

The Epistemology of Coexistence

MADHYASTH DARSHAN · CO-EXISTENTIALISM

The Epistemology of Coexistence

Knowledge, resolution, and happiness — understanding evidenced in humane conduct

Based on the revised study (AnalyticMadhyasthDarshan.org)

Primary texts of Shri A. Nagraj — MVD · KD · SB · JV (tr. Rakesh Gupta) · 1 / 36

Open by distinguishing information from realised understanding. The revised deck follows Madhyasth Darshan on its own terms and asks how knowledge becomes resolution, right conduct, and the happiness sought by the human being.

- MVD; KD; SB; JV

The Questions Epistemology Must Answer

FRAMING

The Questions Epistemology Must Answer

- ❓ What is knowledge? — What makes understanding more than information or belief?
- ❓ Who is the knower? — What in the human being understands, chooses, and evaluates?
- ❓ What is known? — What reality, self, relationship, and conduct must be understood?
- ❓ How does knowing develop? — How does experience mature into understanding?
- ❓ How does error arise? — Why do belief, action, and result sometimes conflict?
- ❓ What counts as evidence? — How is understanding tested in life?

These questions guide the deck from definition to lived evidence. · AnalyticMadhyasthDarshan.org · 2 / 36

Keep these questions open and accessible. They ask what knowledge is, who knows, what is known, how understanding develops, how error enters, and how knowledge is tested in life. The technical vocabulary appears only when the deck reaches the relevant answer.

What Knowledge Is, and Why It Is Needed

MOVEMENT ONE · §§1.2 → 1.1

What Knowledge Is, and Why It Is Needed

Knowledge is realised understanding of coexistence, jeevan, and humane conduct — and freedom without it cannot reach the happiness sought.

Answers · What is knowledge? · Who is the knower? · What is known?

Stakes first, then the claim · AnalyticMadhyasthDarshan.org · 3 / 36

Open the movement with the stakes, not the definitions. The human being belongs to the knowledge order, whose dharma is happiness, yet carries imagination and freedom of action without automatically carrying the understanding needed to direct them. Only then state what knowledge is.

[Sources]

- The Epistemology of Coexistence, §§1.1–1.2
- MVD pp. 33, 311
- KD §3.17

Why Knowledge Matters

MOVEMENT ONE · §1.2 · THE HUMAN PREDICAMENT

Why Knowledge Matters

The human being belongs to the knowledge order, whose dharma is happiness, yet carries imagination and freedom of action without the understanding to direct them.

The aspiration — happiness

Happiness is the dharma of the knowledge order — not a preference but what the human being constitutionally seeks.

The gift — imagination and freedom

Human conduct is not constitutionally fixed as bodily orders are. People can hold incompatible beliefs and choose otherwise.

The failure — delusion

The body is taken to be the self, and sensory satisfaction is expected to fulfil jeevan. The aspiration remains; conduct cannot secure it.

The remedy — resolution

Samadhan is not calm. It is understanding the relevant realities together with adequate answers to the why and how of activity.

Knowledge brings freedom into agreement with coexistence. · MVD pp. 33, 311 · KD §3.17 · AnalyticMadhyasthDarshan.org · 4 / 36

Begin with the predicament, not a definition. The knowledge order has happiness as its dharma, but imagination and freedom of action arrive without the understanding needed to direct them. Delusion is the specific failure: the body is taken as the self and sensory satisfaction is expected to fulfil jeevan. Resolution is not the cessation of anxious thought — it is understanding the relevant realities together with adequate answers to why and how in activity.

- The Epistemology of Coexistence, §1.2
- MVD pp. 33, 311
- KD §3.17

The Human Goal Sets the Stakes

MOVEMENT ONE · §1.2 · THE HUMAN GOAL

The Human Goal Sets the Stakes

Knowledge is needed for a definite goal. Madhyasth Darshan states it at four scales that must hold together, none substituting for another.

Resolution — in the person

Freedom from delusion and comprehensive resolution: the why and how of activity become clear.

Prosperity — in the family

Assured availability of physical means in excess of properly assessed need, not unlimited accumulation.

Fearlessness — in society

Rests on trust, justice, and freedom from exploitation, not on protection through domination.

Coexistence — in orderliness

Participation without contradiction in an undivided society and the wider natural order.

Each scale bears an inward value — see slide 16. · KD §3.17, p. 150 · JV pp. 61, 165 · AnalyticMadhyasthDarshan.org · 5 / 36

This slide answers why any of this matters before the deck goes into mechanism. The human being belongs to the knowledge order, whose dharma is happiness, but unlike the prior orders human conduct is not constitutionally fixed: people can accept incompatible beliefs, choose alternatives, and reorganise their environment. Imagination and freedom of action arrive without the understanding needed to direct them, and knowledge is what brings that freedom into agreement with coexistence. Take the four scales in order and stress the definitions, because each is easy to misread. Prosperity is assured availability beyond a properly assessed need, not unlimited accumulation. Fearlessness rests on trust and justice, not on domination. Coexistence at the social level means participation without contradiction. Close on the key point: the four do not substitute for one another, so material sufficiency cannot compensate for unresolved understanding, and private calm cannot substitute for unjust relationship.

