

The Epistemology of Coexistence

MADHYASTH DARSHAN · CO-EXISTENTIALISM

The Epistemology of Coexistence

Knowledge, resolution, and happiness — understanding evidenced in humane conduct

Based on the revised study (AnalyticMadhyasthDarshan.org)

Primary texts of Shri A. Nagraj — MVD · KD · SB · JV (tr. Rakesh Gupta) · 1 / 33

Open by distinguishing information from realised understanding. The revised deck follows Madhyasth Darshan on its own terms and asks how knowledge becomes resolution, right conduct, and the happiness sought by the human being.

- The Epistemology of Coexistence, §§1.1–1.6
- MVD; KD; SB; JV

The Argument in Three Movements

ORIENTATION

The Argument in Three Movements

1

What knowledge is — realised understanding that gives clear direction in life.

2

How knowing develops — through reflection, understanding, and action.

3

How knowledge is tested — through relationships, results, and responsible participation.

*Knowledge is complete when what we understand and how we live no longer contradict each other. ·
AnalyticMadhyasthDarshan.org · 2 / 33*

Keep this orientation deliberately simple. The first movement asks what knowledge is; the second asks how it develops; the third asks how it is tested in life. The specialised terms and structures are introduced only when the corresponding slides can explain them.

- MVD; KD; SB; JV

The Questions Epistemology Must Answer

FRAMING

The Questions Epistemology Must Answer

- ① What is knowledge? — What makes understanding more than information or belief?
- ② Who is the knower? — What in the human being understands, chooses, and evaluates?
- ③ What is known? — What reality, self, relationship, and conduct must be understood?
- ④ How does knowing develop? — How does experience mature into understanding?
- ⑤ How does error arise? — Why do belief, action, and result sometimes conflict?
- ⑥ What counts as evidence? — How is understanding tested in life?

These questions guide the deck from definition to lived evidence. · AnalyticMadhyasthDarshan.org · 3 / 33

Keep these questions open and accessible. They ask what knowledge is, who knows, what is known, how understanding develops, how error enters, and how knowledge is tested in life. The technical vocabulary appears only when the deck reaches the relevant answer.

- The Epistemology of Coexistence, §§1.1–1.6
- MVD; KD; SB; JV

Knowledge Is Realised in Jeevan

§1.1 · PERVASIVE KNOWLEDGE, REALISATION, AND EVIDENCE

Knowledge Is Realised in Jeevan

Pervasive knowledge

Coexistence of Omnipresence and Nature is itself the knowledge that needs to be known.

Realisation in jeevan

Jeevan is the knower. Atma realises coexistence; through buddhi, this becomes clear understanding.

Resolution and evidence

Realisation makes comprehensive resolution accessible—the why and how of activity become clear. Happiness is harmony within jeevan; justice and mutual satisfaction evidence understanding in relationships.

MVD pp. 11, 35, 115–116, 207–208, 289, 311 · KD pp. 66, 134 · AnalyticMadhyasthDarshan.org · 4 / 33

Pervasive knowledge here names coexistence itself: Omnipresence together with Nature is the knowledge to be known. This does not make Omnipresence a perceiving subject; jeevan is the knower. Atma realises coexistence and buddhi receives both, after which comprehensive samadhan becomes accessible. Samadhan is clarity about the why and how of activity. Happiness, peace, contentment, and bliss are internal harmonies within jeevan. In relationship, justice is evidenced through recognition, value-fulfilment, evaluation, and mutual satisfaction. Conduct is evidence of understanding, not the definition of knowledge itself.

[Sources]

- MVD pp. 11, 35, 115–116, 207–208, 289, 311

- KD pp. 66, 134

What Knowledge Must Include

§1.1 · THREE INSEPARABLE CONTENTS

What Knowledge Must Include

Complete knowledge is threefold. Each content corrects a partial epistemology: reality without the knower is incomplete; self-knowledge without conduct is unproven; conduct without the whole lacks orientation.

Existence as coexistence

Omnipresence and all real units; their form, properties, essential nature, dharma, relationships, and participation in orderliness.

Jeevan

The sentient unit that bears attention, reflection, resolve, enlightenment, realisation, selection, evaluation, and authenticity.

Humane conduct

The right recognition and fulfilment of relationships, made evident as justice, work, behaviour, and participation in universal orderliness.

Knowledge of coexistence, jeevan, and humane conduct form one epistemic field. — KD §3.17 · SB p. 116 · AnalyticMadhyasthDarshan.org · 5 / 33

Complete knowledge has three inseparable contents. Humane conduct is not an ethical add-on after knowledge; it is one of the things that must be understood.

