

The Epistemology of Coexistence

MADHYASTH DARSHAN · CO-EXISTENTIALISM

The Epistemology of Coexistence

What must be known, how decisions are governed, and how understanding becomes humane conduct

Based on the revised study (AnalyticMadhyasthDarshan.org)

Primary texts of Shri A. Nagraj — MVD · KD · SB · JV (tr. Rakesh Gupta) · 1 / 26

This deck presents the Madhyasth Darshan account in the revised order of the study: ground and content, human need, the active knower, practical governance, and evidence. The central question is not only “What is knowledge?” but “What must a human know so that freedom of action becomes orderly participation?”

[Sources]

Study §§1.1–1.5

MVD; KD; SB; JV

Five Parts in Three Movements

ORIENTATION

Five Parts in Three Movements

1

Parts 1–2 — define knowledge, knower, and known; then explain why freedom of action needs direction.

2

Parts 3–4 — examine jeevan and bodily mediation; then govern activity, decision, and orderliness.

3

Part 5 — test understanding through result, correction, upakar, and transmission.

Definition → need → knower → orderliness → evidence. · AnalyticMadhyasthDarshan.org · 2 / 26

Use this slide as the map. The first part defines knowledge, knower, and known. The second explains why knowledge is needed. The third examines jeevan and bodily mediation. The fourth makes knowledge operational across activity and decision. The fifth asks how claims are evidenced, corrected, and transmitted.

[Sources]

Study §§1.1–1.5

The Questions This Account Must Answer

FRAMING

The Questions This Account Must Answer

- ❓ What is knowledge? — What is its ground and canonical content?
- ❓ Who knows? — What is jeevan's role, and how does the body mediate?
- ❓ Why is knowledge needed? — What directs imagination and freedom of action?
- ❓ What activities must be governed? — Bodily, sensory, social, and higher-human.
- ❓ How are decisions made? — Which perspectives, laws, regulation, and balance apply?
- ❓ What counts as evidence? — How do result, correction, and transmission test a claim?

These questions organise §§1.1–1.5 of the revised study. · AnalyticMadhyasthDarshan.org · 3 / 26

These questions prevent the account from becoming a catalogue of Sanskrit terms. Each later slide should answer one of them: ontology and content, the knower, the purpose of knowledge, practical governance, or evidence and correction.

[Sources]

Study introduction and §§1.1–1.5

The Ground Is Knowledge; Jeevan Knows

§1.1 · KNOWLEDGE, KNOWER, AND KNOWN

The Ground Is Knowledge; Jeevan Knows

The omnipresent ground

MVD identifies Space or the omnipresent ground as Knowledge: actionless and non-transforming, yet the ground in which units act.

Order evident in coexistence

Law, regulation, balance, justice, dharma, and truth are evident within coexistence. This does not make every unit a thinker.

Realisation and evidence

Jeevan is the knower. Realisation brings the why and how of activity into resolution; humane conduct makes that understanding answerable in life.

MVD pp. 11, 32–35, 115–116 · KD §3.17 · 4 / 26

MVD uses gyan in a wider ontological register. Space, the omnipresent ground, is identified as Knowledge and as actionless. Units act within coexistence; Space does not become a universal thinking subject. Jeevan is the knower that realises this orderly field and can evidence understanding in humane conduct.

[Sources]

MVD pp. 11, 32–35, 115–116

KD §3.17

What Knowledge Must Make Operable

§1.1 · THE CONTENT OF KNOWLEDGE

What Knowledge Must Make Operable

The canonical content is coexistence, jeevan, and humane conduct. In practice, that understanding must guide activities, comparisons, and the order by which action remains mutually fulfilling.

Canonical content

Existence as coexistence; jeevan as the active knower; humane conduct as right recognition and fulfilment.

Fields of activity

Four vishayas; five sensory modalities; samadhan with three eshanas; upakar as higher-human help.

Decision and order

Six evaluative perspectives; niyam, niyantran, santulan; action, result, evaluation, and correction.

