

Research Note: Pass-Two Lifecycle and Evidence Coding of All 122 *Jeevan* Members

Author: Raghava Mohan Madhwapathi (analyticmadhyasthdarshan.org)

Edited on: August 16, 2026, 10:09 AM IST

Status: Internal research note (not a catalog entry). Pass Two of the activity-to-sphere analysis.

Scope: This register completes the normalization gate and Pass-Two coding for all 122 *bal/shakti* column assignments. It takes the source anatomy established in the sixteen [pilot records](#) and the 106-member [Pass-One register](#), separates internal dependencies from external requirements, and records the lifecycle conditions under which each member can be developed, rightly oriented, expressed, evidenced, evaluated, corrected, sustained, and transmitted. It does not cluster the records into spheres and does not assign family or institutional functions.

The constitutional activity of *jeevan* is not created by an environment. Pass Two therefore never treats an external condition as the cause of realisation or as an additional power of *jeevan*. It asks instead what is necessary or supportive for receptivity, embodied or relational expression, valid evidence, correction, and continuity. Where a source slot names a role, relationship, property, body process, criterion, or result, the lifecycle follows that entry form rather than redescribing it as a private mental operation.

1. Normalized record and coding discipline

Every member has a stable lowercase suffix: **a** for the AVD *bal* column and **b** for the *shakti* column. The suffix preserves documentary position; it does not imply inward state and outward performance. Each record separates:

- **locus** - where the entry is borne;
- **operation field** - the content, person, body, relation, object, or process with which it deals;
- **consequence field** - who or what is affected by expression or instantiation;
- **evidence field** - where correctness becomes available to competent evaluation; and
- **internal dependency** - the activities of *jeevan* that orient, inform, carry, or correct the member before an external requirement is proposed.

Source anatomy retains the Pass-One provenance: **D** for direct textual content, **I** for structural inference, **H** for a provisional environmental claim, and **O** for an unresolved point. Lifecycle claims in this register are normally **I**. They are not promoted to **D** merely because the member name is direct.

External classifications have four parts. Relation types are **CONST** (constitutive), **ENAB** (enabling), **EVID** (evidential), **PROT** (protective), **CORR** (corrective or restorative), **SUST** (sustaining), and **TRANS** (transmissive). Strength is **N**, **S**, **C**, or **U**, scoped to occurrence (**OCC**), expression (**EXP**), evidence (**EVD**), correction (**COR**), or continuity (**CON**). Universality is **U-J** when constitutional to common *jeevan*, **U-H** when it follows from embodied-human or relational dependence, and **V-C** when the arrangement remains contextual. Thus **EVID; N-EVD; U-H; I** means that an external field is structurally necessary for valid embodied-human evidence, not for the inward occurrence of the activity.

The topology codes remain **J** (intra-*jeevan*), **B** (embodied personal), **D** (dyadic or small-group), **R** (durable close or intergenerational), **C** (collective or public), **E** (material or ecological), and **T** (historical or intergenerational transmission). Source-embedded role or social vocabulary is retained in the anatomy but flagged in the open-field row; it cannot count as an independent institutional discovery.

2. *Atma* and *buddhi*: six member records

A-01 - *Anubhav* / *pramanikta*

Field	A-01a - <i>anubhav</i>	A-01b - <i>pramanikta</i>
Normalized location	Locus: <i>atma</i> ; operation: realisation of coexistence; consequence: coordination of outer faculties; evidence: non-contradiction and later conduct; J , then B/D/C/E/T for evidence (D/I)	Locus: realised <i>jeevan</i> expressed through the person; operation: authentic presentation; consequence and evidence: persons, relationships, work, and nature; J/B/D/R/C/E/T (D/I)
Internal dependency	Constitutionally primary; outer-faculty agreement supplies neither occurrence nor criterion but carries its evidence (D/I)	Depends on <i>anubhav</i> for orientation and on <i>buddhi-chitta-vritti-mun</i> for intelligible, selected, embodied evidence (I)
Development and orientation	Coherent proposal, inquiry, and freedom to examine are supportive; reality rather than assent is the criterion	Realisation is necessary to the claim; opportunities to explain and act develop evidential competence
Expression and consequence	Embodied expression is not constitutive to inward occurrence; later contradiction across conduct remains relevant	Language, bodily competence, practical means, and access to affected fields are required according to the claim expressed

Field	A-01a - <i>anubhav</i>	A-01b - <i>pramanikta</i>
Evidence and evaluator	First-person non-contradiction is indispensable but does not establish the claim for others; outward convergence is supportive	Bearer, counterparts, affected persons, and competent peers compare explanation, conduct, and consequence
Correction	Renew inquiry when understanding, inner agreement, or later evidence conflicts	Questioning, revised explanation or conduct, restitution for harm, and renewed inquiry
Continuity and transmission	Protected inquiry supports continuity; realisation itself is not transferred	Repeated congruence sustains the claim; proposals, method, demonstration, and learner verification transmit it
External classification and risk	ENAB; S-CON; U-H; I and EVID; S-EVD; U-H; I ; risk: conviction, altered state, or inherited belief mistaken for realisation	EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I , TRANS; N-CON; U-H; I ; risk: charisma, office, or eloquence mistaken for authenticity

B-01 - *Anand / dhee*

Field	B-01a - <i>anand</i>	B-01b - <i>dhee</i>
Normalized location	Locus: <i>buddhi</i> ; operation: uninterrupted acceptance and celebration of awakening; consequence: inward consonance; evidence: continuity without stimulation; J (D/I)	Locus: <i>buddhi</i> ; operation: readiness to project the motion of awakening; consequence and evidence: outer-faculty expression; J/B , then D/C/E by field (D/I)
Internal dependency	Depends on <i>atma</i> for realised orientation; coordinates <i>chitta-vritti-mun</i> without being produced by them	Depends on <i>anand</i> and enlightenment for content; <i>chitta-vritti-mun</i> plan, assess, and select its projection
Development and orientation	Reality-grounded study and absence of fear support receptivity; awakened content is the governing criterion	Practice in faithful, non-impulsive expression is supportive; accepted awakening is necessary to orientation
Expression and consequence	Bodily festivity is optional and cannot establish the member	Expression requires communicative or practical means; consequences must remain consonant with awakened content

Field	B-01a - <i>anand</i>	B-01b - <i>dhee</i>
Evidence and evaluator	The bearer evaluates continuity and non-contradiction; others can evaluate only its later evidence	Bearer, counterparts, and affected persons evaluate fidelity, proportion, and consequence
Correction	Distinguish interruption in attention or expression from loss of the claimed awakened criterion; renew inquiry	Pause impulsive projection, revisit content, repair harmful expression, and retrain the means of communication
Continuity and transmission	Recollection and outer-faculty consonance support continuity; no external arrangement causes bliss	Repeated faithful projection and opportunities for others to examine it sustain and transmit its evidence
External classification and risk	ENAB; S-CON; U-H; I ; risk: pleasure, excitement, or ceremonial celebration mistaken for <i>anand</i>	ENAB; S-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; S-COR; U-H; I ; risk: enthusiasm or impulsive display mistaken for <i>dhee</i>

B-02 - *Astitva / dhruti*

Field	B-02a - <i>astitva</i>	B-02b - <i>dhruti</i>
Normalized location	Locus: <i>buddhi</i> ; operation: definite acceptance of existence and awakening; consequence: stable meaning; evidence: reasons and consistency; J , then B/C/E (D/I)	Locus: <i>buddhi</i> ; operation: fearless readiness for projection; consequence: responsible action; evidence: persistence with visible effects; J/B/D/C/E/T (D/I)
Internal dependency	Depends on <i>atma</i> for reality indication; <i>chitta</i> articulates, <i>vritti</i> tests, and <i>mun</i> carries accepted meaning into use	Depends on accepted truth in <i>buddhi</i> ; <i>chitta</i> plans, <i>vritti</i> evaluates, and <i>mun</i> selects embodied action
Development and orientation	Dialogical study connecting proposal, reason, experience, and consequence is strongly supportive	Meaningful agency and practice in reasoned decision support development; understood purpose is necessary to orientation
Expression and consequence	Explanation and comparison with actual processes require language and access to evidence	Skill, discretion, bodily capability, time, and material means are required according to the projected action

Field	B-02a - <i>astitva</i>	B-02b - <i>dhruti</i>
Evidence and evaluator	Bearer and interlocutors test definiteness, intelligibility, and consistency; authority cannot substitute	Bearer, affected persons, and skilled peers assess reasons, freedom, persistence, and intended and unintended effects
Correction	Distinguish error in meaning from error in observation or formulation; reopen inquiry	Distinguish principle from failures of planning, skill, means, or timing; revise action and repair harm
Continuity and transmission	Continuing inquiry without manufactured fear or status pressure supports stable acceptance	Stable responsibility, dissent without retaliation, feedback, and real learner responsibility support continuity
External classification and risk	ENAB; S-CON; U-H; I , EVID; S-EVD; U-H; I ; risk: borrowed doctrine or confidence mistaken for enlightenment	PROT; S-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: obedience, aggression, recklessness, or fanaticism mistaken for resolve

3. *Chitta*: sixteen member records

C-01 - *Shruti* / *smriti*

Field	C-01a - <i>shruti</i>	C-01b - <i>smriti</i>
Normalized location	Locus: <i>chitta</i> and embodied speech; operation: linguistic articulation of understood reality; consequence: hearer access; evidence: fidelity of language to understanding; J/B/D/C/T (D/I)	Locus: <i>chitta</i> ; operation: retained, repeatable presentation of directly recognised content; consequence: renewed access; evidence: stable fidelity across repetitions; J/B/D/T (D/I)
Internal dependency	Depends on <i>buddhi</i> for definite content, <i>vrutti</i> for semantic discrimination, and <i>mun</i> for selected speech	Depends on direct recognition and <i>shruti</i> ; <i>vrutti</i> distinguishes faithful recurrence from verbal habit and <i>mun</i> selects occasion
Development and orientation	Language, listening, dialogue, and opportunities to explain are supportive; truthfulness to understood content governs	Comprehension, meaningful recall, and varied re-expression support development; direct recognition governs recurrence

Field	C-01a - <i>shruti</i>	C-01b - <i>smriti</i>
Expression and consequence	Speech, writing, or other accessible representation requires bodily and communicative competence	Recall must become re-presentation suited to occasion without altering the recognised content
Evidence and evaluator	Speaker, hearer, and competent interlocutor compare expression with meaning and consequence	Bearer and hearers test whether repeated content remains intelligible, applicable, and consistent
Correction	Clarify terms, invite paraphrase and objection, and revise language where it distorts meaning	Return to recognised content, distinguish forgetting from misunderstanding, and correct rote or selective repetition
Continuity and transmission	Records and multiple speakers support continuity but do not replace understanding	Practice, records, and re-presentation across persons support transmission when verification remains possible
External classification and risk	ENAB; S-EXP; U-H; I, EVID; N-EVD; U-H; I, TRANS; S-CON; U-H; I; risk: fluency or quotation mistaken for understanding	ENAB; S-CON; U-H; I, EVID; N-EVD; U-H; I, TRANS; S-CON; U-H; I; risk: rote recurrence or archival preservation mistaken for living memory