[Sources]

- KD §3.17

- SB p. 116

Knowledge, Knower, and Known

§1.1

Knowledge, Knower, and Known

Knowledge

Realised understanding of coexistence, jeevan, and humane conduct — accepted, evaluated, and capable of guiding action.

Knower

Jeevan is the sentient bearer of knowing; the human being is the embodied participant through whom knowing is spoken, tested, and lived.

Known

Existence as coexistence: units, relationships, values, orderliness, and the conditions in which human aspiration can be fulfilled.

Meaningful evidence

The known becomes meaningful when understanding appears as resolution, prosperity, fearlessness, coexistence, and an awakened tradition.

The roles remain distinct: jeevan knows, coexistence is known, and knowledge is their realised relation made evident in life.

KD §3.17, pp. 145–150 · MVD pp. 84, 115 · JV p. 165 · AnalyticMadhyasthDarshan.org · 6 / 33

Keep the roles distinct: jeevan is the active knower; coexistence is the known; and realised understanding must become meaningful evidence. The human joint form is the embodied site of that evidence.

[Sources]

- The Epistemology of Coexistence, §1.1

- KD §3.17

Three Domains of Knowledge

§1.1 · THE SCOPE OF THE KNOWN

Three Domains of Knowledge

The known is not exhausted by measurable form and property. Madhyasth Darshan distinguishes three connected domains, each with its own objects, capacities, and forms of evidence.

Physical knowledge

Form, property, material composition, production, and skill — knowledge expressed as effective engagement with material nature.

Intellectual knowledge

Meaning, relation, purpose, analysis, evaluation, and proficiency — thought disciplined by what is and what fulfils orderliness.

Coexistential knowledge

Realisation of coexistence, jeevan, and humane conduct — the horizon within which physical and intellectual knowledge find direction.

Skill and scholarship become complete when they serve right relationship and orderliness. — KD pp. 3–4 · AnalyticMadhyasthDarshan.org · 7 / 33

The known spans physical, intellectual, and coexistential domains. Do not turn the distinction into three unrelated realities; they are regions of one coexistential field.

[Sources]

- KD pp. 3–4

- The Epistemology of Coexistence, §1.1

KD Assigns Each Term a Definite Role

§1.1 · SEEING AND ATTENTION

KD Assigns Each Term a Definite Role

Darshan — seeing

The content is justice, dharma, and truth. Darshan here is meaningful seeing or exposition, not a free-floating personal viewpoint.

Drish — the seeing jeevan

Human jeevan is the active locus of seeing: the knower capable of attention, understanding, evaluation, and evidence.

Drishya — the seen

Coexistence is the field made directly meaningful: real units, relationships, values, and participation in orderliness.

Dhyan · dhyata · dhyeya

Awakening; the human attender; and freedom from delusion together with jeevan values and evidence of the human goal.

These are source assignments, not a generic subject–object vocabulary. Perspective remains answerable to awakened seeing of coexistence.

KD §3.17, pp. 145–150 · MVD p. 84 · AnalyticMadhyasthDarshan.org · 8 / 33

Correct the earlier generic triads. KD assigns darshan to justice, dharma, and truth; drish to human jeevan; and drishya to coexistence. Dhyan, dhyata, and dhyeya then specify awakening, the human attender, and freedom from delusion with evidence of the goals.

[Sources]

- KD §3.17, pp. 145–150

- MVD p. 84

Cause–Doer–Effect Operates at Two Levels

§1.1 · CAUSE, DOER, EFFECT, AND SEEKING

Cause–Doer–Effect Operates at Two Levels

Epistemic level

Karan is the knowledge-state, karta the human being, and karya wholeness or universal participation made evident in living.

Existential level

Coexistence is the ever-present cause, jeevan the doer, and human, deific, or divine status the effect according to awakening.

Sadhya — the aim

Awakening and established seer-status: freedom from delusion and capacity to understand, evaluate, and participate.

Sadhak · sadhan

The human being is the seeker; body together with jeevan is the means, supported by imagination, freedom of action, and tradition.

Action must be read with its level specified: ontological cause, epistemic state, human agency, means, result, and wider participation are related without being collapsed.

KD §3.17, pp. 145–150 · *AnalyticMadhyasthDarshan.org* · 9 / 33

Specify the level whenever using cause, doer, and effect. The compact epistemic assignment and the broader existential assignment are related but not interchangeable; seeking adds aim, seeker, and means.

