

Coexistence Company — Concrete Organizational Structure

Author: AnalyticMadhyasthDarshan.org — a group of people studying Madhyasth Darshan philosophy. Source repository: [raghavamohan/AnalyticMadhyasthDarshan](https://raghavamohan.com/AnalyticMadhyasthDarshan).

Edited on: July 3, 2026, 12:29 PM IST

Basis: This application instantiates the coexistence template and categorical architecture for a deliberate human assembly ([Coexistence From First Principles](#) D1–D20, L1–L7, P3–P5, §§7, 10). It works out, at company scale, the practical programme whose theoretical core is [How To Form Self-Sustaining Organizations](#) (template §10, P3–P4). It is a design blueprint, not legal advice.

Example company: Saha Coexistence Works (SCW) — a knowledge-work company (research, education, and technology services) whose product is understood coexistence made useful in the world. Scale assumed: **60 members** at steady state, expandable by **compound** team formation, not mere headcount.

1. Design objectives

SCW is organised to meet two objectives together ([Coexistence From First Principles](#) §10; P3–P4):

1. **Members are not instrumentalised** — nurturing (*poshan*), not net extraction; values fulfilled in relationships, not fear or temptation as the basis of order (P3; JV p. 39 cited in template §8).
2. **The company sustains across generations of members** — relationships fulfilled (L4), understanding transmitted by education-*sanskara* (L5, τ), common cause, goal, and programme (P4).

Orientation is **completeness of relationships**, not unbounded maximisation of profit, comfort, or scale ([Coexistence From First Principles](#) §9; P6). Metric targets that chase open-ended “more” are treated as delusion pathology, not design requirements ([Coexistence From First Principles](#) §7.5).

2. Assembly tiers (who is a “unit”)

Tier	SCW name	Size (example)	Composition mode	New joint conduct?
Individual	Member	1 person	—	—

Tier	SCW name	Size (example)	Composition mode	New joint conduct?
Family	Family Team	7–12 members	Compound (<i>yaugik</i>)	Yes — one team <i>dharma</i> and outward conduct
Community	Cluster	3–5 Family Teams	Compound colimit	Yes — shared programme across teams
Undivided society	Company (SCW)	All Clusters	Compound + gluing	Yes — one company-facing conduct
Federation (optional)	Alliance	2+ aligned companies	Soc colimit	Only if overlap values agree

Rule: Adding people in the same building without fused conduct is **mixture** (*mishran*) — weaker cohesion. Scale hiring only after **L3** complementarity (need/surplus) and overlap compatibility are verified ([Coexistence From First Principles](#) L3, §7.9).

3. Top-level org chart

4. Functional units (departments)

Each row is a **mandatory subsystem** — the categorical analogue in [Coexistence From First Principles](#) §7.1. The **regulation ladder** (template D12) is distributed: ambient ground and law-as-regulation at the Steward Council and Charter offices; order *sanskar* conformance and inward discipline at Capability and Transmission; **justice** (D16) as the knowledge-order operator $\rho \rightarrow \varphi \rightarrow \mu \rightarrow$ mutual satisfaction at Value & Justice and Evaluation — not a value class in the registry.

#	Department	Template / CT role	Primary responsibility
0	Steward Council	Sat — ambient ground; D2a top	Holds shared coexistence frame; stewards charter; does not treat members as fuel for extraction (A1–A2)

#	Department	Template / CT role	Primary responsibility
1	Office of Cause, Goal & Programme	P4	Documents and guards common cause, goal, and programme for sustainment
2	Charter & Ground Office	D2, D2a law step; A3–A5	Constitutional documents, ethical ground, conducive environment; law-as-regulation readable across units
3	Relationship Registry	Rel, D3	Catalogue of definite relationships with expectation profiles E(r) ; role charters; distinguishes relationship vs voluntary association
4	Capability Institute	Cap, D5a; §6.6.1	Builds cap(u) = ⟨ksh, yog, pat⟩ — capacity, ability, receptivity; gates whether φ can compose; onboarding, mentorship, study environment
5	Value & Justice Office	Val, D4, D7	Maps graded values (six-fold taxonomy) per relationship; supports justice cycle — operator over V , not a member of V
6	Evaluation Forum	Eval, μ , D6	<i>Jeevan</i> -only assessment of value delivered vs inherent; guards over/under/mis-evaluation
7	Evidence & Tradition Office	Ev, D13, L7; §6.15	Conduct others can recognise (<i>pramanikta</i>); closes D13 evidence loop; records awakened tradition
8	Composition Office	Comp, κ , D8; L3 guard	Team formation, mergers, partnerships; mixture vs compound decisions; AdmissibleComp (L3) proof
9	Integration Office	Soc, L4, P6	Glues Clusters: overlap compatibility on shared people, clients, and resources
10	Transmission Institute	Trans, τ , L5; CT §6.11 P16	Education- <i>sanskar</i> for every cohort; mentor lineage; succession — evidenced understanding (τ_{ev}), not rules without φ
11	Conduct Division	Conduct, φ	Product, service, and operations that fulfil external and internal relationships
12	Right-Use & Regeneration	P5, η	Uniform right-use across domains; resource use bounded by regeneration