Knowledge has content when it can orient actual activity — MVD pp. 58, 64–73, 137, 174 · AnalyticMadhyasthDarshan.org · 5 / 26

This is the content model that organises the revised section. The canonical threefold content is coexistence, jeevan, and humane conduct. The practical fields then ask what activities occur, what comparisons should govern a decision, and what law, regulation, and balance keep the action within universal orderliness.

[Sources]

Study §§1.1 and 1.4

MVD pp. 58, 64–73, 137, 174

Knowledge, Knower, and Known

§1.1

Knowledge, Knower, and Known

Knowledge

Realised understanding of coexistence, jeevan, and humane conduct that can guide evaluation and participation.

Knower

Jeevan is the sentient bearer of knowing; the human joint form makes understanding speakable, actionable, and testable.

Known

Coexistence: Space, units, orders, relationships, values, bodily conditions, and humane participation.

Evidence

Resolution, relationship, work, result, correction, upakar, and independent transmission make the claim answerable.

The roles remain distinct: jeevan knows, coexistence is known, and knowledge is the realised relation made effective in life.

Knowledge is completed through lived coherence — KD §3.17 · MVD pp. 84, 115–116 · JV p. 165 · AnalyticMadhyasthDarshan.org · 6 / 26

Keep the three roles distinct. Jeevan is the knower. Coexistence is the known, including relationships and humane participation. Knowledge is the realised relation that can guide activity and remain answerable to result. Evidence is therefore not an optional add-on.

[Sources]

KD §3.17, pp. 145–150

MVD pp. 84, 115–116

JV p. 165

Freedom of Action Needs Knowledge

§1.2 · WHY KNOWLEDGE MATTERS

Freedom of Action Needs Knowledge

- 1 Humans inherit a body with definite needs, but human conduct is not constitutionally fixed in the same manner.
- 2 Imagination and freedom of action allow incompatible beliefs, alternative choices, institutions, and environmental change.
- 3 Knowledge is needed to align this freedom with coexistence and the human aspiration for happiness.

Without understanding, freedom can amplify contradiction; with understanding, it becomes responsible participation. · MVD pp. 115–116 · JV pp. 61, 165 · 7 / 26

The need for knowledge begins with a difference between material constitution and human freedom. Human beings can imagine alternatives and act on incompatible acceptances. The darshan argues that understanding is needed to direct that freedom toward happiness and coexistence rather than contradiction.

[Sources]

Study §1.2

MVD pp. 115–116

JV pp. 61, 165

The Human Goal Directs Freedom

§1.2 · HUMAN GOAL AND JEEVAN VALUES

The Human Goal Directs Freedom

Happiness

Harmony between selection and deliberation: what is chosen no longer contradicts the understood purpose.

Peace

Harmony between deliberation and contemplation: reasoning and meaning remain mutually coherent.

Contentment

Harmony between contemplation and enlightened resolve: accepted meaning becomes settled direction.

Bliss

Harmony between resolve and realisation in awakened jeevan.

Resolution, prosperity, fearlessness, and coexistence name the human goal; happiness, peace, contentment, and bliss name coherence within jeevan.

MVD pp. 207–208 · JV pp. 61, 138, 165 · AnalyticMadhyasthDarshan.org · 8 / 26

The human goal operates at four scales: resolution in the person, prosperity in the family, fearlessness in society, and coexistence in universal orderliness. The four jeevan values describe coherence within the active faculties. Do not present these as a mechanical one-to-one ladder.

[Sources]

MVD pp. 207–208

JV pp. 61, 138, 165

Knowledge, Wisdom, and Science

§1.2 · GYAN · VIVEK · VIGYAN

Knowledge, Wisdom, and Science

Complete understanding must establish what is real, recognise the human goal, and give practicable direction for its accomplishment. The three terms cooperate without becoming interchangeable.