[Sources]

- KD §3.17, pp. 145–150

Seer, Doer, and Enjoyer

§1.1 · SEER · DOER · ENJOYER

Seer, Doer, and Enjoyer

The awakened human is seer, doer, and enjoyer in one joint form. Seer-status establishes understanding; doing places it in action; enjoyer-status names the experienced fruit or fruition of action.

*goal: realised seeing
coexistence and relationship
known*

*goal: authentic conduct
work and behaviour aligned*

*receives fruition; in awakened
conduct this supports mutual
satisfaction*

One human joint form

*The seer does not withdraw
from action.*

*The doer is guided by
understanding.*

*The enjoyer receives the result
and evaluates its fit with the
accepted aim.*

Understanding establishes seer-status; embodied activity evidences the doer; experienced result evidences the enjoyer. Mutual satisfaction is one humane result, not the definition of enjoyer-status.

KD §3.18 · AnalyticMadhyasthDarshan.org · 10 / 33

Seer here means established awakened seer-status, not the drish term from the earlier triad. Understanding, embodied doing, and experienced result belong together without collapsing one into another.

[Sources]

- KD §3.18

Knowledge, Wisdom, and Science Have Distinct Work

§1.2 · GYAN · VIVEK · VIGYAN

Knowledge, Wisdom, and Science Have Distinct Work

Complete understanding must establish what is real, identify the humane goal, and determine practicable direction. The three terms are joined, but not interchangeable.

Gyan — knowledge

Realised understanding of coexistence, jeevan, and humane conduct: what is, who knows, and what right participation requires.

Vivek — wisdom

Knowledge by which the human goal — resolution, prosperity, fearlessness, and coexistence — is recognised and sensory or social motives are discriminated.

Vigyan — science

Directional knowledge for material prosperity together with the human and jeevan goals, including the law and process of activity and thought.

Gyan establishes reality; vivek recognises the goal; vigyan gives reliable direction for accomplishment. — MVD pp. 170, 208–209 · AnalyticMadhyasthDarshan.org · 11 / 33

Gyan, vivek, and vigyan answer different questions. Knowledge establishes reality, wisdom recognises the humane goal, and science gives reliable direction for material prosperity together with human and jeevan goals.

[Sources]

- MVD p. 169

- MVD pp. 208–209

Reflection Coordinates Five Activity Pairs

§1.3 · THE ACTIVE KNOWER

Reflection Coordinates Five Activity Pairs

The ten activities are five coordinated pairs in jeevan. In reflection, sensation, behaviour, thought, desire, and resolve are examined until enlightenment and realisation become effective.

Jeevan — five loci

- Atma — realisation and authenticity
- Buddhi — enlightenment and resolve
- Chitta — contemplation and visualisation
- Vritti — deliberation and analysis
- Mun — taste and selection

Reflection — knowing moves inward

- Mun and vritti attend to experience. Chitta forms meaning, buddhi resolves, and atma realises. Higher activities orient and integrate those below without becoming separate minds.

“Inward” is a teaching description of coordinated activity; the canonical taxonomy is the five loci and their ten activities.

JV pp. 92–93 · KD §§3.12, 3.17 · MVD pp. 78, 83–84 · AnalyticMadhyasthDarshan.org · 12 / 33

Reflection is the knowing direction of jeevan's activity. It matures sensory and practical material through contemplation, enlightenment, and realisation rather than stopping at intake.

[Sources]

- KD §§3.12, 3.16–3.17

- JV pp. 92–93

Projection Carries Understanding Outward

§1.3 · THE ACTIVE KNOWER

Projection Carries Understanding Outward

Projection is the evidencing direction of the same ten activities. Realisation and resolve become visualisation, analysis, selection, bodily action, work, behaviour, and communication.

Jeevan — projected strengths

- Atma — authenticity
- Buddhi — resolve
- Chitta — visualisation
- Vritti — analysis
- Mun — selection

Human joint form — lived expression

- Jeevan supplies meaning and direction. Brain, senses, speech, movement, and social participation place the projection in a shared world where result can be evaluated.

Reflection and projection are recurrent directions of one active jeevan; neither is complete when isolated from the other.

JV pp. 92–93 · KD §§3.12, 3.16–3.17 · AnalyticMadhyasthDarshan.org · 13 / 33

Projection is the evidencing direction. Realisation and resolve take form as visualisation, analysis, selection, bodily action, work, behaviour, and communication.

[Sources]

- KD §§3.12, 3.16–3.17

- JV pp. 92–93

Knowing and Doing Form a Recurrent Cycle

§1.3 · PROJECTION–REFLECTION

Knowing and Doing Form a Recurrent Cycle

This four-step diagram is a pedagogical synthesis of the textual account: attention and reflection deepen knowing; realisation and projection place it back into action and result.