Headcount allocation (60-member example):

Area	FTE	Notes
Steward Council	5	Part-time rotation; includes Chief Steward
Offices 1–10	18	~2 per office at this scale; Transmission Institute largest (4 FTE)
Conduct Division — Family Teams	30	6 teams × 5 delivery FTE (others in Cap/Trans rotation)
Conduct Division — leads & glue	4	Cluster stewards, Conduct Division coordinator
Right-Use & Regeneration	3	Facilities, procurement, ecological accounts
Total	60	

5. Family Team structure (compound unit)

Each **Family Team** is a compound assembly: members discard separate outward conducts and present **one team conduct** with a written **sig(team)** = ⟨form, properties, essential nature, *dharma*⟩ ([Coexistence From First Principles](#) D2–D3, D8).

Role	Relationship (E(r))	Value primarily flowing
Team Steward	Stewardship ↔ team members	Protection, nurturing, resolution of blockers — not command-for-extraction
Mentor	Teacher ↔ learner	Understanding transmitted; cap(u) development
Producers	Usefulness ↔ recipient	Utility and art values + established values in delivery

Role	Relationship (E(r))	Value primarily flowing
Receptivity & Records	Evidence ↔ team	Documents ϕ; feeds Evaluation Forum, Evidence Office, and Transmission Institute

Team size: 7–12. Below 7, insufficient complementarity; above 12, prefer **compound** split into two teams with L3 need/surplus between them.

6. Definite relationships (company-wide registry)

The Relationship Registry maintains these **knowledge-order** relationships ([Coexistence From First Principles](#) §8; JV p. 109 cited there):

Relationship	Parties	Expectation profile (summary)	Value class
Stewardship	Steward Council ↔ all members	Conducive environment; no instrumentalisation; nurturing	Established + expression
Mentorship	Mentor ↔ member	Understanding passed; cap(u) improved	Established
Production	Producer ↔ client/user	Usefulness-complementarity; purposeful-use	Utility + art + established
Peer complementarity	Family Team ↔ Family Team	Surplus meets need; no internal zero-sum competition (L2)	Utility + established
Earth-tier use	Company ↔ land, energy, materials	Right-use; expenditure ≤ regeneration (P5)	Expression
Succession	Outgoing ↔ incoming member	τ: evidenced method of composition transmitted (P16)	Established
Evaluation	Member ↔ member (via Forum)	μ on value delivered in role — <i>jeevan</i> -only (D6)	Established

Associations (voluntary projects, hobbies) are logged separately and **do not** inherit fixed E(r) until adopted as relationships.

7. Graded values in practice

Template D5 names six value kinds; four operate at the knowledge order ([Coexistence From First Principles](#) D5):

Class	SCW examples	Where monitored
Utility	Quality of deliverable; usefulness of service	Value Office + client feedback
Art	Aesthetic convenience layered on usefulness	Conduct Division + client feedback
Jeevan	Member peace, contentment at work	Capability Institute (not KPI-targeted)
Human	Humane-living values grasped through coexistence understanding	Transmission Institute + Capability Institute
Established	Trust, respect, affection, gratitude in teams	Evaluation Forum + peer review
Expression	Right-use of body, mind, wealth; participation in orderliness	Right-Use Office + Steward Council

Trust is the value deposited when fulfilment ϕ succeeds in a relationship (D7a). **Justice** is the **operation** on values — $\rho \rightarrow \phi \rightarrow \mu \rightarrow$ mutual satisfaction — not a poster slogan and not an entry in the value registry (D7).