Gyan — knowledge

Realised understanding of coexistence, jeevan, and humane conduct: what is, who knows, and what participation requires.

Vivek — wisdom

Knowledge by which the human goal — resolution, prosperity, fearlessness, and coexistence — is recognised.

Vigyan — science

Directional knowledge for material prosperity together with the human and jeevan goals, including the law and process of activity and thought.

Gyan establishes reality; vivek recognises the goal; vigyan gives reliable direction. — MVD p. 170 · AnalyticMadhyasthDarshan.org · 9 / 26

The primary-text correction on this slide is important. Vivek recognises the human goal; it is not assigned the whole content of material prosperity and jeevan goals. Vigyan supplies directional knowledge for material prosperity together with the human and jeevan goals.

[Sources]

MVD p. 170

Study §1.2

Delusion or Awakening

§1.2 · THE EPISTEMIC FORK

Delusion or Awakening

The decisive issue is what jeevan takes as the self and which reference points govern sensation, desire, thought, resolve, and action.

Delusion

Jeevan identifies with the body. Only four-and-a-half activities become effective, and deliberation is governed by sensation, health, and profit.

Awakening

Jeevan knows itself and coexistence. The same faculties align around justice, dharma, truth, resolution, and fulfilment of relationship.

The faculties remain active in both conditions; their direction and coordination change. Error is incomplete functioning of the knower, not merely missing information.

Body-identification

Narrow criteria

Incomplete knowing

Contradiction

The aspiration for happiness remains while sensation-governed conduct repeatedly fails to secure it.

JV pp. 72–74, 92–98 · MVD pp. 126–127, 263–264 · AnalyticMadhyasthDarshan.org · 10 / 26

Delusion and awakening use the same jeevan faculties. In delusion, body-identification and the first three evaluative perspectives dominate. In awakening, the faculties are coordinated by justice, dharma, truth, and the understood human goal. The difference is governance and completeness, not the presence or absence of activity.

[Sources]

JV pp. 72–74, 92–98

MVD pp. 126–127, 263–264

Ten Activities, One Jeevan

§1.3 · JEEVAN AS THE ACTIVE KNOWER

Ten Activities, One Jeevan

The ten activities are five coordinated pairs. Reflection and projection are two directions of the same active jeevan, not separate minds or independent mechanisms.

Five loci and paired activities

- Atma — realisation / authenticity
- Buddhi — enlightenment / resolve
- Chitta — contemplation / visualisation
- Vritti — deliberation / analysis
- Mun — taste / selection

Two recurrent directions

- Reflection examines experience until meaning becomes clear and resolvable. Projection carries realisation outward as selection, action, behaviour, work, communication, and evaluation.

Higher activities orient and integrate those below; bodily expression returns consequences for renewed reflection.

JV pp. 72–74, 92–93 · KD §§3.12, 3.17 · MVD pp. 83–84 · AMD.org · 11 / 26

The ten activities belong to one jeevan across five loci. Reflection describes the inward examination of experience; projection describes the outward evidencing of understanding. The two directions are pedagogical descriptions of coordinated activity, not separate substances.

[Sources]

JV pp. 72–74, 92–93

KD §§3.12, 3.17

MVD pp. 83–84

Knowing and Doing Form a Recurrent Cycle

§1.3 · REFLECTION AND PROJECTION

Knowing and Doing Form a Recurrent Cycle

Attention and reflection deepen knowing; realisation and projection place understanding into action, where result and evaluation return material for correction.

Inward movement

Experience and consequence return through attention and reflection until meaning can be understood and resolved.

Outward evidence

Realisation projects as selection, action, behaviour, work, communication, and evaluation in the human joint form.

Neither direction is complete alone: reflection without projection remains unevidenced; projection without reflection repeats habit.

Result and evaluation return projected action to renewed attention.

KD §3.12, pp. 110–113 · MVD p. 290 · JV pp. 92–93 · AnalyticMadhyasthDarshan.org · 12 / 26

Walk through this as a recurrent loop. Attention and reflection deepen meaning. Realisation stabilises understanding. Projection makes it actionable. Result and evaluation return to attention, so correction is built into the account rather than added after failure.