C-02 - *Medha / kala*

Field	C-02a - <i>medha</i>	C-02b - <i>kala</i>
Normalized location	Locus: <i>chitta</i> ; operation: integration of memory, usefulness, art, science, and wisdom; consequence: discriminating design; evidence: coherent application; J/B/E/C/T (D/I/O)	Locus: embodied making and its artefact or performance; operation: beautification joined to usefulness; consequence and evidence: users, observers, and material result; B/D/C/E/T (D/I)
Internal dependency	Depends on <i>buddhi</i> for wisdom, <i>chitta</i> memory and contemplation, <i>vrutti</i> comparison, and <i>mun</i> for selection in making	Depends on <i>medha/chitta</i> for conception, <i>vrutti</i> for fitness and consequence, and <i>mun/body</i> for skill and execution
Development and orientation	Exposure to art, science, use, history, and practical comparison is supportive; wisdom-aligned usefulness governs	Apprenticeship, materials, technique, critique, and user contact are necessary or strongly supportive; beauty-with-use governs

Field	C-02a - <i>medha</i>	C-02b - <i>kala</i>
Expression and consequence	Integration becomes testable in interpretation, design, and choice rather than memory display	Embodied skill transforms a medium; effects include usability, meaning, maintenance, access, and material cost
Evidence and evaluator	Bearer, skilled peers, users, and affected persons evaluate integration across purpose and consequence	Makers, users, skilled peers, and affected communities evaluate usefulness, beauty, durability, and displaced cost
Correction	Compare rival interpretations and applications; revise where memory, taste, or technique displaces purpose	Critique, prototyping, repair, redesign, skill development, and material substitution
Continuity and transmission	Repertoire, records, exemplars, and practice sustain capability when discrimination remains active	Apprenticeship, exemplars, maintained tools, and teachable technique transmit art without fixing one style
External classification and risk	ENAB; S-CON; U-H; I, EVID; S-EVD; U-H; I; risk: memory display, cultivated taste, or technical novelty mistaken for <i>medha</i> ; alternate definition remains O	ENAB; N-EXP; U-H; I, EVID; N-EVD; U-H; I, TRANS; S-CON; U-H; I; risk: ornament, prestige, or novelty severed from usefulness

C-03 - *Kanti / roop*

Field	C-03a - <i>kanti</i>	C-03b - <i>roop</i>
Normalized location	Locus: <i>chitta</i> ; operation: clarity of meaningful possibility; consequence: intelligible contemplation and design; evidence: explanation and fit; J/B/C/E (D/I)	Locus: material unit as property and <i>chitta</i> as visualised content; operation: discrimination of shape, volume, density; consequence and evidence: observation and use; B/E/C/T (D/I)
Internal dependency	Depends on <i>buddhi</i> for accepted meaning, <i>vrutti</i> for discrimination, and <i>mun</i> for attentive selection	Depends on sensory mediation and <i>chitta</i> visualisation, with <i>vrutti</i> analysis correcting appearance
Development and orientation	Study of meaning, comparison of possibilities, and freedom from persuasive pressure are supportive	Visual-spatial experience, measurement, varied viewpoints, and object access are supportive or necessary for competent use

Field	C-03a - <i>kanti</i>	C-03b - <i>roop</i>
Expression and consequence	Clarity becomes evident in explanation, planning, and the ability to distinguish real from imagined possibility	Form conditions handling, design, fit, safety, representation, and material consequence
Evidence and evaluator	Bearer and competent interlocutors test whether meaning is clear, relevant, and reality-consonant	Observer, user, and skilled peer compare visualisation and representation with the actual object
Correction	Expose ambiguity, hidden premise, and vivid but false possibility; revise explanation or model	Reobserve, measure, change viewpoint or instrument, and correct misleading images or models
Continuity and transmission	Shared language and examples support continuing clarity; no fixed vocabulary is universal	Records, drawings, models, instruments, and spatial training support repeatable discrimination
External classification and risk	ENAB; S-EVD; U-H; I, CORR; S-COR; U-H; I; risk: brightness, confidence, or persuasive imagery mistaken for clarity	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; S-COR; U-H; I; risk: attractive image, label, or projection mistaken for actual form

C-04 - *Nireekshan / guna*

Field	C-04a - <i>nireekshan</i>	C-04b - <i>guna</i>
Normalized location	Locus: <i>chitta</i> ; operation: whole-sensitive inspection; consequence: account of units and relations; evidence: relevant completeness; J/B/E/D/C/T (D/I)	Locus: inspected unit or relation as property or relative motion; operation: discrimination of generative, degenerative, or mediative effect; evidence: observed consequence; E/B/C/T (D/I/O)
Internal dependency	Depends on <i>buddhi</i> for whole-orientation, <i>vrutti</i> for analysis, and <i>mun/body</i> for attentive observation	Depends on <i>nireekshan/chitta</i> for presentation and <i>vrutti</i> for comparative classification; the property is not a second inward operation
Development and orientation	Training in observation, systems relation, rival explanation, and scale is strongly supportive	Access to varied cases, measurement, causal comparison, and consequence histories is necessary for reliable discrimination

Field	C-04a - <i>nireekshan</i>	C-04b - <i>guna</i>
Expression and consequence	Inspection uses bodies, instruments, records, and collaboration according to object	Classification guides design and action, affecting units, users, natural processes, and future conditions
Evidence and evaluator	Bearer, skilled peers, affected persons, and repeat observers test completeness and fit	Skilled observers and affected participants compare classification with relative motion and result
Correction	Reinspect excluded relations, widen scale or time, test rival accounts, and disclose uncertainty	Revise categories, measurement, causal account, or use when prediction and consequence diverge
Continuity and transmission	Records, preserved objects or data, and plural inquiry sustain cumulative inspection	Reproducible methods, reference cases, and correction records transmit discrimination
External classification and risk	ENAB; N-EVD; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: data accumulation or a narrow model mistaken for holistic inspection	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: label, metric, or projection mistaken for the property itself

C-05 - *Santosh / shree*

Field	C-05a - <i>santosh</i>	C-05b - <i>shree</i>
Normalized location	Locus: <i>chitta</i> ; operation: experienced absence of lack and readiness to evidence sufficiency; consequence: need and productive orientation; evidence: dependable provision; J/B/R/C/E/T (D/I)	Locus: accepted material-relational condition; operation: recognition of prosperity and continuity; consequence and evidence: shared provision through time; J/B/R/C/E/T (D/I)
Internal dependency	Depends on <i>buddhi</i> for sufficiency criterion, <i>vritti</i> for need assessment, and <i>mun</i> for use and selection	Depends on understanding of prosperity, <i>vritti</i> evaluation, and <i>mun/body</i> participation in production and use
Development and orientation	Learning finite need, right use, productive competence, and ecological consequence is necessary or strongly supportive	Participants need shared criteria for need, useful surplus, access, maintenance, and continuity

Field	C-05a - <i>santosh</i>	C-05b - <i>shree</i>
Expression and consequence	Contentment is evidenced through measured use, capable work, sharing, and freedom from fear-driven accumulation	Prosperity appears through useful provision, access, reserve, maintenance, and regenerative production
Evidence and evaluator	Bearer and persons sharing provision compare felt lack with actual capability, access, workload, and risk	Participants, producers, users, and affected ecological fields evaluate sufficiency and continuity
Correction	Revise need estimate, dependency, distribution, work, or use when contentment masks deprivation or suppression	Repair access, unsafe work, fragile supply, depletion, waste, or reserve failure
Continuity and transmission	Competence, maintenance, reserve, and learning through participation sustain credible contentment	Productive knowledge, role continuity, stored means, and ecological regeneration transmit prosperity
External classification and risk	ENAB; N-EVD; U-H; I, SUST; S-CON; U-H; I; risk: resignation, low expectation, possession, or reported satisfaction mistaken for <i>santosh</i>	EVID; N-EVD; U-H; I, SUST; N-CON; U-H; I, TRANS; S-CON; U-H; I; risk: stocks, output, status, or fragile abundance mistaken for continuing prosperity

C-06 - *Prem / ananyata*

Field	C-06a - <i>prem</i>	C-06b - <i>ananyata</i>
Normalized location	Locus: realised relational orientation in <i>chitta</i> expressed by the person; operation: completeness through kindness, grace, compassion; consequence and evidence: persons and wider coexistence; J/D/R/C/E/T (D/I)	Locus: persons in participation; operation: human and ecological complementarity and help toward awakening; consequence and evidence: mutuality, nature, and continuity; D/R/C/E/T (D/I)
Internal dependency	Depends on realisation and <i>buddhi</i> for completeness, <i>vriddhi</i> for value-sensitive discernment, and <i>mun</i> for selected expression	Depends on authenticity and resolution, <i>vriddhi</i> evaluation, and <i>mun/body</i> for complementary participation

Field	C-06a - <i>prem</i>	C-06b - <i>ananyata</i>
Development and orientation	Relationships with truthful feedback, care, and freedom from possessive substitution are strongly supportive	Experience of interdependence, practical cooperation, and ecological consequence supports development; complementarity governs
Expression and consequence	Kindness, grace, and compassion require responsive action suited to the other's condition and wider effects	Help, work, and use of nature must increase capability without domination, exclusion, or displaced harm
Evidence and evaluator	Bearer, counterparts, affected persons, and long-horizon consequences jointly test completeness	Human counterparts, affected communities, and ecological evidence evaluate mutuality and complementarity
Correction	Correct attachment, favouritism, intrusion, neglect, or harm through dialogue, restoration, and renewed understanding	Restore damaged relations or natural conditions, redistribute burden, and revise help that creates dependence
Continuity and transmission	Durable truthful relationship and exemplarity sustain expression; no relationship label guarantees it	Repeated cooperation, succession of competence, and regenerative practice transmit complementarity
External classification and risk	CONST; N-EVD; U-H; I, CORR; N-COR; U-H; I, SUST; S-CON; U-H; I ; risk: attachment, exclusivity, sentiment, or sacrifice mistaken for love	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; N-CON; U-H; I ; risk: assimilation, paternalism, exploitation, or short-term cooperation mistaken for complementarity

C-07 - *Vatsalya / sahajta*

Field	C-07a - <i>vatsalya</i>	C-07b - <i>sahajta</i>
Normalized location	Locus: person in a sustained care relation; operation: nurturing and protection toward comprehensive resolution; consequence and evidence: dependent person's capability; D/R/B/T , sometimes C/E (D/I)	Locus: <i>chitta</i> and embodied conduct; operation: congruence of behaviour, norm, thought, and realisation; consequence and evidence: conduct across fields; J/B/D/R/C/E/T (D/I)
Internal dependency	Depends on understanding and resolve, <i>vrutti</i> for responsive judgement, and <i>mun/body</i> for care	Depends on realisation and all outer faculties remaining mutually consonant