8. Three completeness stages (milestones)

Stage	Name	SCW milestone checklist
T1 — Constitutional	<i>Gathanpurnata</i>	Charter ratified; all relationships in registry; Family Teams formed as compound units; cause/goal/programme published
T2 — Activity	<i>Kriyapurnata</i>	Programmes run; ϕ in daily work; cap(u) converts to effort; Clusters glued with compatible overlaps
T3 — Conduct	<i>Vyavaharpurnata</i>	Conduct evidenced externally (<i>pramanikta</i>); D13 loop closed; Transmission Institute producing awakened tradition

T2–T3 are **awakening progression** (*jagriti-kram*) inside an already-constituted company — lifts in the knowledge order guarded by cap(u) and μ , not the same as hiring more people or material-tier κ_{comp} ([Coexistence From First Principles](#) §§7.2, 7.10; template D13).

9. Governance and decision rights

Decision type	Decides	Guard
Cause, goal, programme	Steward Council + all-member consent	P4
New compound team or Cluster	Composition Office + L3 proof + Integration Office	κ_{comp} , not κ_{mix}
Federation / alliance	Steward Council + Integration Office overlap audit	Soc colimit — P6
Relationship recognition	Relationship Registry + affected parties	ρ
Value dispute	Evaluation Forum → Value Office	μ
Resource draw on nature	Right-Use Office	P5 regeneration bound
Member onboarding / offboarding	Transmission Institute + Mentor	τ_{ev} evidenced (P16)
Right-use claim company-wide	Must pass naturality — all domains upgraded together	η (Coexistence From First Principles §7.7)

Chief Steward coordinates stewards; **does not** own surplus extraction from members. Profit, where it arises, is **circularity for family needs and reinvestment in transmission**, not unbounded accumulation ([Coexistence From First Principles](#) §10; MVD p. 265).

10. Operating rhythms

Rhythm	Owner	Purpose
Weekly — team ϕ review	Family Team	Relationships recognised? Values flowing? cap(u) blockers (pat / yog / ksh)?
Monthly — Cluster glue check	Integration Office	Shared clients/members: contradictory E(r)?
Quarterly — μ forum	Evaluation Forum	Evaluation quality; mis-evaluation correction
Quarterly — evidence audit	Evidence & Tradition Office	D13 loop; conduct manifest? pram(ev) at T3?
Per cohort — transmission	Transmission Institute	Education- <i>sanskar</i> for every new member; τ_{ev} not policy deck alone

Rhythm	Owner	Purpose
Annual — completeness review	Steward Council	T1/T2/T3 progress; P4 programme still common

11. Onboarding pipeline (τ)

Every new member passes through Transmission Institute — **ignorance cannot flow in tradition** (*Coexistence From First Principles* D10; JV p. 49 cited there). Full membership requires a composable D20 step: evidenced conduct, not private conviction alone (L7).

Minimum duration: **90 days** before full membership in a compound Family Team.

12. Growth and merger rules

Admissible growth (L3): New team or hire when a documented **need** in one unit complements **surplus** in another — an admissible span in **AdmissibleComp**, not arbitrary colocation (*Coexistence From First Principles* §7.9).

Admissible merger: Only when Integration Office certifies:

1. **Compatible values** on all shared members and shared accounts (P6 / Soc).
2. **Compound** intent — fused conduct, new sig(assembly), not co-located silos.
3. **Transmission** plan for combined culture — τ_{ev} with evidenced understanding, not policy deck alone (P16; template D10).

Reject when: contradictory expectations on the same person; mixture presented as merger; selective right-use (η fails naturality); cap(u) insufficient for the merged E(r) profiles.

13. Failure diagnostic (reverse use)

Symptom	Likely clause broken	First responder
Culture collapse after hiring spree	κ_{mix} not κ_{comp} ; τ weak	Composition + Transmission
High turnover	τ / L5; τ without τ_{ev}	Transmission Institute
Toxic high performer	μ skipped; values not in E(r)	Evaluation Forum
Green team / exploitative HR	η non-uniform right-use	Right-Use + Steward Council
Merger dysfunction	Soc — overlap conflict	Integration Office