[Sources]

KD §3.12, pp. 110–113

MVD p. 290

JV pp. 92–93

Jeevan Knows; the Body Mediates

§1.3 · THE HUMAN JOINT FORM

Jeevan Knows; the Body Mediates

Knowing belongs to jeevan, while human evidence requires the joint form. The body supplies sensory access, brain-mediated signalling, speech, movement, work, and participation with others.

Jeevan — sentient bearer

- Realisation, enlightenment, contemplation, deliberation, selection
- Evaluation of relationship and value
- Continuity of the knower across bodily change

Human joint form — lived evidence

- Brain and senses carry signals and bodily conditions
- Speech and action place understanding in a shared world
- Work, behaviour, and teaching make claims answerable to result

The texts specify a functional relation between jeevan and brain; a more precise account of interaction remains an open explanatory task.

MVD pp. 83–84, 200 · KD §3.16 · AnalyticMadhyasthDarshan.org · 13 / 26

The slide states the textual claim and its limit. Knowing belongs to jeevan, while the body and brain mediate sensory contact and public action. The source offers a functional relation, but the precise interaction between sentient activity and neural processes remains an open explanatory question.

[Sources]

MVD pp. 83–84, 200

KD §3.16

Cognisance Regulates Sensitivity

§1.3 · COGNISANCE AND SENSITIVITY

Cognisance Regulates Sensitivity

Cognisance

Knowing and accepting in jeevan; it supplies direction through relationship, value, purpose, and orderliness.

Sensitivity

Embodied responsiveness through the senses. It supplies contact and capacity for action, but not fulfilment by itself.

Higher conformance

Justice, dharma, truth, and the human goal govern deliberation and the use of bodily and material means.

Lower conformance

Pleasantness, health, and gain remain necessary information but cannot finally authorise contradiction or injustice.

Governance, not suppression, is the relation: cognisance directs embodied sensitivity toward right participation.

MVD pp. 66–67, 126–127, 207–208 · JV pp. 93–98, 139 · AnalyticMadhyasthDarshan.org · 14 / 26

Cognisance gives direction; sensitivity supplies embodied contact. Pleasantness, health, and material gain remain necessary inputs, but they are not the final authorising criteria. Higher conformance means justice, dharma, and truth govern the use of these inputs.

[Sources]

MVD pp. 66–67, 126–127, 207–208

JV pp. 93–98, 139

Four Vishayas, Five Sensory Modalities

§1.4 · BODILY ACTIVITY AND SENSORY CONTACT

Four Vishayas, Five Sensory Modalities

Four vishayas — what is served

Eating, sleeping, protection or defence, and mating are bodily propensities retained in the human joint form.

Five modalities — how contact occurs

Sound, touch, visible form, taste, and smell are bodily interfaces through which engagement occurs.

Different questions

The four identify the bodily propensity being served; the five identify the mode of contact and information. They are not nine independent activities.

Samvedana is broader

MVD uses samvedana for sensing and other cognitive-organ meanings; “five sensory modalities” is therefore the more precise label.

Bodily life is regulated for nourishment, protection, continuity, justice, ecology, and right use — not rejected.

MVD pp. 58, 65, 313 · *AnalyticMadhyasthDarshan.org* · 15 / 26

Do not merge these enumerations. The four vishayas answer which bodily propensity is being served. The five sensory modalities answer how the body contacts and receives information from its surroundings. MVD uses samvedana more broadly, so “five sensory modalities” avoids inventing a stable five-member category.

[Sources]

MVD pp. 58, 65, 313

Study §1.4

Satisfaction Has Three Different Durations

§1.4 · SATISFACTION

Satisfaction Has Three Different Durations

MVD distinguishes temporary sensory satisfaction, longer-lasting intellectual satisfaction, and non-transforming satisfaction in realisation. These are not interchangeable grades of bodily pleasure.