Knowledge, Wisdom, and Science Differ

MOVEMENT ONE · §1.2 · GYAN · VIVEK · VIGYAN

Knowledge, Wisdom, and Science Differ

Complete understanding must establish what is real, identify the humane goal, and determine practicable direction. The three terms are joined, but not interchangeable.

Gyan — knowledge

Realised understanding of coexistence, jeevan, and humane conduct: what is, who knows, and what right participation requires.

Vivek — wisdom

Knowledge by which the human goal — resolution, prosperity, fearlessness, and coexistence — is recognised and sensory or social motives are discriminated.

Vigyan — science

Directional knowledge for material prosperity together with the human and jeevan goals, including the law and process of activity and thought.

Gyan establishes reality; vivek recognises the goal; vigyan gives reliable direction. — MVD pp. 170, 208–209 · AnalyticMadhyasthDarshan.org · 6 / 36

Gyan, vivek, and vigyan answer different questions. Knowledge establishes reality, wisdom recognises the humane goal, and science gives reliable direction for material prosperity together with human and jeevan goals.

- MVD p. 169

- MVD pp. 208–209

What Knowledge Must Include

MOVEMENT ONE · §1.1 · THREE INSEPARABLE CONTENTS

What Knowledge Must Include

Complete knowledge is threefold. Each content corrects a partial epistemology: reality without the knower is incomplete; self-knowledge without conduct is unproven; conduct without the whole lacks orientation.

Existence as coexistence

Omnipresence and all real units; their form, properties, essential nature, dharma, relationships, and participation in orderliness.

Jeevan

The sentient unit that bears attention, reflection, resolve, enlightenment, realisation, selection, evaluation, and authenticity.

Humane conduct

The right recognition and fulfilment of relationships, made evident as justice, work, behaviour, and participation in universal orderliness.

Knowledge of coexistence, jeevan, and humane conduct form one epistemic field. — KD §3.17 · SB p. 116 · AnalyticMadhyasthDarshan.org · 7 / 36

Complete knowledge has three inseparable contents. Humane conduct is not an ethical add-on after knowledge; it is one of the things that must be understood.

[Sources]

- KD §3.17

- SB p. 116

Knowledge Is Realised in Jeevan

MOVEMENT ONE · §1.1 · PERVASIVE KNOWLEDGE, REALISATION, AND EVIDENCE

Knowledge Is Realised in Jeevan

Pervasive knowledge

Coexistence of Omnipresence and Nature is itself the knowledge that needs to be known.

Realisation in jeevan

Jeevan is the knower. Atma realises coexistence; through buddhi, this becomes clear understanding.

Resolution and evidence

Realisation makes comprehensive resolution accessible—the why and how of activity become clear. Happiness is harmony within jeevan; justice and mutual satisfaction evidence understanding in relationships.

MVD pp. 11, 35, 115–116, 207–208, 289, 311 · KD pp. 66, 134 · AnalyticMadhyasthDarshan.org · 8 / 36

Pervasive knowledge here names coexistence itself: Omnipresence together with Nature is the knowledge to be known. This does not make Omnipresence a perceiving subject; jeevan is the knower. Atma realises coexistence and buddhi receives both, after which comprehensive samadhan becomes accessible. Samadhan is clarity about the why and how of activity. Happiness, peace, contentment, and bliss are internal harmonies within jeevan. In relationship, justice is evidenced through recognition, value-fulfilment, evaluation, and mutual satisfaction. Conduct is evidence of understanding, not the definition of knowledge itself.

- MVD pp. 11, 35, 115–116, 207–208, 289, 311

- KD pp. 66, 134

Knowledge, Knower, and Known

MOVEMENT ONE · §1.1 · THE TRIAD, AND COHERENCE WITHOUT MERGER

Knowledge, Knower, and Known

Knowledge

Realised understanding of coexistence, jeevan, and humane conduct — accepted, evaluated, and capable of guiding action.

Knower

Jeevan is the sentient bearer of knowing; the human being is the embodied participant through whom knowing is spoken, tested, and lived.

Known

Existence as coexistence: units, relationships, values, orderliness, and the conditions in which human aspiration can be fulfilled.

Meaningful evidence

The known becomes meaningful when understanding appears as resolution, prosperity, fearlessness, coexistence, and an awakened tradition.

Coherence without merger: jeevan knows, coexistence is known, and understanding does not dissolve what it knows — brahma satya hai, jagat satat hai.

KD §3.17, pp. 145–150 · MVD pp. 14–15, 84, 115 · SB p. 81 · AnalyticMadhyasthDarshan.org · 9 / 36

State the triad and then guard it. The roles stay distinct: jeevan knows, coexistence is known, and knowledge is their realised relation made evident in life. At realisation the triad is completed without erasing its terms — brahma satya hai, jagat satat hai, the ground is truth and the world perpetual. This is where Madhyasth Darshan parts from a non-dual reading: coherence of roles is not identity of knower and known.

[Sources]

- The Epistemology of Coexistence, §1.1
- KD §3.17
- MVD pp. 14–15, 115–116
- SB p. 81

Three Domains of Knowledge

MOVEMENT ONE · §1.1 · THE SCOPE OF THE KNOWN

Three Domains of Knowledge

The known is not exhausted by measurable form and property. Madhyasth Darshan distinguishes three connected domains, each with its own objects, capacities, and forms of evidence.

Physical knowledge

Form, property, material composition, production, and skill — knowledge expressed as effective engagement with material nature.