Symptom	Likely clause broken	First responder
Burnout	Extraction culture; A1–A2 inverted	Steward Council
Metric gaming	Maximisation pathology (§5)	Value Office
Good intent, truncated delivery	cap(u) blocked φ (pat / yog / ksh)	Capability Institute
Private conviction, no public conduct	D13 loop open; ev not closed	Evidence & Tradition
Rules transmitted, understanding not	τ without evidenced φ (P16)	Transmission Institute

14. What this structure is not

- **Not** a conventional command hierarchy optimised for shareholder extraction.
- **Not** self-sufficient proof of coexistence — metaphysical premises remain commitments ([Coexistence From First Principles](#) §11).
- **Not** derivable from category theory alone — L3 complementarity, cap(u), τ_{ev} , and saturation are **designed in** ([Coexistence From First Principles](#) §7.11 Q8–Q9, Q11, Q15).

SCW is a **template instance**: bounded units, definite valued relationships, compound assembly by complementarity, persistence by fulfilment, transmission by education-*sanskar*, evaluation and evidence at the knowledge tier — structured so longevity and balance are **construction requirements**, not afterthoughts.

Appendix A — “Where is my department?” (conventional-role FAQ)

Readers arriving from a conventional org chart look for familiar boxes — a sales team, a finance department, HR, a CEO, a board. Some of those functions map cleanly onto an office or relationship already defined above. Others are **reframed**: the work still happens, but it is carried by a differently-shaped unit because the premise behind the conventional box (net extraction of members, open-ended maximisation) is rejected at the design objectives (§1; P3). A few have **no direct answer** in the current design — where that is the case it is said plainly, followed by the darshan’s reasoning and the handling that reasoning implies.

Conventional function	Status	Where it lives here
Sales / business development	Reframed	Conduct Division (φ); Production relationship (§4, §6)

Conventional function	Status	Where it lives here
Marketing / advertising / brand	No direct answer	Recognisable conduct (<i>pramanikta</i>), Evidence & Tradition Office (§4)
Customer support / success	Mapped	Production relationship + client feedback (§6, §7)
Finance & accounts	Mapped	Right-Use & Regeneration; Steward Council (§4, §9)
Payroll / compensation	No direct answer	Needs-based circulation; Steward Council + Right-Use (§9)
Shareholders / investors / board	No direct answer	Rejected as owner-extractor; Steward Council is ambient ground (§3, §14)
Profit distribution / dividends / equity	No direct answer	Circulation for family needs + reinvestment (§1, §9)
Human resources	Reframed	Capability Institute, Relationship Registry, Transmission Institute, Evaluation Forum (§4)
Recruiting / hiring	Mapped	Onboarding pipeline τ ; L3 need/surplus (§11, §12)
Performance management / KPIs	Reframed	Evaluation Forum (μ), <i>jeevan</i> -only (§4, §10, §13)
Promotions / raises / career ladder	No direct answer	Awakening progression T1–T3; cap(u), μ (§8)
Training / L&D	Mapped	Transmission Institute + Capability Institute (§4, §11)
Grievances / ethics / employee relations	Mapped	Justice cycle $\rho \rightarrow \varphi \rightarrow \mu$; Value & Justice + Charter (§4, §9)
Layoffs / downsizing	Partial / no direct answer	Offboarding τ_{ev} exists; cost-cutting layoffs contradict A1–A2 (§9)
CEO / executive leadership	Reframed	Steward Council + Chief Steward + Office of Cause, Goal & Programme (§3, §9)
Middle management / team leads	Reframed	Team Steward — stewardship, not command (§5)
Strategy / planning	Mapped	Office of Cause, Goal & Programme; completeness review (§1, §10)

Conventional function	Status	Where it lives here
Operations / production	Mapped	Conduct Division + Family Teams (§3–§5)
Quality assurance	Mapped	Value & Justice + Evaluation + Evidence & Tradition (§4, §10)
Legal / compliance / governance docs	Mapped	Charter & Ground Office (§4)
R&D / innovation	Reframed	Research is the product; growth by L3 need/surplus (intro, §12)
IT / facilities / procurement / admin	Mapped	Right-Use & Regeneration (§4, §9)
PR / communications	Reframed	Evidence & Tradition Office — <i>pramanikta</i> , not spin (§4)

A.1 Selling and customers

Q — Where is the Sales department? There is no unit whose mandate is to close deals against a quota. The client-facing exchange is registered as the **Production** relationship — Producer ↔ client/user, an expectation profile of *usefulness-complementarity* and *purpose-ful-use* (§6) — and the work of fulfilling it belongs to the **Conduct Division** (φ) through the Family Teams (§3, §4 row 11, §5). Selling here is the offer of a genuinely useful deliverable, not persuasion engineered to manufacture a purchase.