Sensory satisfaction

Temporary satisfaction arising through embodied contact with sound, touch, visible form, taste, and smell.

Intellectual satisfaction

Satisfaction associated with samadhan and the humane fulfilment of the three eshanas in family and society.

Realisation-based satisfaction

Non-transforming restfulness grounded in realisation rather than in a changing sensory or social condition.

Three durations clarify why knowledge reaches beyond sensation. — MVD pp. 64–65 · AnalyticMadhyasthDarshan.org · 16 / 26

MVD distinguishes sensory satisfaction, intellectual satisfaction, and non-transforming satisfaction in realisation. The distinction matters because the three eshanas and samadhan belong to the intellectual and social field, not to a larger list of sensory drives.

[Sources]

MVD pp. 64–65

Social Motives Need Resolution

§1.4 · SAMADHAN AND THREE ESHANAS

Social Motives Need Resolution

Samadhan and the three eshanas belong to the field of intellectual and social satisfaction. Resolution orients each motive as understood responsibility rather than appetite without limit.

Putreshana — progeny

Family and social continuity, education in humaneness, and confidence that the next generation can participate responsibly.

Vitteshana — wealth

Prosperity and right use: wealth acquired with justice and directed toward sufficiency, production, protection, and complementarity.

Lokeshana — public recognition

Recognition in service of undivided society and universal orderliness, not fame or applause as an end.

Hoarding, lineage domination, and fame-seeking are distortions of these humane definitions. — MVD pp. 64–65 · AnalyticMadhyasthDarshan.org · 17 / 26

Each eshana is defined normatively. Putreshana concerns responsible continuity, vitteshana prosperity and right use, and lokeshana recognition in service of undivided society and universal orderliness. Samadhan supplies the resolving orientation under which these motives become responsibilities.

[Sources]

MVD pp. 64–65

Study §1.4

Upakar Is Higher-Human Participation

§1.4 · UPAKAR

Upakar Is Higher-Human Participation

Definition

Help and inspiration directed toward another person's material sufficiency and understanding.

Purpose

Prosperity and awakening: the beneficiary becomes more able to meet material needs and understand humane participation.

Boundary

Upakar is not a fourth eshana and not the sole proof of knowledge; it belongs to higher-human activity.

Analytical implication

Because the stated ends are prosperity and awakening, help should increase capability and avoid dependency or exploitation. This is an analytical implication, not a separate quoted definition.

MVD defines upakar as help and inspiration for prosperity and awakening. It is a distinct field of resolved participation, not another bodily propensity, eshana, or social motive.

MVD p. 73 · AnalyticMadhyasthDarshan.org · 18 / 26

Upakar is kept separate from the three eshanas. Its primary definition is help and inspiration for prosperity and awakening. The capability and non-dependency language is an analytical implication: help that entrenches dependence or exploits vulnerability would defeat those stated ends.

[Sources]

MVD p. 73

Study §1.4

All Six Inform; the Latter Three Govern

§1.4 · SIX EVALUATIVE PERSPECTIVES

All Six Inform; the Latter Three Govern

Jeevan compares an intended activity across six perspectives before action. The first three report changing conditions; the latter three judge relationship, orderliness, and accord with coexistence.

Sensory + bodily

*Priya—apriya — pleasant or unpleasant.
Hita—ahita — nourishment, well-being, or harm.*

Material + relational

*Labha—alabha — goods, exchange, gain or loss.
Nyaya—anyaya — right or wrong behaviour in relationship.*

Order + reality

*Dharma—adharma — resolution or contradiction.
Satya—asatya — accord or non-accord with realisation in existence.*

Governing hierarchy

Priya, hita, and labha remain relevant inputs. Nyaya, dharma, and satya govern humane deliberation, so pleasure, health, or gain cannot authorise injustice or contradiction.