Intellectual knowledge

Meaning, relation, purpose, analysis, evaluation, and proficiency — thought disciplined by what is and what fulfils orderliness.

Coexistential knowledge

Realisation of coexistence, jeevan, and humane conduct — the horizon within which physical and intellectual knowledge find direction.

Skill and scholarship become complete when they serve right relationship and orderliness. — KD pp. 3–4 · AnalyticMadhyasthDarshan.org · 10 / 36

The known spans physical, intellectual, and coexistential domains. Do not turn the distinction into three unrelated realities; they are regions of one coexistential field.

[Sources]

- KD pp. 3–4
- The Epistemology of Coexistence, §1.1

Cause–Doer–Effect Operates at Two Levels

MOVEMENT ONE · §1.1 · CAUSE, DOER, EFFECT, AND SEEKING

Cause–Doer–Effect Operates at Two Levels

Epistemic level

Karan is the knowledge-state, karta the human being, and karya wholeness or universal participation made evident in living.

Existential level

Coexistence is the ever-present cause, jeevan the doer, and human, deific, or divine status the effect according to awakening.

Sadhya — the aim

Awakening and established seer-status: freedom from delusion and capacity to understand, evaluate, and participate.

Sadhak · sadhan

The human being is the seeker; body together with jeevan is the means, supported by imagination, freedom of action, and tradition.

Action must be read with its level specified: ontological cause, epistemic state, human agency, means, result, and wider participation are related without being collapsed.

KD §3.17, pp. 145–150 · *AnalyticMadhyasthDarshan.org* · 11 / 36

Specify the level whenever using cause, doer, and effect. The compact epistemic assignment and the broader existential assignment are related but not interchangeable; seeking adds aim, seeker, and means.

[Sources]

- KD §3.17, pp. 145–150

Seer, Doer, and Enjoyer

MOVEMENT ONE · §1.1 · SEER · DOER · ENJOYER

Seer, Doer, and Enjoyer

The awakened human is seer, doer, and enjoyer in one joint form. Seer-status establishes understanding; doing places it in action; enjoyer-status names the experienced fruit or fruition of action.

*goal: realised seeing
coexistence and relationship
known*

*goal: authentic conduct
work and behaviour aligned*

*receives fruition; in awakened
conduct this supports mutual
satisfaction*

One human joint form

*The seer does not withdraw
from action.*

*The doer is guided by
understanding.*

*The enjoyer receives the result
and evaluates its fit with the
accepted aim.*

Understanding establishes seer-status; embodied activity evidences the doer; experienced result evidences the enjoyer. Mutual satisfaction is one humane result, not the definition of enjoyer-status.

KD §3.18 · AnalyticMadhyasthDarshan.org · 12 / 36

Seer here means established awakened seer-status, not a generic subject term. Understanding, embodied doing, and experienced result belong together without collapsing one into another.

[Sources]

- KD §3.18

Who Knows, and What It Governs

MOVEMENT TWO · §§1.3 → 1.4

Who Knows, and What It Governs

Jeevan is the knower; its knowing must govern bodily life, social motive, deliberation, and the order of every activity.

Answers · How does knowing develop? · Opens · How does error arise?

The knower, then what it governs · AnalyticMadhyasthDarshan.org · 13 / 36

This movement has two halves. First the knower: five loci, ten activities, reflection and projection, the joint form. Then what its knowing must govern: bodily propensity, social motive, deliberation, and the order carried by every activity.

[Sources]

- The Epistemology of Coexistence, §§1.3–1.4
- JV pp. 92–93
- KD §§3.12, 3.16–3.17

Five Loci, Ten Activities, Two Directions

MOVEMENT TWO · §1.3 · THE ACTIVE KNOWER

Five Loci, Ten Activities, Two Directions

The knower is jeevan: a constitutionally complete sentient unit whose ten activities sit in five loci. The same ten run in two directions.

Jeevan — five loci

- Atma — realisation and authenticity
- Buddhi — enlightenment and resolve
- Chitta — contemplation and visualisation
- Vritti — deliberation and analysis
- Mun — taste and selection

Two directions

- Inward — reflection: sensation and thought mature toward enlightenment and realisation.
- Outward — projection: realisation returns as analysis, selection, work, and behaviour.

Atma is madhyasth — mediative: its centrality attains the touch of knowledge in every dimension, evident only through integral behaviour and thought.

JV pp. 72–73, 92–93 · KD §3.12 · MVD p. 211 · AnalyticMadhyasthDarshan.org · 14 / 36

Establish the canonical taxonomy before anything is built on it: five loci, ten activities, and two directions of the same ten. Then name the darshan itself. Atma is madhyasth — mediative — and by its centrality the mediative activity attains the touch of knowledge in every dimension. Mediateness is neither neutrality between options nor compromise between doctrines; its test is coherence between what is understood and what is done.

- JV pp. 72–73, 92–93

- MVD p. 211

Knowing and Doing Form a Recurrent Cycle

MOVEMENT TWO · §1.3 · REFLECTION AND PROJECTION

Knowing and Doing Form a Recurrent Cycle

This four-step diagram is a pedagogical synthesis of the textual account: attention and reflection deepen knowing; realisation and projection place it back into action and result.

Reflection — the knowing direction

Experience and consequence return through attention. Mun and vritti attend, chitta forms meaning, buddhi resolves, atma realises.