Field	C-07a - <i>vatsalya</i>	C-07b - <i>sahajta</i>
Development and orientation	Care competence, knowledge of development, protected voice, and responsibility are necessary; the other's resolution governs	Honest self-observation, exposure to varied roles, and freedom to acknowledge contradiction support development
Expression and consequence	Nurturing, teaching, provision, and protection require time, bodily means, skill, and non-dominating authority	Congruence must persist through speech, relationship, work, use, and response to difficulty
Evidence and evaluator	The cared-for person, caregiver, skilled peers, and later capability evaluate whether care nurtures rather than controls	Bearer, close counterparts, coworkers, affected persons, and practical results provide plural evidence
Correction	Adjust care to receptivity and agency; protect from harm; repair control, neglect, dependency, or incompetence	Admit contradiction, revisit understanding, change conduct, and make restitution where needed
Continuity and transmission	Durable responsibility, respite, succession, material support, and learned care sustain the relation	Repeated congruence and teachable self-correction transmit the possibility without image management
External classification and risk	CONST; N-OCC; U-H; I, PROT; N-COR; U-H; I, SUST; N-CON; U-H; I; risk: control, indulgence, dependency, or preservation mistaken for nurturing	EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: ease, spontaneity, civility, or polished consistency mistaken for inner-outer congruence

C-08 - *Shraddha / pujoyata*

Field	C-08a - <i>shraddha</i>	C-08b - <i>pujoyata</i>
Normalized location	Locus: <i>chitta</i> ; operation: movement toward righteousness, awakening, and complete conduct; consequence: qualitative transformation; evidence: changed conduct; J/B/D/C/T (D/I)	Locus: <i>chitta</i> ; operation: activeness for qualitative development and awakening; consequence and evidence: sustained developmental movement; J/B/D/C/T (D/O)
Internal dependency	Depends on <i>buddhi</i> for accepted direction, <i>vritti</i> for discrimination, and <i>mun</i> for repeated selection	Depends on the same inward orientation; the distinct relation to <i>shraddha</i> remains unresolved

Field	C-o8a - <i>shraddha</i>	C-o8b - <i>pujyata</i>
Development and orientation	Access to evidence-bearing proposal, exemplars, inquiry, and meaningful practice is strongly supportive; righteousness governs	Opportunities for self-directed learning, practice, and correction support activeness; awakening rather than reverence governs
Expression and consequence	Movement appears in learning, relationship, work, and willingness to revise conduct	Activeness must become qualitative change rather than display, ritual, or service to status
Evidence and evaluator	Bearer, counterparts, and affected persons compare direction, conduct, and consequence over time	Bearer and observers evaluate qualitative development; no revered person is constitutive to the definition
Correction	Question false exemplars, inherited deference, and stagnation; restore the criterion of righteousness and authenticity	Reopen the unresolved distinction, remove status incentives, and revise activity that produces no awakening
Continuity and transmission	Protected inquiry, practice, truthful exemplarity, and succession by competence support continuity	Repeated self-directed development and open evaluation sustain and transmit activeness
External classification and risk	ENAB; S-CON; U-H; I, EVID; N-EVD; U-H; I, PROT; S-COR; U-H; I; risk: admiration, obedience, belief, or ritual reverence mistaken for <i>shraddha</i>	ENAB; S-EXP; U-H; I, EVID; N-EVD; U-H; I; risk: status, worship, busyness, or demanded reverence mistaken for developmental activeness; member distinction remains O

4. *Vritti*: thirty-six member records

V-01 - *Vidya* / *pragya*

Field	V-01a - <i>vidya</i>	V-01b - <i>pragya</i>
Normalized location	Locus: <i>vrutti</i> ; operation: systematic knowing, believing, and accepting a unit as it is and for its purpose; consequence and evidence: explanation and fitting use; J/B/D/C/E/T (D/I)	Locus: <i>vrutti</i> ; operation: refined conception of objective, relative, and absolute truth; consequence: differentiated judgement; evidence: reality-consonant explanation and conduct; J/B/C/E/T (D/I)

Field	V-01a - <i>vidya</i>	V-01b - <i>pragya</i>
Internal dependency	Depends on <i>buddhi/chitta</i> for understood content and whole meaning; <i>mun</i> carries acceptance into selection and use	Depends on enlightenment and realisation for absolute truth, <i>chitta</i> for conception, and <i>mun</i> for applied discrimination
Development and orientation	Object access, proposal, questioning, practice, and correction by consequence are strongly supportive; the object's actual being and purpose govern	Study across truth levels, comparison of claims, and freedom from dogma support refinement; truth rather than cleverness governs
Expression and consequence	Understanding becomes evident in accurate explanation, recognition, relationship, and purpose-fitting action	Discernment shapes judgement, explanation, design, and response to conflicting kinds of claim
Evidence and evaluator	Bearer, knowledgeable interlocutors, users, and affected persons test object fidelity and purpose	Bearer and competent peers test distinctions against realised, relational, and empirical evidence appropriate to each claim
Correction	Reobserve the object, question purpose assumptions, revise belief, and repair misapplication	Identify category error, unsupported inference, or confused truth level; reopen inquiry and revise judgement
Continuity and transmission	Repeated study and application, accessible records, and teachable methods sustain <i>vidya</i>	Dialogical teaching, diverse cases, and explicit correction transmit refined discrimination without fixing one curriculum
External classification and risk	ENAB; S-CON; U-H; I , EVID; N-EVD; U-H; I , TRANS; S-CON; U-H; I ; risk: information, credential, or assent mistaken for systematic knowing	ENAB; S-EVD; U-H; I , CORR; N-COR; U-H; I , TRANS; S-CON; U-H; I ; risk: sophistication, abstraction, or authority mistaken for wisdom

V-02 - *Keerti* / *vichar*

Field	V-02a - <i>keerti</i>	V-02b - <i>vichar</i>
Normalized location	Locus: <i>vritti</i> expressed by the person; operation: authentic presentation of excellence and accessibility in awakening; consequence and evidence: recipients and present development; J/B/D/C/T (D/I)	Locus: <i>vritti</i> and embodied communication; operation: thought that unfolds verity and coexistence; consequence: intelligible exposition; evidence: truthfulness and communicability; J/B/D/C/T (D/I)
Internal dependency	Depends on realised and understood content, <i>chitta</i> for articulation, and <i>mun</i> for honest presentation	Depends on <i>buddhi/chitta</i> for truth and meaning and <i>mun/body</i> for selected expression
Development and orientation	Opportunities to make awakening accessible, receive criticism, and distinguish excellence from fame are supportive	Inquiry, dialogue, linguistic skill, and comparison with reality support development; coexistence governs expression
Expression and consequence	Presentation uses speech, writing, conduct, or demonstration and affects access, reputation, and learner orientation	Exposition changes understanding and later conduct; accessibility and interpretive consequence must remain visible
Evidence and evaluator	Recipients, peers, and affected persons test authenticity, accessibility, and actual developmental effect	Speaker, hearers, knowledgeable peers, and later application test whether verity has been unfolded rather than merely asserted
Correction	Correct exaggeration, exclusion, prestige seeking, or inaccessible form; restore truthful presentation	Clarify concepts, answer objection, revise false or ambiguous expression, and correct conduct inconsistent with thought
Continuity and transmission	Plural evidence-bearers and open access reduce dependence on reputation; records support continuity	Dialogue, records, translation, and learner re-expression transmit thought while leaving it corrigible
External classification and risk	EVID; N-EVD; U-H; I, PROT; S-COR; U-H; I, TRANS; S-CON; U-H; I; risk: fame, approval, publicity, or polished image mistaken for <i>keerti</i>	ENAB; S-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: fluency, novelty, or ideological repetition mistaken for truth-unfolding thought

V-03 - *Nishchaya* / *dhairya*

Field	V-03a - <i>nishchaya</i>	V-03b - <i>dhairya</i>
Normalized location	Locus: <i>vrutti</i> ; operation: continuity of truthful thought toward goal, direction, and purpose; consequence: stable decision; evidence: reasoned persistence; J/B/D/C/E (D/I)	Locus: <i>vrutti</i> ; operation: continuity of just thought; consequence: patient relational judgement; evidence: justice maintained through difficulty; J/D/R/C/T (D/I)
Internal dependency	Depends on <i>buddhi/chitta</i> for truth and intelligible purpose; <i>mun</i> selects acts carrying the determination	Depends on understood justice and <i>chitta</i> meaning; <i>mun</i> carries patient judgement into relationship
Development and orientation	Practice in goal formation, consequence review, and revision supports development; truth and purpose govern	Repeated just evaluation, exposure to conflict, and freedom from forced haste are supportive; justice governs
Expression and consequence	Determination requires appropriate skill and means; consequences reveal whether persistence serves the stated purpose	Patience appears in continued inquiry, protection, and relationship rather than delay or inaction
Evidence and evaluator	Bearer, collaborators, and affected persons compare reasons, consistency, adaptability, and results	Counterparts, affected persons, and impartial peers evaluate whether continuity remains just
Correction	Revise plan, means, or even goal when truth or consequence contradicts it; repair stubborn harm	Correct passivity, procedural delay, tolerance of injustice, or factional bias; restore affected voice
Continuity and transmission	Records of reasons, review points, and protected dissent sustain determination without rigidity	Stable procedures for hearing, reflection, and correction transmit patient justice across persons
External classification and risk	EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I, SUST; S-CON; U-H; I; risk: certainty, obstinacy, loyalty, or persistence alone mistaken for determination	CONST; N-EVD; U-H; I, PROT; S-COR; U-H; I, SUST; S-CON; U-H; I; risk: delay, passivity, or endurance of injustice mistaken for patience

V-04 - *Shanti* / *daya*

Field	V-04a - <i>shanti</i>	V-04b - <i>daya</i>
Normalized location	Locus: <i>vritti</i> ; operation: resolved thought without opposition between desire and thought; consequence: inner coordination; evidence: non-contradictory selection; J , then B/D in evidence (D/I)	Locus: person in relation; operation: non-interference and assistance according to another's receptivity; consequence and evidence: the other's development and agency; D/R/B/T , sometimes C (D/I)
Internal dependency	Depends on <i>buddhi/chitta</i> for resolved meaning; <i>mun</i> reveals whether desire and selection remain consonant	Depends on understanding of awakening and receptivity, <i>vritti</i> judgement, and <i>mun/body</i> for proportionate assistance
Development and orientation	Inquiry into desire, thought, and consequence supports resolution; absence of conflict avoidance as a substitute is necessary	Listening, developmental knowledge, restraint, and practice in adapting content to receptivity are necessary or strongly supportive
Expression and consequence	Peace affects speech, behaviour, work, and the ability to face disagreement without inward opposition	Assistance must preserve the other's inquiry, safety, and agency rather than impose formation
Evidence and evaluator	Bearer assesses non-opposition; counterparts can evaluate whether apparent calm conceals avoidance or coercion	The developing person is indispensable; helper, peers, and later capability provide additional evidence
Correction	Reopen unresolved desire-thought conflict, face avoided consequence, and revise selection	Stop intrusion or neglect, adjust content and timing, restore agency, and protect against harm
Continuity and transmission	Reflective practice and relationships permitting truthful disagreement support continuity	Durable trust, safeguards, succession of competent helpers, and teachable restraint sustain the relation
External classification and risk	EVID; S-EVD; U-H; I, CORR; S-COR; U-H; I; risk: silence, comfort, emotional flatness, or conflict avoidance mistaken for peace	CONST; N-OCC; U-H; I, PROT; N-COR; U-H; I, SUST; S-CON; U-H; I; risk: pity, unsolicited control, permissiveness, or compliance mistaken for kindness

