta remains actionless ground; undivided society is what awakened humans evidence when the full chain closes.

THE TELOS

Undivided society is what awakened humans evidence

Akhand samaj, evidenced with sarvabhaum vyavastha — humankind as one complementary whole in awakened tradition; the inherent complementarity of the coexistence ground, un-blocked at the scale of humankind.

Open problems

- What counts as sufficient evidence of the telos across diverse regions is not fully specified in the English translations.
- JVD and AVD are work-in-progress translations; Hindi originals may extend the production–governance chain.
- Detailed dharma-niti and rajya-niti codification is deferred to the planned Governance, Justice and Undivided Society study.