Projection — the evidencing direction

Realisation and resolve take form as visualisation, analysis, selection, bodily action, work, behaviour, and communication.

Each coherent cycle can deepen the next; reflection without projection remains unevidenced, while projection without reflection repeats habit.

Result and evaluation return the projected action to renewed attention.

KD §§3.12, 3.16–3.17 · MVD p. 290 · JV pp. 92–93 · AnalyticMadhyasthDarshan.org · 15 / 36

Emphasise recurrence, not a one-way pipeline. Reflection is the knowing direction and projection the evidencing direction of one active jeevan. Projection gives reflection material to evaluate; corrected reflection guides the next projection. Reflection without projection remains unevidenced, while projection without reflection repeats habit. The four-step diagram is a pedagogical synthesis, not a canonical list.

- KD §§3.12, 3.16–3.17
- JV pp. 92–93

The Human Being Seeks Happiness

MOVEMENT TWO · §§1.2, 1.3 · THE FOUR JEEVAN VALUES

The Human Being Seeks Happiness

Happiness

Harmony between mun and vritti: selection and deliberation no longer contradict the understood purpose.

Peace

Harmony between vritti and chitta: deliberation and meaning-bearing contemplation are mutually coherent.

Contentment

Harmony between chitta and buddhi: contemplation and enlightened resolve are mutually coherent.

Bliss

Harmony between buddhi and atma: resolve and realisation are mutually coherent in awakened jeevan.

These are relations among the activities of jeevan, not quantities on one scale. Material success cannot compensate for unresolved understanding, nor private calm for unjust relationship.

MVD pp. 207–208 · JV p. 138 · KD p. 112 · *AnalyticMadhyasthDarshan.org* · 16 / 36

The four values are stated as relations between the activity-centres named on the previous slide, which is why they belong here rather than earlier. Happiness between mun and vritti, peace between vritti and chitta, contentment between chitta and buddhi, bliss between buddhi and atma. They are relations among activities, not quantities on one scale — so material success cannot compensate for unresolved understanding, and private calm cannot substitute for unjust relationship. Slide 36 pairs them with the four human goals.

- KD p. 112

The Activities Are Legible in a Person

MOVEMENT TWO · §1.3 · FORCE AND POWER

The Activities Are Legible in a Person

The ten activities divide again into force and power. Five are projected — named from what becomes observable in a living person. This is what links the faculty account to behaviour.

Activities of state — force

- Taste — mun
- Comparison — vritti
- Contemplation — chitta
- Enlightenment — buddhi
- Realisation — atma

Activities of motion — power

- Selection — mun
- Analysis — vritti
- Desire — chitta
- Resoluteness — buddhi
- Evidence — atma

Projected, these show as hope, thought, desire, resoluteness, and authenticity — a person's hopes and resolves are therefore epistemic evidence, not private states.

KD §3.6, pp. 70–71 · KD §3.16, p. 145 · AnalyticMadhyasthDarshan.org · 17 / 36

This slide is the bridge from the faculty account to the darshan's claims about behaviour. The same ten activities divide into five of state, expressed as force, and five of motion, expressed as power. Named from what becomes observable in a living person, the projected five are hope, thought, desire, resoluteness, and authenticity — which jeevan alone expresses, communicates, and manifests. That is why conduct can carry epistemic weight later in the deck: the activities of jeevan are legible in a person.

[Sources]

- The Epistemology of Coexistence, §1.3

- KD §3.6, pp. 70–71

- KD §3.16, p. 145

Jeevan Knows; the Body Mediates

MOVEMENT TWO · §1.3 · THE HUMAN JOINT FORM

Jeevan Knows; the Body Mediates

Knowing belongs to jeevan, but human evidence requires the joint form. The body supplies sensory access, brain-mediated signalling, speech, movement, work, and participation with others.

Jeevan — sentient bearer

- Realisation, enlightenment, contemplation, deliberation, selection
- Evaluation of relationship and value
- Continuity of the knower across bodily change

Human joint form — lived evidence

- Brain and senses carry signals and bodily conditions
- Speech and action place understanding in a shared world
- Work, behaviour, and teaching make claims answerable to result

The texts specify a functional relation between jeevan and the brain; a more precise account of their interaction remains an open task within the exposition.

MVD pp. 83–84, 200 · KD §3.16 · JV p. 59 · AnalyticMadhyasthDarshan.org · 18 / 36

The body is the necessary instrument of evidence, but the texts place knowing and evaluation in jeevan. The slide states the primary-text claim and does not pretend to supply a modern neurophysical mechanism.

[Sources]

- MVD pp. 83–84, 200

- JV pp. 59, 139

Cognisance Regulates Sensitivity

MOVEMENT TWO · §1.3 · SENSITIVITY AND COGNISANCE

Cognisance Regulates Sensitivity

Cognisance — sangyansheelta

The knowing-and-accepting capacity through which jeevan understands relationship, value, purpose, and orderliness. It gives direction.

Sensitivity — sanvedansheelta

Embodied responsiveness through sound, touch, sight, taste, and smell. It supplies contact and capacity for action, never fulfilment.

Why contact is not enough

Sensory contact is required for bodily interaction, but repeating it never yields the continuous satisfaction jeevan seeks.