V-05 - *Krupa* / *karuna*

Field	V-05a - <i>krupa</i>	V-05b - <i>karuna</i>
Normalized location	Locus: competent person in relation; operation: establishing receptivity and ability appropriate to content; consequence and evidence: another's awakening-capability; D/R/B/T , sometimes C (D/I)	Locus: helper in relation; operation: inspiring and helping acquisition of ability and receptivity; consequence and evidence: active development of the other; D/R/B/T , sometimes C (D/I)
Internal dependency	Depends on understood content, recognition of the other's state, deliberative proportionality, and selected skill	Depends on the same understanding plus <i>mun</i> 's motivating expression and feedback from the other
Development and orientation	Content mastery, pedagogy, observation of receptivity, and freedom from favour are necessary	Motivational, practical, and relational competence are necessary; the other's awakening rather than helper identity governs
Expression and consequence	Help may include explanation, practice, tools, care, or protected opportunity suited to demonstrated need	Inspiration must become usable opportunity and ability, not emotional arousal or dependency
Evidence and evaluator	Recipient, helper, skilled peers, and later independent capability evaluate fit between content and receptivity	Recipient agency, acquired competence, and ability to continue without the helper are principal evidence
Correction	Adjust content, pace, means, and role; stop help that overwhelms, excludes, or creates dependence	Correct coercive motivation, saviour identity, neglect of means, or inspiration without capability; restore learner agency
Continuity and transmission	Feedback, safeguards, material support, and succession by competence sustain fitting help	Peer support, continuing practice, and future ability to help others transmit compassionate capability
External classification and risk	CONST; N-OCC; U-H; I, ENAB; N-EXP; U-H; I, CORR; N-COR; U-H; I; risk: favour, rescue, patronage, or dependence mistaken for grace	CONST; N-OCC; U-H; I, ENAB; N-EXP; U-H; I, EVID; N-EVD; U-H; I; risk: emotional identification, coercive motivation, or visible effort mistaken for compassion

V-06 - *Dum* / *kshama*

Field	V-06a - <i>dum</i>	V-06b - <i>kshama</i>
Normalized location	Locus: <i>vritti</i> ; operation: ending attachment to decline and dedication to awakening; consequence: self-corrected orientation; evidence: reduced fear, waste, and delusion; J/B/D/E (D/I)	Locus: helper in relation; operation: remaining unaffected by another's decline while assisting awakening; consequence and evidence: steady just help; D/R/B/C/T (D/I)
Internal dependency	Depends on understood awakening and truthful self-evaluation; <i>mun</i> reveals attachments through repeated selection	Depends on <i>dum</i> -like inward steadiness, justice-sensitive deliberation, and selected protective action
Development and orientation	Honest feedback, recognition of decline patterns, and alternatives for humane action are supportive; awakening governs	Experience with conflict, boundaries, protection, and restoration is necessary or supportive; another's awakening governs
Expression and consequence	Release becomes visible in use, consumption, relationship, risk, and willingness to change	Assistance must neither absorb the other's decline nor abandon persons affected by harmful conduct
Evidence and evaluator	Bearer, close counterparts, and material consequences test whether attachment and waste actually diminish	Helper, recipient, harmed parties, and impartial peers evaluate steadiness, protection, and developmental effect
Correction	Identify suppression, self-punishment, relapse, or displaced harm; renew understanding and redesign habit and environment	Set boundaries, stop harm, separate where needed, restore loss, and revise help that enables decline
Continuity and transmission	Supportive relationships, meaningful work, and repeated accountable practice sustain release without causing it	Durable safeguards, shared responsibility, and training in restorative and protective response support continuity
External classification and risk	EVID; N-EVD; U-H; I, CORR; S-COR; U-H; I, SUST; S-CON; U-H; I; risk: repression, austerity, image management, or fear of punishment mistaken for self-release	CONST; N-OCC; U-H; I, PROT; N-COR; U-H; I, CORR; N-COR; U-H; I; risk: condoning harm, passivity, superiority, or endless tolerance mistaken for forgiveness

V-07 - Tatparta / utsah

Field	V-07a - <i>tatparta</i>	V-07b - <i>utsah</i>
Normalized location	Locus: <i>vrutti</i> expressed by the person; operation: readiness and perseverance in awakening, production, humane conduct, and orderliness; consequence and evidence: sustained participation; J/B/D/C/E/T (D/I)	Locus: <i>vrutti</i> ; operation: courageous uplift with awareness of orderliness; consequence and evidence: responsible movement through difficulty; J/B/D/C/T (D/I)
Internal dependency	Depends on understood purpose, <i>chitta</i> planning, <i>vrutti</i> evaluation, and <i>mun/body</i> for continued action	Depends on awareness of orderliness, truthful purpose, and outer-faculty selection and skill
Development and orientation	Real responsibility, productive competence, feedback, and visible purpose are strongly supportive; awakening and humaneness govern	Opportunities for proportionate challenge, dissent, and recovery develop courage; order-awareness governs
Expression and consequence	Perseverance requires skill, tools, health, cooperation, and material access according to task	Courage becomes action under risk, affecting collaborators, dependants, and shared processes
Evidence and evaluator	Bearer, co-participants, users, and affected persons evaluate steadiness, usefulness, and humaneness	Bearer, collaborators, and affected persons distinguish courageous uplift from impulsive risk or aggression
Correction	Revise plan, workload, means, or role when perseverance becomes waste, compulsion, or harm	Reassess risk, protect vulnerable participants, correct bravado or avoidance, and repair reckless effects
Continuity and transmission	Health, rest, maintained means, shared purpose, and succession sustain readiness	Supportive challenge, exemplars, reflection on failure, and distributed responsibility transmit courage
External classification and risk	ENAB; N-EXP; U-H; I, SUST; S-CON; U-H; I, CORR; S-COR; U-H; I; risk: busyness, compliance, overwork, or output mistaken for readiness	ENAB; S-EXP; U-H; I, PROT; S-COR; U-H; I, EVID; N-EVD; U-H; I; risk: excitement, morale, recklessness, or aggression mistaken for <i>utsah</i>

V-08 - *Kritagyata* / *saumyata*

Field	V-08a - <i>kritagyata</i>	V-08b - <i>saumyata</i>
Normalized location	Locus: <i>vritti</i> in relation; operation: recognition of help in development and awakening; consequence and evidence: truthful acknowledgement and reciprocal conduct; J/D/R/C/T (D/I)	Locus: <i>vritti</i> and embodied demeanour; operation: voluntary self-restraint and civility; consequence and evidence: conduct before others; J/B/D/C/T (D/I)
Internal dependency	Depends on memory and recognition of contribution, truth-sensitive deliberation, and <i>mun</i> for expression	Depends on understood humaneness, deliberative restraint, and <i>mun</i> 's selected speech and action
Development and orientation	Transparent histories of contribution, freedom from imposed indebtedness, and opportunities to reciprocate are supportive	Practice in disagreement, power use, and self-correction without fear supports development; voluntariness governs
Expression and consequence	Acknowledgement may include speech, credit, reciprocal help, and refusal to appropriate another's work	Civility appears in tone, timing, use of power, and treatment of persons while preserving truth and dissent
Evidence and evaluator	Contributor, recipient, and knowledgeable participants evaluate whether actual help is recognised proportionately	Bearer and counterparts evaluate whether restraint is voluntary, civil, truthful, and non-submissive
Correction	Correct omitted contributors, coerced gratitude, false credit, patronage, or indebted submission	Correct imposed docility, avoidance, concealed hostility, or self-erasure; restore clear disagreement and boundaries
Continuity and transmission	Records, public credit, and reciprocal practice sustain recognition across time	Exemplarity, protected speech, and norms permitting civil dissent transmit voluntary restraint
External classification and risk	EVID; N-EVD; U-H; I , CORR; S-COR; U-H; I , TRANS; S-CON; U-H; I ; risk: ceremonial thanks, loyalty, debt, or flattery mistaken for gratitude	EVID; N-EVD; U-H; I , PROT; S-EXP; U-H; I , TRANS; S-CON; U-H; I ; risk: fear, politeness, silence, or subordination mistaken for civility

V-09 - *Gaurav* / *saralta*

Field	V-09a - <i>gaurav</i>	V-09b - <i>saralta</i>
Normalized location	Locus: <i>vritti</i> in relation to an exemplar; operation: willing emulation; consequence and evidence: adopted conduct; J/D/R/C/T with exemplar criterion O	Locus: <i>vritti</i> and embodied demeanour; operation: conduct without knots, complexity, or tension; consequence and evidence: straightforward relationship and work; J/B/D/C (D/I)
Internal dependency	Depends on <i>buddhi/chitta</i> for judging worthiness and <i>mun</i> for selective emulation; source does not supply the criterion	Depends on understood purpose, resolved thought, and <i>mun</i> 's uncontrived expression
Development and orientation	Access to multiple exemplars, reasons, consequences, and freedom to reject status claims is necessary for valid orientation	Secure opportunity for clear speech, simple process, and correction supports development; truth and humaneness constrain simplicity
Expression and consequence	Emulation affects identity, conduct, role, and others exposed to the copied pattern	Simplicity affects communication, coordination, burden, and access without eliminating necessary complexity
Evidence and evaluator	Bearer, affected persons, and informed peers evaluate the exemplar and actual result of emulation	Bearer and counterparts test clarity, accessibility, tension, and whether omitted complexity causes harm
Correction	Challenge unworthy exemplars, prestige bias, imitation without understanding, and harmful copied conduct	Reintroduce necessary nuance, expose concealed conflict, simplify avoidable procedure, and repair naive action
Continuity and transmission	Transparent exemplar conduct and plural review sustain responsible emulation	Clear language, teachable process, and freedom to name complexity transmit simplicity without dogma
External classification and risk	EVID; N-EVD; U-H; I , PROT; N-COR; U-H; I ; risk: rank, celebrity, group loyalty, or deference mistaken for worthy emulation; governing criterion remains O	ENAB; S-EXP; U-H; I , EVID; N-EVD; U-H; I ; risk: naivety, compliance, lack of discernment, or oversimplification mistaken for straightforwardness