Q — Where is Marketing, advertising, and brand? There is no direct answer: the design has no unit for demand manufacture, and it is deliberate rather than an omission. Order in this company rests on values fulfilled in relationships, not on fear or temptation as the lever of conduct (P3; §1), and open-ended metric chasing is treated as a maximisation pathology, not a goal (§5, §13). The nearest legitimate function is **recognisable conduct** — *pramanikta* held by the **Evidence & Tradition Office** (§4 row 7): reputation is earned by conduct others can verify, so the honest counterpart to marketing is truthful representation of what the company actually delivers, not cultivation of wants.

Q — Where is Customer support / success? This is the continuing life of the **Production** relationship, not a separate cost centre. Client experience feeds the **Utility** and **Art** value monitoring (§7) and surfaces in the **weekly team φ review** (§10), where the question is whether the relationship is still being fulfilled — support is part of φ, not an after-thought bolted on after the sale.

A.2 Money, ownership, and pay

Q — Where is Finance & Accounts? Bookkeeping, procurement, and asset records sit with **Right-Use & Regeneration** (§4 row 12: “procurement, ecological accounts”), whose

remit binds resource use to regeneration (P5) and which holds the decision right over resource draw (§9). Disposition of any surplus is a stewardship matter held by the **Steward Council** (§9). There is no treasury whose mandate is to maximise retained earnings.

Q — Who pays salaries, and how is compensation set? The study does not currently name a payroll unit, and the concept of “salary” is not modelled as a wage bargained against extracted output. Member livelihood is framed as **circulation for family needs** — nurturing (*poshan*), not net extraction (§9; P3; A1–A2). The handling this implies: needs-based disbursement whose policy is a **Steward Council** decision and whose ledger sits with **Right-Use & Regeneration**. This remains underspecified in the body text; assigning explicit ownership of member livelihood would close the gap.

Q — Where are the shareholders, investors, and board of directors? There is no direct answer because the role is rejected, not relocated. The **Steward Council** is “ambient ground, not extraction” (§3, §4 row 0) and the whole structure is explicitly “not a conventional command hierarchy optimised for shareholder extraction” (§14). No party holds a claim on members’ surplus by virtue of ownership. A capital provider, were one involved, could only enter as a **relationship with a stated expectation profile** in the registry (§6), never as an owner entitled to extract returns.

Q — How are profit, dividends, and equity distributed? There is no direct answer in the conventional sense. Profit, where it arises, is **circularity for family needs and reinvestment in transmission**, not unbounded accumulation (§9; §1). Surplus is recirculated to meet needs and to sustain the company across generations of members, rather than distributed as a return on ownership; there is no equity or dividend instrument in the design.

A.3 People (HR)

Q — Where is Human Resources? HR is distributed across four units rather than centralised: the **Capability Institute** develops $\text{cap}(u) = \langle \text{ksh}, \text{yog}, \text{pat} \rangle$, the **Relationship Registry** holds role charters and expectation profiles $E(r)$, the **Transmission Institute** owns onboarding and succession, and the **Evaluation Forum** handles assessment (§4). “Green team / exploitative HR” is named as a **failure symptom** in the diagnostic (§13), first-answered by Right-Use + Steward Council — the design treats extractive HR as a defect to catch, not a function to build.

Q — Where is Recruiting / hiring? Hiring runs through the **onboarding pipeline** τ (§11) — offer, cause/goal/programme study, registry $E(r)$, mentor and $\text{cap}(u)$ plan, shadow fulfilment, D13 evidence gate — with a 90-day minimum before full membership. Whether to add a person at all is governed by the **L3 need/surplus** rule (§12): a hire is admissible only when a documented need complements a surplus, not by arbitrary headcount growth.

Q — Where are performance reviews and KPIs? Assessment belongs to the **Evaluation Forum** (μ , §4 row 6), which is *jeevan*-only and guards against over-, under-, and mis-evaluation (§10). Conventional KPI and sales-target regimes are treated as **metric**

gaming, a maximisation pathology first-answered by the Value Office (§13). Evaluation measures value delivered in the relationship, not output against an open-ended number.