Inward movement

Experience and consequence return to jeevan through attention and reflection until meaning becomes clear and resolvable.

Outward evidence

Realisation projects as selection, action, behaviour, work, communication, and evaluation in the human joint form.

Each coherent cycle can deepen the next; reflection without projection remains unevidenced, while projection without reflection repeats habit.

Result and evaluation return the projected action to renewed attention.

KD §3.12, pp. 110–113 · MVD p. 290 · JV pp. 92–93 · AnalyticMadhyasthDarshan.org · 14 / 33

Emphasise recurrence, not a one-way pipeline. Result and evaluation return material for renewed reflection, while projection makes understanding answerable to consequence.

[Sources]

- KD §§3.12, 3.16–3.17

- The Epistemology of Coexistence, §1.3

Jeevan Knows; the Body Mediates

§1.3 · THE HUMAN JOINT FORM

Jeevan Knows; the Body Mediates

Knowing belongs to jeevan, but human evidence requires the joint form. The body supplies sensory access, brain-mediated signalling, speech, movement, work, and participation with others.

Jeevan — sentient bearer

- Realisation, enlightenment, contemplation, deliberation, selection
- Evaluation of relationship and value
- Continuity of the knower across bodily change

Human joint form — lived evidence

- Brain and senses carry signals and bodily conditions
- Speech and action place understanding in a shared world
- Work, behaviour, and teaching make claims answerable to result

The texts specify a functional relation between jeevan and the brain; a more precise account of their interaction remains an open task within the exposition.

MVD pp. 83–84, 200 · KD §3.16 · JV p. 59 · AnalyticMadhyasthDarshan.org · 15 / 33

The body is the necessary instrument of evidence, but the texts place knowing and evaluation in jeevan. The slide states the primary-text claim and does not pretend to supply a modern neurophysical mechanism.

[Sources]

- MVD pp. 83–84, 200

- JV pp. 59, 139

Delusion or Awakening

§§1.3, 1.5 · THE EPISTEMIC FORK

Delusion or Awakening

The decisive question is not whether jeevan is active, but what its activity takes as the self and what reference points organise attention, desire, thought, resolve, and action.

Delusion

Jeevan identifies with the body. Only four-and-a-half activities become effective: taste, selection, analysis, visualisation, and restricted deliberation governed by sensation, health, and profit.

Awakening

Jeevan knows itself and coexistence. The same faculties align around justice, dharma, truth, resolution, and fulfilment of relationship.

The faculties do not disappear in awakening; their direction and coordination change. Error is incomplete functioning of the knower, not mere absence of data.

Body-identification

Narrow criteria

Incomplete knowing

Contradiction

The aspiration for happiness remains, while conduct organised by sensation repeatedly fails to secure it.

JV pp. 72–73, 92–93 · KD §3.17 · MVD pp. 263–264 · AnalyticMadhyasthDarshan.org · 16 / 33

Delusion is incomplete functioning of the knower, not merely missing information. In awakening, reflection reaches enlightenment and realisation; projection is then organised by understanding rather than pleasure, health, and profit as final criteria.

[Sources]

- JV pp. 73, 92–93

- KD §3.17, p. 147

Cognisance Regulates Sensitivity

§§1.3–1.4 · COGNISANCE, SENSITIVITY, AND BODILY LIFE

Cognisance Regulates Sensitivity

Cognisance

Knowing and believing in jeevan; it provides direction by understanding relationship, value, purpose, and orderliness.

Sensitivity

Embodied responsiveness through the senses. It supplies contact and capacity for action, but not fulfilment by itself.

Five sensory channels

Sound, touch, sight, taste, and smell are the body's channels of contact with the world.

Four vishayas

Eating, sleeping, defending, and mating are necessary bodily activities regulated for nourishment, protection, and continuity.

Cognisance gives direction; sensitivity provides embodied means. Their balance supports right recognition and fulfilment.

KD pp. 66–67 · SB p. 64 · MVD pp. 49–51, 166 · AnalyticMadhyasthDarshan.org · 17 / 33

Cognisance is jeevan's knowing-and-believing capacity, while sensitivity is embodied responsiveness. Sound, touch, sight, taste, and smell are the channels of sensitivity, and the four vishayas are necessary bodily activities. Recognition and fulfilment arise through the balance of cognisance and sensitivity, not through sensitivity alone.