Balance, not suppression

The awakened human regulates sensitivity through cognisance while retaining both — recognising and fulfilling the world proceeds through that balance.

This is the distinction the next slide's fork turns on: which of the two governs bodily signals, material outcomes, and the selection that follows.

SB p. 64 · MVD pp. 49–51, 166 · KD pp. 66–67 · AnalyticMadhyasthDarshan.org · 19 / 36

Cognisance is jeevan's knowing-and-accepting capacity; sensitivity is embodied responsiveness through the five senses. Sensory contact is required for bodily interaction but does not by repetition yield the continuous satisfaction jeevan seeks. The awakened human regulates sensitivity through cognisance while retaining both in balance. Place this before the fork: the fork turns on which of the two governs.

[Sources]

- The Epistemology of Coexistence, §1.3

- SB p. 64

- MVD pp. 49–51, 166

Delusion or Awakening

MOVEMENT TWO · §1.3 · THE EPISTEMIC FORK

Delusion or Awakening

The decisive question is not whether jeevan is active, but what its activity takes as the self and what reference points organise attention, desire, thought, resolve, and action.

Delusion

Jeevan identifies with the body. Only four-and-a-half activities stay effective: taste, selection, analysis, visualisation, restricted deliberation — mun under lower-conformance.

Awakening

Jeevan knows itself and coexistence. The same faculties align around justice, dharma, and truth — mun under higher-conformance.

Higher-conformance is inspiration reaching mun from vritti, chitta, buddhi, and atma; lower-conformance is pressure from vitality, senses, body, and habit.

Body-identification

Narrow criteria

Incomplete knowing

Contradiction

The aspiration for happiness remains, while conduct organised by sensation repeatedly fails to secure it. The named failure modes return at slide 31.

JV pp. 72–74 · KD §3.17, p. 147 · MVD p. 208 · AnalyticMadhyasthDarshan.org · 20 / 36

Delusion is incomplete functioning of the knower, not merely missing information. In awakening, reflection reaches enlightenment and realisation; projection is then organised by understanding rather than pleasure, health, and profit as final criteria.

[Sources]

- JV pp. 73, 92–93

- KD §3.17, p. 147

Four Propensities, Five Channels

MOVEMENT TWO · §1.4 · BODILY LIFE

Four Propensities, Five Channels

The base field of humane conduct is bodily. Four propensities are engaged through five modes of contact: the four name which propensity is served, the five name how.

Four vishayas — the propensities

- Eating
- Sleeping
- Protection or defence
- Mating

Five sensory modalities — the channels

- Sound
- Touch
- Visible form
- Taste
- Smell

The propensities operate through these channels. The body retains rather than transcends these needs — the issue is governance, not suppression.

MVD pp. 58, 65 · AnalyticMadhyasthDarshan.org · 21 / 36

Correct the common misreading here. The four vishayas — eating, sleeping, protection or defence, and mating — name which bodily propensity is being served. The five sensory modalities name the mode of contact through which it is engaged. They are not two parallel lists: the propensities operate through the modalities. These characterise animal living, and the human body retains rather than transcends the need for nourishment, rest, protection, and continuity. Eating can be pleasant, health-supporting, and affordable while also being chosen with regard to justice, ecology, family need, and right use. The issue is governance, not suppression of bodily life.

[Sources]

- The Epistemology of Coexistence, §1.4

- MVD pp. 58, 65

Social Motives Need Humane Direction

MOVEMENT TWO · §1.4 · SAMADHAN AND THE THREE ESHANAS

Social Motives Need Humane Direction

Resolution and the three eshanas form the next field, whose satisfaction is intellectual — longer than sensory, short of realisation. Samadhan orients the motives into fields of responsibility.

Progeny motive

Directed toward familial continuity, relationship, education in humaneness, and preparation of the next generation for responsible participation.

Wealth motive

Directed toward production, prosperity, right use, protection of resources, and material sufficiency rather than accumulation without limit.

Reputation motive

Directed toward accountable public participation and contribution to an undivided society rather than status or applause as an end.

Hoarding is not mature vitteshana, nor fame-seeking mature lokeshana. · MVD pp. 64–65, 303 · AnalyticMadhyasthDarshan.org · 22 / 36

The three eshanas are not simply condemned. Knowledge, wisdom, and science redirect progeny, wealth, and public recognition toward education, prosperity and right use, and accountable social participation.

[Sources]

- MVD pp. 50, 169, 303

Beneficence Must Increase Capability

MOVEMENT TWO · §1.4 · UPAKAR

Beneficence Must Increase Capability

Help and inspiration

MVD defines upakar as help and inspiration for another's prosperity and awakening.

Not a fourth eshana

It is neither an additional social motive nor an ordinary bodily activity, but a higher-human act.

Resolved capacity

It applies capacity already resolved in the giver to another's material sufficiency and understanding.

The test

Help must increase the other's capability and preserve mutuality between both participants.

Creating dependency or exploiting vulnerability defeats the stated ends of upakar.

Upakar is one part of the evidence chain, not the sole proof of knowledge. · MVD p. 73 · AnalyticMadhyasthDarshan.org · 23 / 36

Upakar belongs to a higher-human level, above the bodily propensities and the three eshanas. MVD defines it precisely: help and inspiration for another person's prosperity and awakening. It is not vague charity, not a transactional favour, and not a fourth eshana. It applies capacity the giver has already resolved to another's material sufficiency and understanding. State the test plainly: help that increases the other's capability and preserves mutuality fulfils upakar, while help that creates dependency or exploits vulnerability defeats its stated ends. Note also that upakar is one part of the evidence chain, not by itself proof that the giver understands.