Q — Where are promotions, raises, and the career ladder? There is no direct answer: the design has no rank-and-pay ladder. Advancement is **awakening progression** through the completeness stages $T_1 \rightarrow T_2 \rightarrow T_3$ (§8) — a lift in the knowledge order guarded by $\text{cap}(u)$ and μ , not a change of title or headcount tier. The handling this implies: members grow by deepening capability and fulfilment, and their needs are met regardless of a positional ladder, rather than competing upward for scarce senior slots.

Q — Where is Training & Development (L&D)? This is the core of two units: the **Transmission Institute** delivers education-*sanskara* (τ_{ev}) to every cohort and owns the mentor lineage (§4 row 10, §11), and the **Capability Institute** builds $\text{cap}(u)$ (§4 row 4). Development is a construction requirement here — “ignorance cannot flow in tradition” (§11) — not an optional perk.

Q — Where do grievances and ethics complaints go? Disputes follow the **justice cycle** $\rho \rightarrow \varphi \rightarrow \mu \rightarrow$ mutual satisfaction: a value dispute goes to the **Evaluation Forum**, then the **Value & Justice Office** (§9), with the **Charter & Ground Office** holding the ethical ground and law-as-regulation (§4 row 2). Justice is the *operation* on values (D7), not a poster slogan or a complaints inbox.

Q — Where are layoffs and downsizing handled? Only partially, and cost-cutting layoffs have no direct sanction in the design. Individual **offboarding** exists via the Transmission Institute and mentor with τ_{ev} evidence (§9). But treating members as fuel to be shed in a downturn inverts the first design objective — members are not instrumentalised (A1–A2, §1) — and appears in the diagnostic as burnout/extraction pathology (§13). The handling this implies: contraction by rebalancing **need and surplus** across teams (L3, §12) and by completeness review (§10), not disposal of people to protect a margin.

A.4 Leadership and management

Q — Who is the CEO? There is no single owner-executive. Coordination is shared: the **Steward Council** holds the coexistence frame as ambient ground, the **Chief Steward** coordinates stewards but “does not own surplus extraction from members” (§9), and the **Office of Cause, Goal & Programme** guards the common cause, goal, and programme (§4 row 1). Decisions are allocated by the governance rights table (§9), not concentrated in one office.

Q — Where are the middle managers? The nearest role is the **Team Steward** in each Family Team, whose relationship to members is **stewardship** — protection, nurturing, and resolution of blockers — explicitly “not command-for-extraction” (§5). The steward serves the team’s fulfilment rather than directing labour for output.

Q — Where is Strategy / planning? Direction is held by the **Office of Cause, Goal & Programme** (P4) and reviewed at the **annual completeness review** by the Steward Council (§10). Orientation is completeness of relationships, not maximisation of profit, com-

fort, or scale (§1) — so “strategy” here means keeping the common programme common, not chasing growth targets.

A.5 Delivery, quality, and support functions

Q — Where is Operations / production? Delivery is the **Conduct Division** (φ) executed by the **Family Teams** (§3–§5) — the units that actually fulfil external and internal relationships through their work.

Q — Where is Quality Assurance? Quality is held at the knowledge tier by three units together: the **Value & Justice Office** maps graded values per relationship, the **Evaluation Forum** assesses value delivered (μ), and the **Evidence & Tradition Office** closes the D13 loop so conduct is externally recognisable (*pramanikta*) (§4, §10).

Q — Where is Legal / compliance? Constitutional documents, ethical ground, and law-as-regulation readable across units are held by the **Charter & Ground Office** (§4 row 2).

Q — Where is R&D / innovation? There is no dedicated R&D box because, for a knowledge-work company, research and understanding *are* the product (intro). New lines of work are admitted the same way as any growth — by **L3 need/surplus** complementarity (§12) — while capability to pursue them is built at the Capability and Transmission Institutes.

Q — Where is IT, Facilities, Procurement, and Admin? These operational supports sit with **Right-Use & Regeneration**, which owns facilities and procurement under the P5 regeneration bound (§4 row 12, §9).

Q — Where is PR / Communications? External representation is the province of the **Evidence & Tradition Office**: conduct others can recognise (*pramanikta*) and awakened tradition recorded (§4 row 7). The counterpart to communications is verifiable conduct, not spin.