[Sources]

- KD pp. 66–67
- SB p. 64
- MVD pp. 49–51, 165

Social Motives Need Humane Direction

§1.4 · THREE ESHANAS

Social Motives Need Humane Direction

The progeny, wealth, and public-recognition motives are not eliminated. Under knowledge they become fields of responsibility; under delusion they become possessiveness, hoarding, and fame-seeking.

Progeny motive

Directed toward familial continuity, relationship, education in humaneness, and preparation of the next generation for responsible participation.

Wealth motive

Directed toward production, prosperity, right use, protection of resources, and material sufficiency rather than accumulation without limit.

Reputation motive

Directed toward accountable public participation and contribution to an undivided society rather than status or applause as an end.

Vivek identifies the humane goal; vigyan supplies practicable direction for these motives. — MVD pp. 50, 170, 303 · AnalyticMadhyasthDarshan.org · 18 / 33

The three eshanas are not simply condemned. Knowledge, wisdom, and science redirect progeny, wealth, and public recognition toward education, prosperity and right use, and accountable social participation.

[Sources]

- MVD pp. 50, 169, 303

Beneficence Must Increase Capability

§1.4 · UPAKAR

Beneficence Must Increase Capability

Help and inspiration

MVD defines upakar as help and inspiration for another's prosperity and awakening.

Not a fourth eshana

It is neither an additional social motive nor an ordinary bodily activity, but a higher-human act.

Resolved capacity

It applies capacity already resolved in the giver to another's material sufficiency and understanding.

The test

Help must increase the other's capability and preserve mutuality between both participants.

Creating dependency or exploiting vulnerability defeats the stated ends of upakar.

Upakar is one part of the evidence chain, not the sole proof of knowledge. · MVD p. 73 · AnalyticMadhyasthDarshan.org · 19 / 33

Upakar belongs to a higher-human level, above the bodily propensities and the three eshanas. MVD defines it precisely: help and inspiration for another person's prosperity and awakening. It is not vague charity, not a transactional favour, and not a fourth eshana. It applies capacity the giver has already resolved to another's material sufficiency and understanding. State the test plainly: help that increases the other's capability and preserves mutuality fulfils upakar, while help that creates dependency or exploits vulnerability defeats its stated ends. Note also that upakar is one part of the evidence chain, not by itself proof that the giver understands.

Deliberation Weighs Six Perspectives

§1.4 · SIX EVALUATIVE PERSPECTIVES

Deliberation Weighs Six Perspectives

- ❓ **Priya–apriya** — Is it pleasant or unpleasant? A sensory reading, and relative.
- ❓ **Hita–ahita** — Does it nourish or harm? Bodily health, also relative.
- ❓ **Labha–alabha** — Is it gain or loss? Goods, services, exchange, material result.
- ❓ **Nyaya–anyaya** — Is it just? Behaviour within a recognised relationship.
- ❓ **Dharma–adharma** — Does it sustain resolution and orderly participation?
- ❓ **Satya–asatya** — Does understanding accord with realisation in existence?

The first three inform; the last three govern. · MVD pp. 66–67 · AnalyticMadhyasthDarshan.org · 20 / 33

Deliberation is not a single judgment. Six perspectives are compared before an activity is selected. Pleasantness, bodily well-being, and gain report real information, but each is relative to changing conditions: what tastes pleasant may damage the body, and what looks profitable to one family may externalise harm to another or to the natural orders. Justice, dharma, and truth ask whether the relationship is actually fulfilled, whether resolution and orderliness are sustained, and whether the understanding accords with realisation in existence. MVD calls deliberation through nyaya, dharma, and satya balanced, and deliberation through priya, hita, and labha unbalanced. State the point as governance, not suppression: the body still needs nourishment and useful means, but pleasure, health, and profit cannot finally authorise an activity that violates justice or produces contradiction.

Activity Carries Its Own Order

§1.4 · LAW, REGULATION, AND BALANCE

Activity Carries Its Own Order

Niyam — law

The way an activity is protected and disciplined, so that it does not destroy what it depends on.

Niyantran — regulation

Regulation according to that law, not arbitrary external control. Choice stays with the accepted purpose.

Santulan — balance

The complementarity sustained when activity stays regulated in mutuality, fulfilling both parties.

Justice, dharma, truth

The awakened human's understanding and fulfilment of that order in behaviour, thought, and realisation.

MVD's sequence joins the two triads but does not equate them: niyam is not simply nyaya, niyantran not dharma, santulan not satya.