V-10 - *Vishwas / saujanyata*

Field	V-10a - <i>vishwas</i>	V-10b - <i>saujanya</i>
Normalized location	Locus: persons in recognised mutuality; operation: fulfilment of inherent values and communication of resolution; consequence and evidence: mutual satisfaction and dependable conduct; D/R/C/T (D/I)	Locus: co-participants; operation: collaboration, cooperation, and complementarity; consequence and evidence: shared purpose fulfilled through differentiated contribution; D/R/C/B/E/T (D/I)
Internal dependency	Depends on relationship recognition, understood values, deliberative evaluation, and <i>mun</i> 's selected fulfilment	Depends on shared purpose, <i>chitta</i> planning, <i>vrutti</i> role judgement, and <i>mun/body</i> for cooperative performance
Development and orientation	Repeated value-fulfilment, truthful expectation, voice, and repair develop trust; mutual values govern rather than predictability	Practice in shared work, role negotiation, and feedback develops cooperation; complementarity rather than conformity governs
Expression and consequence	Trust appears through recognised expectations, reliable fulfilment, communication, and freedom from exploitation	Coordination requires competence, access to means, communication, and fair relation to result and burden
Evidence and evaluator	Each counterpart is indispensable; affected third parties and repeated conduct test whether satisfaction is mutual	Co-participants, users, and affected persons evaluate contribution, agency, burden, and shared fulfilment
Correction	Name violated expectations, protect voice, restore value where possible, and prevent repetition or retaliation	Renegotiate roles, retrain, redistribute means and burden, correct coercion, and repair failed contribution
Continuity and transmission	Durable truthful relationship, remembered repair, and protection from domination sustain trust	Maintained competence, role succession, shared records, and participatory learning sustain cooperation
External classification and risk	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: dependence, loyalty, silence, or predictable obedience mistaken for trust	CONST; N-EXP; U-H; I, ENAB; N-EXP; U-H; I, SUST; S-CON; U-H; I; risk: compliance, task aggregation, forced coordination, or output mistaken for concordance

V-11 - *Satya* / *dharma*

Field	V-11a - <i>satya</i>	V-11b - <i>dharma</i>
Normalized location	Locus: existence as reality-content and <i>vritti</i> as its acceptance; operation: discrimination of what remains existent and realisable; consequence and evidence: claims and conduct across time; J/B/C/E/T (D/I/O)	Locus: a unit as inseparable essential nature and <i>vritti</i> as recognition; operation: discrimination of innateness; consequence and evidence: conduct fitted to the unit; J/B/D/C/E/T (D/I/O)
Internal dependency	Depends on realisation and enlightenment for criterion, <i>chitta</i> for conception, and <i>vritti</i> for comparison; truth is not produced by the activity	Depends on truthful recognition of the unit, whole-sensitive contemplation, and analysis; <i>mun</i> carries recognition into treatment
Development and orientation	Access to claims, objects, history, consequences, and correction is supportive or necessary for warranted acceptance	Study of units across conditions, comparison of separable and inseparable properties, and freedom from imposed duty support recognition
Expression and consequence	Truth-directed acceptance shapes statement, judgement, work, and treatment of persons and nature	Recognised innateness guides design and relationship; misclassification can distort roles, use, and protection
Evidence and evaluator	Appropriate first-person, relational, empirical, and historical evaluators test claims according to their object	Bearer, knowledgeable peers, the unit's observed continuity, and affected persons test the claimed innateness
Correction	Revise assertion, convention, observation, or interpretation when existence and realisability do not support it	Distinguish essential nature from stereotype, assigned rule, or temporary state; repair conduct based on false attribution
Continuity and transmission	Open records, repeatable inquiry, and preserved disagreement sustain access to truth claims	Comparative cases, clear definitions, and revisable teaching transmit recognition of innateness
External classification and risk	EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I , TRANS; S-CON; U-H; I ; risk: assertion, consensus, permanence, or institutional doctrine mistaken for truth; activity grammar remains O	EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: imposed duty, social identity, stereotype, or rule mistaken for inseparable nature; activity grammar remains O

V-12 - *Nyaya* / *samvedna*

Field	V-12a - <i>nyaya</i>	V-12b - <i>samvedna</i>
Normalized location	Locus: <i>vritti</i> in a recognised relationship; operation: expectation, value-fulfilment, evaluation, and mutual satisfaction; consequence and evidence: both counterparts and affected relations; J/D/R/C/T (D/I)	Locus: <i>vritti</i> expressed by the person; operation: responsive participation with others under justice, <i>dharma</i> , and truth; consequence and evidence: persons, society, and nature; J/B/D/R/C/E/T (D/I)
Internal dependency	Depends on understanding of relationship and values, <i>chitta</i> for meaning, and <i>mun</i> for value-bearing selection	Depends on just deliberation, recognition of <i>dharma</i> and truth, and <i>mun/body</i> for proportionate response
Development and orientation	Relationship literacy, opportunities to fulfil values, and protected dialogue are necessary or strongly supportive; mutual satisfaction governs	Exposure to others' conditions, material consequences, and disciplined response develops sensitivity; justice, <i>dharma</i> , and truth govern
Expression and consequence	Value-fulfilment requires reciprocal conduct, time, communication, and conditions in which neither party is forced into silence	Responsive conduct requires bodily availability, attention, practical means, and access to affected persons and natural fields
Evidence and evaluator	Both counterparts are necessary evaluators; skilled or public review enters where power, incapacity, or third-party harm distorts direct evaluation	Bearer, counterparts, affected persons, and relevant empirical or ecological observers evaluate response and consequence
Correction	Dialogue and changed fulfilment are primary; protection, appeal, restoration, or separation are required where direct reciprocity fails	Correct inattention, reactive excess, paternalism, or selective concern; restore voice, repair harm, and revise response
Continuity and transmission	Durable relationships, memory of commitments, safeguards, and education in values sustain justice	Repeated participation, plural contact, correction, and intergenerational learning sustain responsive sensitivity
External classification and risk	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, PROT/CORR; N-COR; U-H; I; risk: compliance, unilateral satisfaction, procedure, or absence of complaint mistaken for justice	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: emotion, reactivity, pity, or selective identification mistaken for right sensitivity

V-13 - *Tadatmayata* / *sahas*

Field	V-13a - <i>tadatmayata</i>	V-13b - <i>sahas</i>
Normalized location	Locus: <i>vritti</i> ; operation: decision made with acceptance toward eternalness; consequence: stable orientation; evidence: conduct consonant with the decision; J/B/D/C/T (D/I)	Locus: person in embodied work and behaviour; operation: cheerful endurance; consequence and evidence: sustained humane action through difficulty; J/B/D/C/E/T (D/I)
Internal dependency	Depends on enlightenment and contemplation of eternalness; <i>mun</i> reveals whether decision governs selection	Depends on understood humane purpose, stable decision, and <i>mun/body</i> for continued conduct
Development and orientation	Inquiry into eternal and temporary content, reasoned decision, and freedom from identity pressure are supportive	Proportionate challenge, skill, support, and reflection on fear develop courage; humane purpose governs
Expression and consequence	Decision becomes evident in consistent choice without erasing new evidence or legitimate difference	Work and behaviour require health, competence, means, and awareness of risks borne by self and others
Evidence and evaluator	Bearer, interlocutors, and affected persons evaluate stability, reasons, and openness to truth	Bearer, collaborators, and affected persons evaluate endurance, happiness, justice, and outcome
Correction	Separate acceptance from fusion, conformity, or identity defence; revise misidentified eternal content	Stop risk-seeking, domination, or needless endurance; correct plan, means, workload, and harm
Continuity and transmission	Continuing inquiry and conduct across changing circumstances sustain the decision	Practice, exemplars, shared responsibility, and recovery after failure transmit courageous capability
External classification and risk	EVID; N-EVD; U-H; I , PROT; S-COR; U-H; I ; risk: conformity, intensity, identity, or inflexibility mistaken for <i>tadatmayata</i>	ENAB; N-EXP; U-H; I , PROT; S-COR; U-H; I , SUST; S-CON; U-H; I ; risk: danger seeking, stoicism, domination, or endurance of injustice mistaken for courage

V-14 - *Samyama* / *niyam*

Field	V-14a - <i>samyama</i>	V-14b - <i>niyam</i>
Normalized location	Locus: person across thought, behaviour, and vocation; operation: humane self-regulation; consequence and evidence: coherent conduct and work; J/B/D/C/E/T (D/I)	Locus: self-regulated person in wider participation; operation: spontaneous participation in overall orderliness; consequence and evidence: coordinated common activity; J/B/D/R/C/E/T (D/I)
Internal dependency	Depends on realised humaneness, <i>buddhi/chitta</i> meaning, <i>vrutti</i> evaluation, and <i>mun</i> selection	Depends on <i>samyama</i> , understanding of whole order, and outer-faculty competence for participation
Development and orientation	Real responsibility, bodily discipline, relationship feedback, and meaningful vocation support development; humaneness governs	Opportunities for self-directed participation, consequence visibility, and dissent support development; overall orderliness governs
Expression and consequence	Regulation appears in consumption, speech, relationship, work, and use without external compulsion	Participation requires skill, access, cooperation, shared means, and coordination across affected fields
Evidence and evaluator	Bearer, close counterparts, coworkers, users, and ecological consequence evaluate humaneness across fields	Co-participants and affected persons evaluate agency, complementarity, wider effect, and absence of domination
Correction	Identify repression, addiction, self-display, or humane language masking harm; revise habit and conditions	Correct mere compliance, central control, free-riding, exclusion, or local success with wider harm
Continuity and transmission	Healthy routines, material sufficiency, truthful feedback, and repeatable self-correction sustain regulation	Participatory learning, role succession, shared evidence, and correction across scales sustain self-ordering
External classification and risk	EVID; N-EVD; U-H; I , ENAB; S-CON; U-H; I , CORR; S-COR; U-H; I ; risk: repression, austerity, appearance, or rule-following mistaken for restraint	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , SUST; N-CON; U-H; I ; risk: administrative regulation, conformity, or coordinated output mistaken for spontaneous participation