Deliberation Weighs Six Perspectives

MOVEMENT TWO · §1.4 · SIX EVALUATIVE PERSPECTIVES

Deliberation Weighs Six Perspectives

- ❓ **Priya–apriya** — Is it pleasant or unpleasant? A sensory reading, and relative.
- ❓ **Hita–ahita** — Does it nourish or harm? Bodily health, also relative.
- ❓ **Labha–alabha** — Is it gain or loss? Goods, services, exchange, material result.
- ❓ **Nyaya–anyaya** — Is it just? Behaviour within a recognised relationship.
- ❓ **Dharma–adharma** — Does it sustain resolution and orderly participation?
- ❓ **Satya–asatya** — Does understanding accord with realisation in existence?

The first three inform; the last three govern. · MVD pp. 66–67 · AnalyticMadhyasthDarshan.org · 24 / 36

Deliberation is not a single judgment. Six perspectives are compared before an activity is selected. Pleasantness, bodily well-being, and gain report real information, but each is relative to changing conditions: what tastes pleasant may damage the body, and what looks profitable to one family may externalise harm to another or to the natural orders. Justice, dharma, and truth ask whether the relationship is actually fulfilled, whether resolution and orderliness are sustained, and whether the understanding accords with realisation in existence. MVD calls deliberation through nyaya, dharma, and satya balanced, and deliberation through priya, hita, and labha unbalanced. State the point as governance, not suppression: the body still needs nourishment and useful means, but pleasure, health, and profit cannot finally authorise an activity that violates justice or produces contradiction.

Activity Carries Its Own Order

MOVEMENT TWO · §1.4 · LAW, REGULATION, AND BALANCE

Activity Carries Its Own Order

Niyam — law

The way an activity is protected and disciplined, so that it does not destroy what it depends on.

Niyantaran — regulation

Regulation according to that law, not arbitrary external control. Choice stays with the accepted purpose.

Santulan — balance

The complementarity sustained when activity stays regulated in mutuality, fulfilling both parties.

Justice, dharma, truth

The awakened human's understanding and fulfilment of that order in behaviour, thought, and realisation.

MVD's sequence joins the two triads but does not equate them: niyam is not simply nyaya, niyantran not dharma, santulan not satya.

Law, regulation, and balance describe the order; justice, dharma, and truth fulfil it. · MVD pp. 70, 137, 174 · AnalyticMadhyasthDarshan.org · 25 / 36

Knowledge of an activity includes the law that protects it, the regulation that keeps it within that law, and the balance that results. Law becomes humanly evident when an activity protects rather than destroys the relationship it depends on; regulation when choice stays aligned with the accepted purpose; balance when the result is mutually fulfilling rather than advantageous to one party only. Guard the common misreading: MVD gives a continuous sequence from knowledge through law, regulation, and balance to justice, dharma, and truth, but this is a functional progression, not three lexical equations. Niyam does not simply mean nyaya, niyantran does not mean dharma, and santulan does not mean satya. Law, regulation, and balance describe the order of activity; justice, dharma, and truth describe the awakened human fulfilling that order.

How Understanding Becomes Evidence

MOVEMENT THREE · §§1.5–1.6 → §7

How Understanding Becomes Evidence

Understanding is answerable to relationship, result, correction, and transmission — and the darshan's open problems mark where that stops.

Answers · How does error arise? · What counts as evidence?

Evidence, then its limits · AnalyticMadhyasthDarshan.org · 26 / 36

The closing movement does two things. It shows how understanding becomes answerable — through relationship, karma, result, evaluation, and transmission. Then it states plainly where conduct-evidence does not reach, which is the darshan's own §7 rather than an external objection.

- The Epistemology of Coexistence, §§1.5–1.6, §7
- MVD p. 12

The Darshan's Own Evidence Regime

MOVEMENT THREE · §1.6 · THE EVIDENCE CHAIN

The Darshan's Own Evidence Regime

MVD p. 12 states the chain: realisation → evidence → understanding → manifest → resolution, work and behaviour → evidence → awakened tradition → coexistence. Its practical sequence is realisation, behaviour, experiment.

Realisation — the inward term

The knower directly understands coexistence, jeevan, and humane conduct. First-person — but not private immunity from examination.

Behaviour — the relational term

Recognition and fulfilment of values make understanding visible in family and social relationships, where mutual satisfaction can be assessed.

Experiment — the practical term

Work, production, and lived participation expose understanding to material conditions, consequence, and correction — not only controlled procedure.

Awakened tradition — the terminus

The chain closes where it began: evidence becomes awakened tradition, and awakened tradition is coexistence. Understanding must be independently liveable.

First-person, second-person, and public results must all cohere. · MVD p. 12 · AnalyticMadhyasthDarshan.org · 27 / 36

Open the movement with the darshan's own formulation rather than a paraphrase. Read the chain aloud: realisation itself is the ultimate evidence; evidence itself is the understanding or knowledge; understanding itself is manifest; the manifest itself is resolution, work and behaviour; work and behaviour itself is evidence; evidence itself is awakened tradition; awakened tradition itself is coexistence. Its practical sequence is realisation, behaviour, and experiment — and experiment includes productive and lived participation, not only controlled laboratory procedure. This is a broader evidence regime than the natural sciences require: first-person realisation, second-person conveyance, and publicly observable work must all cohere.