Law, regulation, and balance describe the order; justice, dharma, and truth fulfil it. · MVD pp. 70, 137, 174 · AnalyticMadhyasthDarshan.org · 21 / 33

Knowledge of an activity includes the law that protects it, the regulation that keeps it within that law, and the balance that results. Law becomes humanly evident when an activity protects rather than destroys the relationship it depends on; regulation when choice stays aligned with the accepted purpose; balance when the result is mutually fulfilling rather than advantageous to one party only. Guard the common misreading: MVD gives a continuous sequence from knowledge through law, regulation, and balance to justice, dharma, and truth, but this is a functional progression, not three lexical equations. Niyam does not simply mean nyaya, niyantran does not mean dharma, and santulan does not mean satya. Law, regulation, and balance describe the order of activity; justice, dharma, and truth describe the awakened human fulfilling that order.

Knowing Must Continue Through Evaluation

§1.5 · FROM UNDERSTANDING TO JUSTICE

Knowing Must Continue Through Evaluation

Knowledge becomes effective through knowing and believing, then recognising actual relationships, fulfilling their values with capacity, and evaluating the result. Correct intention alone does not complete conduct.

Understanding

Know what is believed and believe what is known.
Acceptance without understanding is inherited belief;
understanding without acceptance remains ineffectual.

Justice

Recognition, fulfilment, evaluation, and mutual satisfaction
complete the sequence in relationship. Mutual satisfaction
is the outcome, not a fifth jeevan value.

Fulfilment depends on capacity, ability, receptivity, other people, and conditions; evaluation asks what was actually fulfilled and what must be corrected.

MVD pp. 12, 310–311 · JV p. 55 · SB p. 64 · AnalyticMadhyasthDarshan.org · 22 / 33

Make the fifth activity visible: evaluating. Correct intention and recognition are insufficient unless capacity, fulfilment, actual result, and mutuality are examined. Mutual satisfaction is the relational result of justice, not a fifth jeevan value.

[Sources]

- MVD pp. 12, 310–311
- JV p. 55
- SB p. 64

Every Karma Has a Structure

§1.5 · KARMA AS AN EPISTEMIC STRUCTURE

Every Karma Has a Structure

Activity together with aspiration is karma. Every intentional action contains a doer, cause, objective, result, and effect. Knowledge therefore becomes answerable to consequence: an intention is not sufficient, and a result cannot be judged without its aim, means, and reach.

*What is sought?
What would count as fulfilment?*

*What is chosen and done?
With what capacity and means?*

*What actually follows?
Does it satisfy the accepted aim?*

Five limbs of karma

Doer — who acts
Cause — the need
Objective — the aim
Result — the fruit
Effect — its wider reach

KD Ch. 1, pp. 1–2 · AnalyticMadhyasthDarshan.org · 23 / 33

Karma joins aspiration, action, result, and effect. Material means, capacity, other people, and environment mediate the result, so intention cannot stand in for evidence.

[Sources]

- KD Ch. 1

- The Epistemology of Coexistence, §1.5

Consequence Returns as Evidence

§1.5 · RESULT · EVALUATION · CORRECTION

Consequence Returns as Evidence

Result is not the end of the process. It returns through evaluation: did the relationship, purpose, and value become fulfilled? The answer may confirm understanding or expose where conception, recognition, capacity, or action was incomplete.

*the fruit and effect
of action in context*

*compare result with
relationship and aim*

*corrected acceptance
shapes later projection*

Three evaluation errors

Over-evaluation
Under-evaluation
Mis-evaluation

Each can preserve
contradiction while appearing
certain.

Consequence becomes material for corrected understanding. — MVD pp. 90, 263–264, 290 · KD Ch. 1 · AnalyticMadhyasthDarshan.org · 24 / 33

Evaluation returns consequence to the knower. Over-evaluation, under-evaluation, and mis-evaluation become explicit sites of correction rather than being protected by the original intention.

[Sources]

- MVD pp. 263–264

- KD Ch. 1

The Human Being Seeks Happiness

§§1.2, 1.5 · HUMAN DHARMA AND JEEVAN VALUES

The Human Being Seeks Happiness

Happiness

Harmony between mun and vritti: selection and deliberation no longer contradict the understood purpose.

Peace

Harmony between vritti and chitta: deliberation and meaning-bearing contemplation are mutually coherent.

Contentment

Harmony between chitta and buddhi: contemplation and enlightened resolve are mutually coherent.

Bliss

Harmony between buddhi and atma: resolve and realisation are mutually coherent in awakened jeevan.

Just conduct yields mutual satisfaction in relationship and supports happiness, peace, contentment, and bliss within jeevan. Correct intent alone is insufficient; fulfilment and evaluation must confirm it.