V-15 - *Veerta* / *dheerta*

Field	V-15a - <i>veerta</i>	V-15b - <i>dheerta</i>
Normalized location	Locus: capable person in relationship; operation: deploying physical and intellectual powers to make justice available to another; consequence and evidence: protected access to justice; J/B/D/R/C/T (D/I)	Locus: <i>vritti</i> ; operation: dedication and firmness toward justice; consequence and evidence: sustained just action; J/B/D/R/C/T (D/I)
Internal dependency	Depends on recognition of justice, deliberative judgement, resolve, and <i>mun/body</i> for proportionate intervention	Depends on understood justice and <i>buddhi</i> resolve; <i>mun</i> carries firmness into selected conduct
Development and orientation	Knowledge of injustice, protection, nonviolent and proportionate means, skill, and accountability are necessary or supportive	Repeated just judgement, exposure to pressure, and freedom from factional capture support firmness
Expression and consequence	Intervention requires capability, access, coordination, safeguards, and visibility of risks to all affected persons	Firmness appears in continued protection and correction, not only in thought or declaration
Evidence and evaluator	The person needing justice, harmed parties, impartial peers, and consequence evaluate effectiveness and proportionality	Affected persons and independent evaluators test whether persistence remains justice-directed
Correction	Stop excessive force or paternalism, repair intervention harm, revise strategy, and restore the affected person's agency	Correct rigidity, factional loyalty, delay, or endurance for its own sake; reopen evidence and reasons
Continuity and transmission	Protective capacity, independent review, distributed skill, and succession sustain access beyond one hero	Records, review, exemplarity, and protected dissent sustain justice-oriented firmness
External classification and risk	CONST; N-OCC; U-H; I , ENAB; N-EXP; U-H; I , PROT/CORR; N-COR; U-H; I ; risk: force, victory, rescue identity, or loyalty mistaken for heroism	EVID; N-EVD; U-H; I , PROT; S-CON; U-H; I , CORR; N-COR; U-H; I ; risk: stubbornness, factional persistence, or punishment mistaken for firmness

V-16 - *Bhav* / *samveg*

Field	V-16a - <i>bhav</i>	V-16b - <i>samveg</i>
Normalized location	Locus: <i>vritti</i> ; operation: recognition of essentiality as value, responsibility, and participation; consequence and evidence: value-bearing relation and conduct; J/D/R/C/E/T (D/I)	Locus: person or process in conjunction; operation: impetus arising from meaningful joining; consequence and evidence: directed motion; B/D/C/E/T (D/I/O)
Internal dependency	Depends on truthful recognition of the unit, <i>chitta</i> meaning, and <i>mun</i> for responsible participation	Depends on <i>bhav</i> or another understood purpose for direction, <i>chitta</i> planning, and <i>mun/body</i> for motion; correct conjunction remains open
Development and orientation	Relationship and ecological literacy, opportunities for responsibility, and consequence feedback support value recognition	Experience in cooperation, causal relation, and momentum management supports capability; meaningful purpose must govern the joining
Expression and consequence	Responsibility requires participation, means, role clarity, and awareness of costs to related units	Joining persons, tools, resources, or processes can amplify action and distribute both benefit and harm
Evidence and evaluator	Related persons, knowledgeable peers, and affected material or ecological fields evaluate whether essentiality is recognised	Participants and affected persons evaluate origin, direction, controllability, and consequence of momentum
Correction	Correct sentiment without responsibility, imposed value, token participation, or use that violates the unit	Interrupt harmful momentum, separate coercive conjunction, change direction or coupling, and repair amplified effects
Continuity and transmission	Stable relationship, remembered responsibility, and participatory competence sustain value-bearing action	Maintained coordination, safe disengagement, shared skill, and review sustain useful impetus
External classification and risk	CONST; N-OCC; U-H; I , EVID; N-EVD; U-H; I , TRANS; S-CON; U-H; I ; risk: emotion, rhetoric, nominal responsibility, or symbolic participation mistaken for <i>bhav</i>	CONST; N-EXP; U-H; I , PROT/CORR; N-COR; U-H; I ; risk: arousal, crowd motion, compulsion, or efficiency mistaken for meaningful impetus; governing direction remains O

V-17 - *Jati* / *kaal*

Field	V-17a - <i>jati</i>	V-17b - <i>kaal</i>
Normalized location	Locus: units as kind/configuration and <i>vritti</i> as discrimination; operation: recognition of unity, diversity, form, property, nature, and <i>dharma</i> ; evidence: cases and consequences; J/B/C/E/T (D/I/O)	Locus: activity or process as duration and <i>vritti</i> as discrimination; operation: recognition of temporal extent; evidence: observed beginning, continuation, and end; J/B/C/E/T (D/I/O)
Internal dependency	Depends on <i>chitta</i> representation, truthful analysis, and sensory or recorded evidence; the content is not a social classification act by default	Depends on <i>chitta</i> memory/representation and <i>vritti</i> comparison; body and records mediate duration evidence
Development and orientation	Diverse cases, material access, explicit criteria, and correction of inherited categories are necessary for reliable classification	Timekeeping skill, repeated observation, records, and attention to scale support reliable duration discrimination
Expression and consequence	Classification guides identification, comparison, design, and treatment; social misuse can create exclusion	Duration estimates guide coordination, maintenance, care, production, and ecological judgement
Evidence and evaluator	Skilled observers and affected persons compare categories with actual commonalities, differences, and consequences	Observers, participants, records, and instruments compare stated duration with the process itself
Correction	Revise category boundaries, remove rank and stereotype, admit mixed cases, and repair discriminatory use	Reobserve, change temporal grain, correct clock or record error, and account for delayed or cyclical effects
Continuity and transmission	Reference cases and revisable taxonomies sustain discrimination without freezing kinds	Maintained records, instruments, and intergenerational observation sustain temporal knowledge
External classification and risk	EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: caste, rank, stereotype, nominal class, or superficial form mistaken for actual kind; pair rationale remains O	EVID; N-EVD; U-H; I , SUST; S-CON; U-H; I ; risk: schedule, impatience, short observation, or clock value mistaken for the process's relevant duration; pair rationale remains O

V-18 - *Tushti / pushti*

Field	V-18a - <i>tushti</i>	V-18b - <i>pushti</i>
Normalized location	Locus: <i>vritti</i> recognising fulfilment across person, durable shared life, provision, and wider participation; consequence and evidence: resolution, prosperity, society, nature; J/B/R/C/E/T (D/I)	Locus: continuing evaluative and transmissive activity; operation: inspection, confirmation, continuity, and dissemination of fulfilment; consequence and evidence: present and later participants; J/B/R/C/E/T (D/I)
Internal dependency	Depends on understanding, value-fulfilling selection, and coordination across all faculties; no single outer result is sufficient	Depends on <i>nireekshan</i> , deliberative examination, realised criteria, communicative capacities, and <i>mun/body</i> for dissemination
Development and orientation	Understanding, close relational fulfilment, productive competence, and real public participation are necessary across the definition	Shared criteria, inspection skill, records, learner participation, and freedom to question are necessary
Expression and consequence	Daily conduct, shared provision, useful work, and wider participation must remain visible across persons, nature, and time	Inspection, examination, communication, teaching, and reproduction require access to contradiction, exclusion, depletion, and delayed effects
Evidence and evaluator	Bearer, close participants, affected persons, competent investigators, and future participants contribute convergent evidence	Independent and participatory review against explicit criteria is necessary; organisational self-report is insufficient
Correction	Revise conduct, relationship, production, participation, or criterion wherever convergence fails	Preserve dissent and records, redesign, restore harm, re-teach, and retest reproduction
Continuity and transmission	Durable relations, reserve, maintenance, role continuity, and public participation sustain fulfilment	Repeated review, evidence preservation, competent succession, and ecological continuity are constitutive to confirmation
External classification and risk	CONST; N-EVD; U-H; I, EVID; N-EVD; U-H; I, SUST; N-CON; U-H; I; risk: private satisfaction, affluence, local harmony, or favourable report mistaken for multi-scale fulfilment	EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I, TRANS/SUST; N-CON; U-H; I; risk: propaganda, longevity, replication, or dissemination mistaken for confirmation

5. *Mun*: sixty-four member records

M-01 - *Bhakti* / *tanmayata*

Field	M-01a - <i>bhakti</i>	M-01b - <i>tanmayata</i>
Normalized location	Locus: <i>mun</i> expressed by the person; operation: fearless, delusion-free dedication combining prayer, service, communication, and exposition; consequence and evidence: persons served and awakening-directed conduct; J/B/D/C/T (D/I)	Locus: <i>mun</i> ; operation: focused immersion in the effect of awakening toward a definite goal; consequence: sustained direction; evidence: judgement and conduct retained within dedication; J/B/D/T (D/I)
Internal dependency	Depends on realisation and understanding for freedom from delusion, <i>chitta/vritti</i> for meaningful service, and <i>mun</i> for selection	Depends on definite awakened content and direction from inward faculties; <i>vritti</i> must retain discrimination within focus
Development and orientation	Inquiry, opportunities for service, communicative practice, and freedom from fear-based authority are strongly supportive	Clear purpose, sustained attention, feedback, and freedom to question the source of direction support development
Expression and consequence	Service and exposition require skill, time, bodily means, and access to recipients; effects on agency must remain visible	Immersion concentrates effort and can affect relationships, health, and judgement; boundaries and consequence visibility are necessary
Evidence and evaluator	Bearer, persons served, knowledgeable peers, and conduct across contexts evaluate freedom from delusion and usefulness	Bearer, close counterparts, and peers evaluate purpose fidelity, retained judgement, and absence of manipulation
Correction	Correct submission, ritual repetition, saviour identity, fear, or service that creates dependency; restore inquiry	Interrupt coercive absorption, charisma dependence, neglect, or loss of discernment; revisit goal and direction
Continuity and transmission	Voluntary service, plural guidance, open inquiry, and shared competence sustain dedication	Reflective practice, accountable guidance, rest, and transferable methods sustain focus without personal dependency

Field	M-01a - <i>bhakti</i>	M-01b - <i>tanmayata</i>
External classification and risk	ENAB; S-EXP; U-H; I , EVID; N-EVD; U-H; I , PROT; N-COR; U-H; I ; risk: obedience, ritual, identity, fear, or self-sacrifice mistaken for devotion	ENAB; S-CON; U-H; I , PROT; N-COR; U-H; I , EVID; N-EVD; U-H; I ; risk: absorption, charisma, tunnel vision, or loss of agency mistaken for immersion

M-02 - *Mamta / udarta*

Field	M-02a - <i>mamta</i>	M-02b - <i>udarta</i>
Normalized location	Locus: person in close relationship; operation: affinity expressed as nurturing and protection; consequence and evidence: another's capability and continuity; D/R/B/T , sometimes C/E (D/I)	Locus: capable person in relation; operation: joyful offering of body, mind, and material means according to another's need; consequence and evidence: awakening, health, and prosperity; B/D/R/C/E/T (D/I)
Internal dependency	Depends on recognition of the other, understood care, deliberative proportion, and <i>mun/body</i> for nurturing action	Depends on resolution and prosperity, need-sensitive deliberation, and <i>mun</i> for non-possessive giving
Development and orientation	Care knowledge, truthful relationship, feedback, and respect for agency are necessary or strongly supportive	Need assessment, productive competence, boundaries, and right-use knowledge develop generosity; the other's capability governs
Expression and consequence	Care requires time, attention, skill, provision, protection, and restraint from control	Giving changes dependency, access, workload, and power; useful means must reach the recipient without domination
Evidence and evaluator	The cared-for person is indispensable; caregiver, skilled peers, and later independence add evidence	Recipient, giver, affected household or group, and practical outcomes evaluate need, right use, and capability
Correction	Repair neglect, possession, indulgence, overprotection, or silenced need; restore agency and fit	Correct patronage, display, indiscriminate giving, dependency, or displaced burden; revise amount, means, and role
Continuity and transmission	Durable responsibility, respite, shared care, material support, and succession sustain nurturing	Productive continuity, transparent allocation, reciprocal participation, and learned giving sustain generosity