Knowing Must Continue to Evaluation

MOVEMENT THREE · §1.5 · FROM UNDERSTANDING TO JUSTICE

Knowing Must Continue to Evaluation

Knowledge becomes effective through knowing and believing, then recognising actual relationships, fulfilling their values with capacity, and evaluating the result. Correct intention alone does not complete conduct.

Understanding

Know what is believed and believe what is known.
Acceptance without understanding is inherited belief;
understanding without acceptance remains ineffectual.

Justice

Recognition, fulfilment, evaluation, and mutual satisfaction
complete the sequence in relationship. Mutual satisfaction
is the outcome, not a fifth jeevan value.

Fulfilment depends on capacity, ability, receptivity, other people, and conditions; evaluation asks what was actually fulfilled and what must be corrected.

MVD pp. 12, 310–311 · JV p. 55 · SB p. 64 · AnalyticMadhyasthDarshan.org · 28 / 36

Make the fifth activity visible: evaluating. Correct intention and recognition are insufficient unless capacity, fulfilment, actual result, and mutuality are examined. Mutual satisfaction is the relational result of justice, not a fifth jeevan value.

- MVD pp. 12, 310–311
- JV p. 55
- SB p. 64

Every Karma Has a Structure

MOVEMENT THREE · §1.5 · KARMA AS AN EPISTEMIC STRUCTURE

Every Karma Has a Structure

Activity together with aspiration is karma. Every intentional action contains a doer, cause, objective, result, and effect. Knowledge therefore becomes answerable to consequence: an intention is not sufficient, and a result cannot be judged without its aim, means, and reach.

*What is sought?
What would count as fulfilment?*

*What is chosen and done?
With what capacity and means?*

*What actually follows?
Does it satisfy the accepted aim?*

Five limbs of karma

Doer — who acts
Cause — the need
Objective — the aim
Result — the fruit
Effect — its wider reach

KD Ch. 1, pp. 1–2 · AnalyticMadhyasthDarshan.org · 29 / 36

Karma joins aspiration, action, result, and effect. Material means, capacity, other people, and environment mediate the result, so intention cannot stand in for evidence.

[Sources]

- KD Ch. 1

- The Epistemology of Coexistence, §1.5

Consequence Returns as Evidence

MOVEMENT THREE · §1.5 · RESULT · EVALUATION · CORRECTION

Consequence Returns as Evidence

Result is not the end of the process. It returns through evaluation: did the relationship, purpose, and value become fulfilled? The answer may confirm understanding or expose where conception, recognition, capacity, or action was incomplete.

*the fruit and effect
of action in context*

*compare result with
relationship and aim*

*corrected acceptance
shapes later projection*

Three evaluation errors

Over-evaluation
Under-evaluation
Mis-evaluation

Each can preserve
contradiction while appearing
certain.

Consequence becomes material for corrected understanding. — MVD pp. 90, 263–264, 290 · KD Ch. 1 · AnalyticMadhyasthDarshan.org · 30 / 36

Evaluation returns consequence to the knower. Over-evaluation, under-evaluation, and mis-evaluation become explicit sites of correction rather than being protected by the original intention.

[Sources]

- MVD pp. 263–264

- KD Ch. 1

Three Failures Block Knowing

MOVEMENT THREE · §§1.5–1.6 · ERROR AND CORRECTION

Three Failures Block Knowing

Error is diagnosed by where the knowing process loses contact with reality, self, relationship, or result. Information and confidence can remain high while the deeper sequence is broken.

Delusion — *bhram*

Jeevan is identified with the body; sensitivity becomes the governing reference, and believing separates from knowing.

Intellectual mystery — *bauddhik rahasya*

Reflection does not reach realisation, or realisation does not project as evidence; the faculties remain misaligned.

False learning is the middle failure: form, property, essential nature, or dharma is not understood as it is, producing doubt, over-evaluation, under-evaluation, and mis-evaluation.

Correction requires renewed attention, action, result, and evaluation — not a stronger assertion of the belief. Slide 20 named the condition; these are its failure modes.

JV p. 93 · MVD pp. 184, 209, 263–264, 317 · AnalyticMadhyasthDarshan.org · 31 / 36

Error can enter at acceptance, recognition, fulfilment, or evaluation. Correction therefore requires renewed attention and changed conduct, not only a revised sentence.

Nearby Epistemic Terms Stay Distinct

MOVEMENT THREE · §1.6 · DIRECT ACCESSIBILITY AND REALISATION

Nearby Epistemic Terms Stay Distinct

Sensory contact

Indriya-sannikarsha is bodily contact through the five senses. It supplies conditions for cognition but is not itself complete knowledge.

Pratyaksha

Direct accessibility is not exhausted by sense–object contact; developed attention can bring form, property, essential nature, and dharma into proximity.

Sakshatkar · bodh

Sakshatkar is chitta's direct recognition or acceptance of meaning; bodh is enlightenment and resolve in buddhi.

Anubhav

Realisation in atma integrates understanding and bears authenticity. It must project as coherent explanation, behaviour, work, and evaluation.