MVD pp. 207–208, 253–254 · JV p. 138 · KD p. 112 · AnalyticMadhyasthDarshan.org · 25 / 33

Distinguish the relational and internal outcomes. Justice yields mutual satisfaction between participants; happiness, peace, contentment, and bliss are harmonies within jeevan. Correct intention is necessary, but competent fulfilment and evaluation must confirm the result.

[Sources]

- MVD pp. 207–208, 253–254, 310–311

- JV pp. 55, 138

- KD p. 112

Knowledge Must Become Publicly Legible

§1.6 · THE EVIDENCE REGIME

Knowledge Must Become Publicly Legible

Realisation is first-person, but not private immunity from examination. Knowledge must become encounterable through relationship, productive and ecological practice, evaluation, upakar, and independent transmission.

Realisation — first-person

The knower directly understands coexistence, jeevan, and humane conduct; authenticity is the capacity to bear and evidence that understanding.

Behaviour — relational

Recognition and fulfilment of values make understanding visible in family and social relationships, where mutual satisfaction can be assessed.

Experiment — practical

Work and productive participation expose understanding to material conditions, consequences, repeatability, and correction.

Upakar and transmission — social

Help and inspiration for prosperity and awakening should increase another's sufficiency and capacity without dependency. Understanding must then be independently liveable and conveyable.

MVD pp. 12, 72 · SB pp. 44, 111, 121, 149 · JV p. 26 · AnalyticMadhyasthDarshan.org · 26 / 33

Realisation must become publicly legible. Add upakar carefully: it is help and inspiration for prosperity and awakening that increases capability without dependency, and it is one part of the evidence chain rather than the sole proof.

[Sources]

- MVD pp. 12, 72
- SB pp. 44, 111, 121, 149
- JV p. 26

Nearby Epistemic Terms Must Remain Distinct

§1.6 · DIRECT ACCESSIBILITY AND REALISATION

Nearby Epistemic Terms Must Remain Distinct

Sensory contact

Indriya-sannikarsha is bodily contact through the five senses. It supplies conditions for cognition but is not itself complete knowledge.

Pratyaksha

Direct accessibility is not exhausted by sense-object contact; developed attention can bring form, property, essential nature, and dharma into proximity.

Sakshatkar · bodh

Sakshatkar is chitta's direct recognition or acceptance of meaning; bodh is enlightenment and resolve in buddhi.

Anubhav

Realisation in atma integrates understanding and bears authenticity. It must project as coherent explanation, behaviour, work, and evaluation.

Inference and testimony remain cognitive routes, but sensory contact, pratyaksha, sakshatkar, bodh, and anubhav name different relations and activities.

KD pp. 20–21, §3.17 · MVD pp. 35, 273–301, 317 · AnalyticMadhyasthDarshan.org · 27 / 33

Keep five nearby terms separate. Sensory contact is a bodily condition; pratyaksha is direct accessibility; sakshatkar is meaning-recognition in chitta; bodh is enlightenment in buddhi; and anubhav is realisation in atma.

A Source-Faithful Learning Movement

§1.6 · STUDY AND TRANSMISSION

A Source-Faithful Learning Movement

The primary texts do not present one canonical ladder with these exact labels. This pedagogical reconstruction shows a recurrent movement from language toward meaning, enlightenment, realisation, and evidence.

Study

Language and information provide an occasion for definition, comparison, reflection, practice, behaviour, work, and evaluation.

Guidance and tradition

An evidence-bearing teacher helps direct attention; the learner must move beyond repetition and become independently capable of understanding and evidence.

Result and evaluation return material for further reflection. Hearing correct words does not guarantee that any subsequent activity has matured.

Pedagogical reconstruction — recurrent, not an automatic or canonical one-way pipeline.

MVD pp. 12, 35, 90, 273–301, 317 · KD §3.17 · JV p. 26 · AnalyticMadhyasthDarshan.org · 28 / 33

State the caution aloud: the displayed movement is a source-faithful pedagogical reconstruction, not a canonical guaranteed ladder. Information occasions study; result and evaluation make the movement recurrent.

Three Failures Block Knowing

§§1.5–1.6 · ERROR AND CORRECTION

Three Failures Block Knowing

Error is diagnosed by where the knowing process loses contact with reality, self, relationship, or result. Information and confidence can remain high while the deeper sequence is broken.

Delusion — bhram

Jeevan is identified with the body; sensitivity becomes the governing reference, and believing separates from knowing.

Intellectual mystery — bauddhik rahasya

Reflection does not reach realisation, or realisation does not project as evidence; the faculties remain misaligned.