Field	M-02a - <i>mamta</i>	M-02b - <i>udarta</i>
External classification and risk	CONST; N-OCC; U-H; I , PROT; N-COR; U-H; I , SUST; N-CON; U-H; I ; risk: possession, indulgence, control, or sentiment mistaken for affinity-care	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , SUST; S-CON; U-H; I ; risk: charity display, patronage, excess, or sacrifice mistaken for generosity

M-03 - *Samman / sauhardta*

Field	M-03a - <i>samman</i>	M-03b - <i>sauhardta</i>
Normalized location	Locus: person in relation; operation: balanced recognition of another's personality, talent, excellence, and clarity; consequence and evidence: acknowledged person and shared conduct; D/R/C/T (D/I)	Locus: <i>mun</i> expressed in communication; operation: presenting accepted conception, realisation, memory, and articulation without alteration; consequence and evidence: recipient understanding; J/B/D/C/T (D/I/O)
Internal dependency	Depends on truthful observation, relationship recognition, and <i>vritti</i> discrimination; <i>mun</i> selects balanced acknowledgement	Depends on accepted content, <i>chitta</i> memory and articulation, <i>vritti</i> fidelity, and <i>mun/body</i> for communication
Development and orientation	Opportunities to know another's actual capability, challenge bias, and give proportionate credit are supportive	Dialogue, recall, paraphrase, and correction by hearers develop faithful presentation; accepted truth governs
Expression and consequence	Recognition appears in speech, opportunity, responsibility, credit, and treatment without fixing the person in a role	Presentation affects trust and understanding; omissions, embellishment, and mistranslation must remain visible
Evidence and evaluator	The recognised person, informed peers, and resulting opportunity evaluate accuracy and balance	Speaker, recipients, and knowledgeable peers compare presentation with accepted content and consequences
Correction	Correct rank bias, flattery, token praise, stereotyping, or denied capability; restore truthful recognition	Correct selective reporting, agreeable distortion, memory error, or translation error; disclose uncertainty

Field	M-03a - <i>samman</i>	M-03b - <i>sauhardta</i>
Continuity and transmission	Repeated observation, fair attribution, and review of changing capability sustain recognition	Records, repeat presentation, and learner restatement sustain fidelity when the <i>shruti</i> translation variant remains explicit
External classification and risk	CONST; N-EVD; U-H; I, EVID; N-EVD; U-H; I, CORR; S-COR; U-H; I; risk: rank, prestige, praise, or politeness mistaken for respect	ENAB; S-EXP; U-H; I, EVID; N-EVD; U-H; I, TRANS; S-CON; U-H; I; risk: warmth, agreement, fluency, or selective repetition mistaken for faithful communication; lexical issue remains O

M-04 - *Sneha / nishtha*

Field	M-04a - <i>sneha</i>	M-04b - <i>nishtha</i>
Normalized location	Locus: persons in just relationship; operation: voluntary meeting without resistance toward mutual satisfaction; consequence and evidence: continued justice and reciprocity; D/R/T , sometimes C (D/I)	Locus: <i>mun</i> expressed through the person; operation: sustained endeavour to attain and evidence complete awakening; consequence and evidence: conduct across fields; J/B/D/C/E/T (D/I)
Internal dependency	Depends on recognition of relationship and justice, <i>vritti</i> evaluation, and <i>mun</i> 's willing selection	Depends on definite conception and remembrance, inward resolve, <i>vritti</i> assessment, and <i>mun/body</i> for endeavour
Development and orientation	Repeated just interaction, consent, truthful disagreement, and repair develop affection; mutual satisfaction governs	Study, practice, meaningful responsibility, and access to consequences support dedication; complete awakening governs
Expression and consequence	Affection requires voluntary presence, value-fulfilment, boundaries, and non-favouring conduct	Endeavour appears in work, behaviour, inquiry, and willingness to revise, affecting persons and material fields
Evidence and evaluator	Both counterparts evaluate voluntariness, justice, and satisfaction; absence of conflict is insufficient	Bearer, counterparts, peers, and practical consequences evaluate sustained goal fidelity and awakening evidence

Field	M-04a - <i>sneha</i>	M-04b - <i>nishtha</i>
Correction	Correct attachment, avoidance of disagreement, favouritism, coercive closeness, or relationship neglect	Correct loyalty to person or slogan, overwork, selective evidence, and persistence without awakened criterion
Continuity and transmission	Durable reciprocal relation, remembered repair, and freedom to withdraw from injustice sustain affection	Remembrance, practice, shared inquiry, rest, and succession by competence sustain dedication
External classification and risk	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I ; risk: attachment, proximity, harmony, or aversion to conflict mistaken for affection	ENAB; S-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; S-CON; U-H; I ; risk: loyalty, identity, endurance, or repeated activity mistaken for dedication

M-05 - *Putra-putri / anurag*

Field	M-05a - <i>putra-putri</i>	M-05b - <i>anurag</i>
Normalized location	Locus: child in parent-child relation; operation: recognition of generation and parental complementarity in care, capability, education, and knowledge; consequence and evidence: reciprocal relationship; D/R/B/T (D/I/O)	Locus: person in recognised relationships; operation: delusion-free fulfilment of inherent values; consequence and evidence: mutual relational fulfilment; J/D/R/C/T (D/I)
Internal dependency	Depends on memory and knowledge of contribution, relationship recognition, and justice-sensitive selection	Depends on understanding of relationship and value, <i>uritti</i> evaluation, and <i>mun/body</i> for fulfilment
Development and orientation	Truthful family history, freedom from demanded obedience, and opportunities for reciprocal value-fulfilment are necessary or supportive	Relationship literacy, repeated fulfilment, and correction of attachment develop value-oriented immersion
Expression and consequence	Recognition appears through appropriate values, participation, care, and honest evaluation without inherited subordination	Value-fulfilment affects each counterpart, wider responsibilities, and continuity of relationship

Field	M-05a - <i>putra-putri</i>	M-05b - <i>anurag</i>
Evidence and evaluator	Child and parent perspectives, actual history, and current conduct evaluate recognition; mixed source syntax remains visible	Each counterpart and affected persons evaluate recognised values and mutual fulfilment
Correction	Correct false history, filial coercion, denial of harm, role entitlement, or imported exclusive duties	Correct emotional intensity without value, exclusivity, possessiveness, or fulfilment claimed by one side alone
Continuity and transmission	Ongoing truthful relation, changed responsibilities, and intergenerational dialogue sustain the role without freezing authority	Repeated value-fulfilment and explicit teaching through conduct transmit relational capability
External classification and risk	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, PROT; N-COR; U-H; I; risk: biological fact, obedience, guilt, or parental authority mistaken for child-role fulfilment; wording remains O	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, SUST; S-CON; U-H; I; risk: attachment, intensity, exclusivity, or sentiment mistaken for relational value-fulfilment

M-06 - *Sathi / dayitva*

Field	M-06a - <i>sathi</i>	M-06b - <i>dayitva</i>
Normalized location	Locus: person-role in fulfilled relationship; operation: companionship or guidance grounded in self-knowledge and comprehensive resolution; consequence and evidence: other persons in relationship; J/D/R/C/T (D/I/O)	Locus: person across behaviour, vocation, and orderliness; operation: civilised conduct with realised values; consequence and evidence: persons and processes affected; J/B/D/R/C/E/T (D/I)
Internal dependency	Depends on realisation, resolution, relationship recognition, and value-bearing selection	Depends on realised values, deliberative judgement, and <i>mun/body</i> for responsible action across fields
Development and orientation	Mutual inquiry, actual relationship-fulfilment, and freedom from title-based authority support the role	Real responsibility, role clarity, consequence feedback, and practice across relationship and work develop responsibility

Field	M-06a - <i>sathi</i>	M-06b - <i>dayitva</i>
Expression and consequence	Companionship appears in reciprocal understanding, guidance without possession, and fulfilled values	Responsibility requires competence, access to means, participation, and acceptance of consequence
Evidence and evaluator	Companions and affected persons evaluate resolution, reciprocity, and fulfilment; title cannot establish the role	Counterparts, coworkers, users, and public or ecological effects evaluate realised value and civility
Correction	Correct domination, dependency, self-appointed mastery, or the <i>sathi/swami</i> lexical drift; restore mutuality	Correct assigned duty without value, compliance, evasion, or fragmented responsibility; repair effects
Continuity and transmission	Durable truthful companionship, role revision, and succession by demonstrated fulfilment sustain the function	Records of commitment, competence development, distributed responsibility, and review sustain accountable conduct
External classification and risk	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, PROT; N-COR; U-H; I; risk: title, ownership, authority, or dependence mistaken for companionship; lexical variant remains O	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: assigned obligation, compliance, workload, or office mistaken for responsibility

M-07 - *Sahyogi* / *kartavya*

Field	M-07a - <i>sahyogi</i>	M-07b - <i>kartavya</i>
Normalized location	Locus: cooperative participant-role; operation: accepted joint movement toward resolution and useful production; consequence and evidence: guide, coworkers, users, and material result; B/D/C/E/T (D/I)	Locus: person in relationships and associations; operation: fulfilment of inherent values at each level; consequence and evidence: counterparts and shared order; D/R/C/T , with B/E by action (D/I)
Internal dependency	Depends on understood purpose, deliberative role judgement, <i>chitta</i> planning, and <i>mun/body</i> for competent contribution	Depends on relationship recognition, understood values, and <i>mun</i> 's selected value-bearing conduct

Field	M-07a - <i>sahyogi</i>	M-07b - <i>kartavya</i>
Development and orientation	Apprenticeship, shared purpose, real voice, productive skill, and freedom from labour extraction are necessary or supportive	Relationship literacy, explicit expectations, and opportunities for mutual evaluation support development
Expression and consequence	Cooperation requires role clarity, means, safe work, communication, and fair relation to result	Duty appears as value-fulfilment rather than task completion and affects every recognised counterpart
Evidence and evaluator	Co-participants, users, and affected material fields evaluate agency, competence, complementarity, and result	Each counterpart and affected group evaluate whether inherent values are fulfilled across scales
Correction	Renegotiate role, retrain, redistribute burden, protect dissent, and repair exploitative or failed cooperation	Correct role obedience, omitted relationships, conflicting responsibilities, and one-sided claims of fulfilment
Continuity and transmission	Maintained skill, shared tools, role succession, and participatory governance sustain cooperation	Remembered commitments, value education, appeal, and succession of responsible participants sustain duty
External classification and risk	CONST; N-EXP; U-H; I, ENAB; N-EXP; U-H; I, SUST; S-CON; U-H; I ; risk: following, compliance, labour extraction, or coordinated output mistaken for cooperation	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I ; risk: assigned task, role obedience, or institutional demand mistaken for value-bearing duty