MVD pp. 66–67, 126–127 · JV pp. 93–98, 139 · AnalyticMadhyasthDarshan.org · 19 / 26

The first three perspectives concern changing sensory, bodily, and material conditions. The latter three concern relationship, resolution and orderliness, and truth in realisation. Humane deliberation considers all six but gives governing authority to nyaya, dharma, and satya.

[Sources]

MVD pp. 66–67, 126–127

JV pp. 93–98, 139

Order in Activity Has a Definite Sequence

§1.4 · LAW, REGULATION, AND BALANCE

Order in Activity Has a Definite Sequence

Knowledge of activity includes its law, the regulation that keeps action within that law, and the balance or complementarity that results. The human sequence continues into justice, dharma, and truth.

Activity triad

Niyam — the law that protects and disciplines an activity.
Niyantaran — regulation according to that law.
Santulan — balance sustained in mutuality.

Human evidence

Law becomes evident in just behaviour; regulated thought supports dharma or resolution; realisation in coexistence accords with truth.

The source gives a functional progression, not three equations: niyam is not simply nyaya, niyantran is not simply dharma, and santulan is not simply satya.

Understanding must connect what the principle is, how activity stays within it, and what balance becomes evident.

MVD pp. 70, 137, 174 · AnalyticMadhyasthDarshan.org · 20 / 26

Niyam is the law that protects and disciplines activity. Niyantaran is regulation according to law. Santulan is the balance or complementarity that results. MVD then continues from balance to justice, dharma, and truth; it does not state three one-to-one lexical equations.

[Sources]

MVD pp. 70, 137, 174

Knowledge Governs the Activity Cycle

§1.4 · ACTIVITY CYCLE

Knowledge Governs the Activity Cycle

Before action, jeevan identifies the activity, compares across six perspectives, and understands the relevant law, regulation, and balance. After action, result and evaluation test what was actually fulfilled.

Decision

Ask what activity is proposed; what priya, hita, and labha indicate; and whether nyaya, dharma, and satya authorise it.

Orderliness

Know the niyam, maintain niyantran, seek santulan, and evaluate whether relationship and purpose were mutually fulfilled.

Correct intention is insufficient: capacity, conditions, other people, material consequences, and the wider orders affect the result.

Result and evaluation return material for renewed deliberation and correction.

MVD pp. 66–71, 126–127, 137, 174, 310–311 · KD §3.4 · AMD.org · 21 / 26

This slide joins the previously scattered decision, karma, result, and evaluation material. Before acting, identify the activity, compare all six perspectives, and understand the relevant law and regulation. After acting, result and evaluation show whether balance and mutual fulfilment were actually achieved.

[Sources]

MVD pp. 66–71, 126–127, 137, 174, 310–311

KD §3.4

Knowledge Must Become Publicly Legible

§1.5 · THE EVIDENCE REGIME

Knowledge Must Become Publicly Legible

Realisation is first-person, but not private immunity from examination. Knowledge becomes encounterable through behaviour, practical experiment, evaluation, upakar, and independent transmission.

Realisation — first-person

Jeevan directly understands coexistence, itself, and humane conduct; authenticity is the capacity to bear that understanding.

Behaviour — relational

Recognition and fulfilment of values make understanding visible where mutual satisfaction can be assessed.

Experiment — practical

Work and productive participation expose understanding to material conditions, consequences, repeatability, and correction.

Upakar and transmission — social

Help and teaching must increase another's capacity; understanding must become independently liveable and conveyable.

MVD pp. 12, 73 · SB pp. 44, 111, 121, 149 · JV p. 26 · AnalyticMadhyasthDarshan.org · 22 / 26

The evidence regime has first-person, relational, practical, and social dimensions. Realisation cannot claim private immunity, because understanding must project into behaviour and work. Upakar and transmission add a further test: another person should become independently capable of living and conveying the understanding.