False learning is the middle failure: form, property, essential nature, or dharma is not understood as it is, producing doubt, over-evaluation, under-evaluation, and mis-evaluation.

Correction requires renewed attention, reflection, action, result, and evaluation — not a stronger assertion of the original belief.

JV p. 93 · MVD pp. 184, 209, 263–264, 273–301, 317 · AnalyticMadhyasthDarshan.org · 29 / 33

Error can enter at acceptance, recognition, fulfilment, or evaluation. Correction therefore requires renewed attention and changed conduct, not only a revised sentence.

Coherence Without Merger

§1.1 · COMPLETION OF THE TRIAD

Coherence Without Merger

At realisation, the triad is completed without erasing its terms. Coexistence remains real, jeevan remains a distinct active knower, and knowledge is the realised relation that becomes wisdom, science, and humane conduct.

Knowledge — realised relation

Understanding joins what exists, who understands it, and how that understanding must guide evaluation and participation.

Knower — distinct jeevan

Jeevan bears realisation and authenticity; the human joint form makes these capacities communicable and answerable to consequence.

Known — real coexistence

Omnipresence, units, orders, relationships, values, and humane conduct remain the real field of knowing; they are not dissolved by understanding.

Meaning — awakened living

The known becomes meaningful as resolution in the person, prosperity in the family, fearlessness in society, and coexistence in universal orderliness.

Coherence of roles does not mean identity of knower and known. — KD §3.17 · MVD pp. 14–15, 115–116 · SB p. 81 · AnalyticMadhyasthDarshan.org · 30 / 33

The triad completes only when knowledge, knower, and known become mutually coherent without merger. Madhyasth Darshan retains real plurality inside coexistence.

Practical Discriminations and Evidential Limits

EPISTEMIC DISCIPLINE

Practical Discriminations and Evidential Limits

1

Test right use — do bodily and material practices support health, proportion, prosperity, and ecological complementarity without repression or accumulation?

2

Test capability and mutuality — does help increase independence and capacity, and does value-fulfilment satisfy both participants?

3

Stable harmony is not temporary affect — correct intent can meet incapacity, scarcity, refusal, illness, or conflict; ontology, conduct, and self-report therefore need independent checks.

The framework is strongest when difficult cases, mixed results, and evidential boundaries are stated plainly rather than absorbed into a claim of awakening. · AnalyticMadhyasthDarshan.org · 31 / 33

Present these as tests rather than repeated definitions. Right use should be distinguishable from repression or accumulation; upakar should increase capability and independence; value-fulfilment should be assessable in mutuality; and stable harmony should be distinguishable from temporary affect.

The Questions, Answered

WHAT MADHYASTH DARSHAN ESTABLISHES

The Questions, Answered

- ❓ **What is knowledge?** — Realised understanding of coexistence, jeevan, and humane conduct that becomes resolution and guides right participation.
- ❓ **Who is the knower?** — Jeevan, active through the human joint form as seer, doer, enjoyer, evaluator, and communicator.
- ❓ **What is known?** — Coexistence: units, orders, relationships, values, self, bodily conditions, and humane participation.
- ❓ **How does knowing occur?** — Through jeevan's coordinated activities, cognisance regulating sensitivity, disciplined study, and recurrent reflection–projection.
- ❓ **How is error corrected?** — Through renewed attention, action, result, evaluation, practical discrimination, and correction.
- ❓ **What counts as evidence?** — Coherence across realisation, relationship, mutual satisfaction, work, ecological practice, upakar, conveyance, and corrigible tradition.

Knowledge is complete when knower, known, conduct, and the human aspiration for happiness no longer contradict one another. · AnalyticMadhyasthDarshan.org · 32 / 33

Return to all six questions. The answer is not a belief formula: it integrates realised understanding, active selfhood, embodied regulation, conduct, consequence, and corrigible public evidence.

- The Epistemology of Coexistence, §§1 and 8
- MVD; KD; SB; JV

An Awakened Human Tradition

THE CULMINATION · HUMAN GOALS AND JEEVAN VALUES

An Awakened Human Tradition

Knowledge is complete when realisation regulates embodied life and coheres across relationship, work, evaluation, upakar, and transmission.

Resolution

Happiness

Prosperity

Peace

Fearlessness

Contentment

Coexistence

Bliss

The relation is cumulative, not a mechanical one-to-one ladder; every scale must remain coherent with the others. · AnalyticMadhyasthDarshan.org · 33 / 33

Close by pairing the four human goals with the four jeevan values while stating the cumulative caution. Resolution bears happiness; with prosperity comes peace; with fearlessness, contentment; and participation in coexistence bears bliss.