Inference and testimony remain cognitive routes, but sensory contact, pratyaksha, sakshatkar, bodh, and anubhav name different relations and activities.

KD pp. 20–21, §3.17 · MVD pp. 35, 273–301, 317 · AnalyticMadhyasthDarshan.org · 32 / 36

Keep five nearby terms separate. Sensory contact is a bodily condition; pratyaksha is direct accessibility; sakshatkar is meaning-recognition in chitta; bodh is enlightenment in buddhi; and anubhav is realisation in atma.

[Sources]

- KD pp. 20–21, §3.17

- MVD pp. 35, 273–301, 317

Understanding Must Be Conveyable

MOVEMENT THREE · §1.6 · STUDY, TRANSMISSION, AND PUBLIC LEGIBILITY

Understanding Must Be Conveyable

The primary texts do not present one canonical ladder with these exact labels. This pedagogical reconstruction shows a recurrent movement from language toward meaning, enlightenment, realisation, and evidence.

Study

Language and information provide an occasion for definition, comparison, reflection, practice, behaviour, work, and evaluation.

Guidance and tradition

An evidence-bearing teacher helps direct attention; the learner must move beyond repetition and become independently capable of understanding and evidence.

Comprehension is tested by the capacity to convey it. Conveyance requires more than fluency: the learner must explain, live, and evaluate without contradiction.

Transmission matters because knowledge claims to be universally accessible, not a private revelation that must remain ineffable.

MVD pp. 12, 35, 90, 273–301, 317 · JV p. 26 · AnalyticMadhyasthDarshan.org · 33 / 36

Two points. First the caution: the displayed movement is a source-faithful pedagogical reconstruction, not a canonical guaranteed ladder — hearing correct words does not guarantee that any later activity has matured. Second, why transmission is not optional. Knowledge claims to be universally accessible rather than a private revelation that must remain ineffable, so comprehension is tested by the capacity to convey it. Conveyance requires more than fluency: the learner must be able to explain, live, evaluate, and make the understanding available without contradiction.

What Conduct-Evidence Cannot Settle

MOVEMENT THREE · §§7.2, 7.6–7.7 · OPEN PROBLEMS

What Conduct-Evidence Cannot Settle

- 1 **Coherence is not substitution — admirable conduct does not verify a cosmology, and a successful production method does not verify the constitution of jeevan.**
- 2 **Some claims need domain-appropriate tests — physical process, neural causation, and post-death continuity are not settled by relationship or work.**
- 3 **The practical discriminations are still owed — restraint from repression, prosperity from accumulation, beneficence from dependency, stable harmony from temporary affect.**

The framework is strongest when mixed cases and evidential boundaries are stated plainly rather than absorbed into a claim of awakening. · AnalyticMadhyasthDarshan.org · 34 / 36

These are the darshan's own open problems, not an external objection. Conduct-evidence is strongest for claims about resolution, relationship, and humane participation; claims about physical process, neural causation, or post-death continuity require domain-appropriate public tests. The framework still owes a public rule for mixed cases — sound conduct with disputed metaphysics, contemplative certitude with failed prediction, successful production with unjust relationships — and criteria distinguishing restraint from repression, prosperity from accumulation, beneficence from dependency-making, and stable faculty-harmony from temporary positive affect.

The Questions, Answered

WHAT MADHYASTH DARSHAN ESTABLISHES

The Questions, Answered

- ❓ **What is knowledge?** — Realised understanding of coexistence, jeevan, and humane conduct that becomes resolution and guides right participation.
- ❓ **Who is the knower?** — Jeevan, active through the human joint form as seer, doer, enjoyer, evaluator, and communicator.
- ❓ **What is known?** — Coexistence: units, orders, relationships, values, self, bodily conditions, and humane participation.
- ❓ **How does knowing occur?** — Through jeevan's coordinated activities, cognisance regulating sensitivity, disciplined study, and recurrent reflection–projection.
- ❓ **How is error corrected?** — Through renewed attention, action, result, evaluation, practical discrimination, and correction.
- ❓ **What counts as evidence?** — Coherence across realisation, relationship, mutual satisfaction, work, ecological practice, upakar, conveyance, and corrigible tradition.

Knowledge is complete when knower, known, conduct, and the human aspiration for happiness no longer contradict one another. · AnalyticMadhyasthDarshan.org · 35 / 36

Return to all six questions. The answer is not a belief formula: it integrates realised understanding, active selfhood, embodied regulation, conduct, consequence, and corrigible public evidence.

[Sources]

- The Epistemology of Coexistence, §§1 and 8
- MVD; KD; SB; JV

An Awakened Human Tradition

THE CULMINATION · HUMAN GOALS AND JEEVAN VALUES

An Awakened Human Tradition

Knowledge is complete when realisation regulates embodied life and coheres across relationship, work, evaluation, upakar, and transmission.

Resolution

Happiness

Prosperity

Peace

Fearlessness

Contentment

Coexistence

Bliss

The relation is cumulative, not a mechanical one-to-one ladder; every scale must remain coherent with the others. · AnalyticMadhyasthDarshan.org · 36 / 36

Close by pairing the four human goals with the four jeevan values while stating the cumulative caution. Resolution bears happiness; with prosperity comes peace; with fearlessness, contentment; and participation in coexistence bears bliss.