[Sources]

MVD pp. 12, 73

SB pp. 44, 111, 121, 149

JV p. 26

Error Can Persist Despite Information

§1.5 • CORRECTION

Error Can Persist Despite Information

Error appears where knowing loses contact with reality, self, relationship, activity, or result. Confidence and institutional authority can remain high while the deeper sequence is broken.

Delusion — bhram

Jeevan is identified with the body; sensitivity becomes the governing reference and accepting separates from knowing.

Mystery — rahasyata

Reflection does not reach realisation, or realisation does not project as evidence; faculties remain misaligned.

False learning fails to understand form, property, essential nature, or dharma as it is, producing doubt and over-, under-, or mis-evaluation.

Correction requires renewed attention, reflection, action, result, and evaluation — not stronger assertion of the original belief.

MVD pp. 184, 263–264, 273–301, 317 · JV p. 93 · AMD.org · 23 / 26

False learning is not merely one false sentence. It is failure to understand form, property, essential nature, or dharma as it is, and it produces doubt and distorted evaluation. Correction therefore returns to attention, reflection, action, result, and evaluation.

[Sources]

MVD pp. 184, 263–264, 273–301, 317

JV p. 93

Practical Tests and Evidential Limits

EPISTEMIC DISCIPLINE

Practical Tests and Evidential Limits

- 1 Test right use — do bodily and material practices support health, prosperity, justice, and ecological complementarity?
- 2 Test capability and mutuality — does help increase sufficiency and understanding, and is value-fulfilment mutual?
- 3 State the limit — correct intent can meet incapacity, scarcity, refusal, illness, conflict, or mixed results; ontology, conduct, and self-report need independent checks.

*The framework is strongest when difficult cases and evidential boundaries remain visible. ·
AnalyticMadhyasthDarshan.org · 24 / 26*

These checks keep the framework corrigible. Right use must be tested in bodily, material, relational, and ecological conditions. Help must be tested for capability and mutuality. Mixed results and hard cases should remain visible rather than being absorbed into a claim of awakening.

[Sources]

Study §§1.4–1.5

SB pp. 111, 121, 149

The Questions, Answered

WHAT MADHYASTH DARSHAN ESTABLISHES

The Questions, Answered

- ❓ **What is knowledge?** — The omnipresent ground is Knowledge; jeevan realises coexistence, itself, and humane conduct.
- ❓ **Why is it needed?** — To direct imagination and freedom of action toward the human goal.
- ❓ **What activity is governed?** — Four vishayas, five sensory modalities, samadhan with three eshanas, and upakar.
- ❓ **How are decisions made?** — Priya–hita–labha inform; nyaya–dharma–satya govern; niyam–nīyantran–santulan organise activity.
- ❓ **How is error corrected?** — Through action, result, evaluation, renewed reflection, and practical discrimination.
- ❓ **What counts as evidence?** — Coherence across realisation, relationship, work, mutual fulfilment, upakar, and transmission.

*Knowledge becomes complete as conscious participation in the universal order of coexistence. ·
AnalyticMadhyasthDarshan.org · 25 / 26*

The answers now follow the revised five-part sequence. Knowledge has an ontological ground and an active human content. It directs freedom, governs definite activities and comparisons, and remains answerable to result, correction, and transmission.

[Sources]

Study §§1.1–1.5

An Awakened Human Tradition

THE CULMINATION · HUMAN GOAL AND JEEVAN VALUES

An Awakened Human Tradition

Knowledge is complete when it governs activity, corrects itself through evidence, and participates consciously in universal orderliness.

Resolution

Happiness

Prosperity

Peace

Fearlessness

Contentment

Coexistence

Bliss

The relation is cumulative: realised understanding becomes right decision, balanced activity, humane conduct, upakar, and transmissible tradition. ·
AnalyticMadhyasthDarshan.org · 26 / 26

Close by returning to the human goal. Knowledge is complete when it can govern actual activity, remain balanced through law and regulation, become humane conduct, and support another person's prosperity and awakening. An awakened tradition is therefore transmissible and corrigible, not merely repetitive.