M-08 - *Svayatta / samriddhi*

Field	M-08a - <i>svayatta</i>	M-08b - <i>samriddhi</i>
Normalized location	Locus: person in shared provisioning relation; operation: experienced certainty of dependable sufficiency; consequence and evidence: needs, capabilities, use, and reserve; J/B/R/C/E/T (D/I)	Locus: material condition produced through embodied participation; operation: production beyond assessed need; consequence and evidence: workers, users, provision, and nature; B/R/C/E/T (D/I)
Internal dependency	Depends on understood finite need, <i>vrutti</i> assessment, and <i>mun/body</i> for use, maintenance, and work	Depends on understanding of need and right use, <i>chitta</i> planning, <i>vrutti</i> consequence analysis, and <i>mun/body</i> for production

Field	M-08a - <i>svayatta</i>	M-08b - <i>samriddhi</i>
Development and orientation	Learning need assessment, capability, maintenance, sharing, and reserve is necessary or strongly supportive	Productive knowledge, apprenticeship, design, safety, and resource literacy are necessary; need and right use govern
Expression and consequence	Sufficiency requires fair access, useful goods, health, skill, shared responsibility, and freedom from hidden dependence	Production requires labour, tools, inputs, infrastructure, coordination, safe conditions, and regenerative practice
Evidence and evaluator	Persons sharing provision compare experience with actual access, workload, fragility, reserve, and ecological cost	Producers, users, workers, skilled peers, and affected persons assess quantity, quality, access, safety, waste, and regeneration
Correction	Revise need estimate, dependency, access, workload, use, maintenance, sharing, and reserve	Redesign product or process, repair harm, retrain, reallocate work and outputs, and restore resources
Continuity and transmission	Maintenance, diversified capability, reserve, and participatory need assessment sustain sufficiency	Maintenance, input continuity, reserve, competence succession, and ecological regeneration sustain prosperity
External classification and risk	CONST; N-EVD; U-H; I, EVID; N-EVD; U-H; I, SUST; N-CON; U-H; I; risk: wealth, income, stocks, status, or fragile dependency mistaken for self-reliant sufficiency	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST/TRANS; N-CON; U-H; I; risk: gross output, waste, forced labour, exclusion, or depletion counted as prosperity

M-09 - *Hita / svasthya*

Field	M-09a - <i>hita</i>	M-09b - <i>svasthya</i>
Normalized location	Locus: object, action, or arrangement relative to the body; operation: discrimination of usefulness within bodily limits; consequence and evidence: bodily capability; J/B/E/C/T (D/I)	Locus: body as functional state recognised by <i>jeevan</i> ; operation: availability of cognitive and work organs to <i>mun</i> and tendencies; consequence and evidence: sensing and work; J/B/E , then D/C/T in care (D/I)
Internal dependency	Depends on <i>mun</i> 's purpose, <i>vriddhi</i> assessment, and sensory or practical evidence from the body	Depends on the <i>jeevan-body</i> relation, <i>mun</i> 's direction, and <i>vriddhi</i> 's interpretation of bodily evidence

Field	M-09a - <i>hita</i>	M-09b - <i>svasthya</i>
Development and orientation	Knowledge of bodily function, limits, variation, and use develops discrimination; bodily purpose rather than profit governs	Health knowledge, bodily awareness, movement, rest, nourishment, and access to competent care are necessary or supportive
Expression and consequence	Usefulness becomes evident in safe use, maintained capability, and absence of excess or displaced injury	Functional health requires nourishment, safe environment, movement, treatment, communication, and usable work conditions
Evidence and evaluator	The person's report, bodily response, skilled observation, and task consequence jointly evaluate usefulness	The person is indispensable; caregivers and skilled practitioners contribute observation and intervention without replacing agency
Correction	Stop harmful use, revise dose or design, accommodate variation, and repair injury or overextension	Diagnose and treat impairment, change environment or workload, rehabilitate, and correct exclusion or neglect
Continuity and transmission	Maintained tools, safe practice, bodily literacy, and preventive review sustain usefulness	Prevention, care continuity, accessible knowledge, and succession of competent care sustain bodily capability
External classification and risk	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: desirability, performance, convenience, or profit mistaken for bodily usefulness	ENAB; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; N-CON; U-H; I; risk: appearance, productivity, diagnosis, or absence of complaint mistaken for health

M-10 - *Priya / pravrittiyan*

Field	M-10a - <i>priya</i>	M-10b - <i>pravrittiyan</i>
Normalized location	Locus: body-environment sensory conjunction recognised by <i>mun</i> ; operation: discrimination of contact conducive to bodily wellness; consequence and evidence: organ and body response; J/B/E , with D/C/T in care (D/I)	Locus: <i>jeevan</i> across hope, thought, desire, resolve, and authenticity; operation: purpose-directed readiness for projection; consequence and evidence: humane behaviour and accomplishment; J/B/D/C/E/T (D/I)
Internal dependency	Depends on sensory mediation, <i>mun</i> recognition, and <i>vritti</i> evaluation of bodily wellness beyond pleasantness	Depends on inward indication and conception, <i>vritti</i> purpose judgement, and <i>mun</i> selection for projection

Field	M-10a - <i>priya</i>	M-10b - <i>pravrittiyan</i>
Development and orientation	Bodily literacy, diverse safe sensory experience, and health knowledge support discrimination; wellness governs	Inquiry into purpose, examination of hope and desire, and real responsibility develop tendencies; humaneness governs
Expression and consequence	Conductive contact requires access to safe sound, touch, sight, taste, smell, rest, and environmental adjustment	Projection requires language, skill, body, tools, time, and cooperation according to the purpose pursued
Evidence and evaluator	Person, body response, caregivers, and relevant measurement evaluate short- and long-term wellness	Bearer, counterparts, coworkers, users, and affected natural fields evaluate purpose, conduct, and result
Correction	Remove harmful contact, correct habituation or addiction, accommodate impairment, and restore safe access	Re-examine purpose, correct impulse, bias, social conditioning, or means, and repair harmful projection
Continuity and transmission	Maintained environments, assistive means, and practical knowledge sustain sensory conduciveness	Reflective practice, meaningful roles, correction, and learner responsibility sustain humane tendencies
External classification and risk	CONST; N-EXP; U-H; I, PROT; N-COR; U-H; I, SUST; S-CON; U-H; I; risk: pleasure, familiarity, fashion, or stimulation mistaken for conduciveness	ENAB; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: impulse, habit, ambition, mood, or social conditioning mistaken for humane purpose-directed tendency

M-11 - *Ullas / haas*

Field	M-11a - <i>ullas</i>	M-11b - <i>haas</i>
Normalized location	Locus: <i>mun</i> expressed by the person; operation: transparent articulation and movement toward uplift; consequence and evidence: recipient access and developmental direction; J/B/D/C/T (D/I/O)	Locus: <i>mun</i> and body; operation: joyous movement under resolution toward a humane goal; consequence and evidence: shared conduct and direction; J/B/D/C/T (D/I/O)
Internal dependency	Depends on resolved and understood content, <i>chitta</i> articulation, and <i>vritti</i> truth-sensitive presentation	Depends on resolution, humane purpose, and outer-faculty consonance; bodily expression alone is insufficient

Field	M-11a - <i>ullas</i>	M-11b - <i>haas</i>
Development and orientation	Safe opportunity for transparent speech, useful contribution, and truthful feedback supports uplift	Participation in meaningful goals, bodily well-being, and freedom from demanded positivity support joyous direction
Expression and consequence	Articulation uses language, gesture, work, or performance and changes others' access and motivation	Joy appears in movement, smile, communication, or work without denying grief, conflict, or risk
Evidence and evaluator	Speaker, recipients, and consequence evaluate transparency, accessibility, and actual uplift	Bearer and counterparts evaluate resolution, humane direction, appropriateness, and absence of performance pressure
Correction	Correct exaggeration, concealment, stimulation, or uplift rhetoric that suppresses difficulty	Correct forced cheer, amusement without purpose, mood display, or joy that excludes another's condition
Continuity and transmission	Open communication, multiple voices, and meaningful participation sustain transparent uplift	Shared purposeful activity, rest, and freedom for emotional truth sustain joyous expression
External classification and risk	ENAB; S-EXP; U-H; I , EVID; N-EVD; U-H; I ; risk: positivity, performance, publicity, or excitement mistaken for uplifted transparency; naming overlap remains O	ENAB; S-EXP; U-H; I , EVID; N-EVD; U-H; I ; risk: laughter, entertainment, mood, or compulsory cheer mistaken for resolution-directed joy; lexical variant remains O

M-12 - *Sheel / sankoch*

Field	M-12a - <i>sheel</i>	M-12b - <i>sankoch</i>
Normalized location	Locus: person in conduct; operation: civil, authentic indication of awakening across contexts; consequence and evidence: others' experience of character; J/B/D/R/C/T (D/I)	Locus: person in communicative relation; operation: civil presentation of disagreement or non-acceptance; consequence and evidence: counterpart understanding and protected dissent; J/B/D/C/T (D/I)
Internal dependency	Depends on authenticity, understood awakening, <i>vritti</i> judgement, and <i>mun</i> 's selected manner	Depends on clear judgement, civil orientation, and <i>mun/body</i> for direct yet proportionate expression

Field	M-12a - <i>sheel</i>	M-12b - <i>sankoch</i>
Development and orientation	Exposure to varied roles, power, disagreement, and correction develops civil authenticity; awakening governs	Practice in naming disagreement, listening, boundaries, and non-retaliatory dialogue is necessary or supportive
Expression and consequence	Character appears through speech, relationship, work, use of authority, and response under strain	Dissent requires access, language, safety, timing, and a counterpart able or required to hear it
Evidence and evaluator	Counterparts, coworkers, dependants, and affected persons evaluate authenticity across power differences	Disagreeing person and recipient both evaluate clarity and civility; independent review enters where retaliation is possible
Correction	Correct etiquette masking domination, status-coded manners, selective civility, or image management	Protect the dissenter, clarify reasons, correct hostility or silence, and provide appeal where direct dialogue fails
Continuity and transmission	Repeated conduct, accountability, and exemplarity across changing roles sustain character	Norms and practices protecting civil dissent, plus learner participation, transmit non-acceptance without fear
External classification and risk	EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I, TRANS; S-CON; U-H; I ; risk: etiquette, modesty, reputation, or deferential manner mistaken for civil authenticity	CONST; N-OCC; U-H; I, PROT; N-EXP; U-H; I, CORR; N-COR; U-H; I ; risk: silence, timidity, concealment, procedural objection, or hostility mistaken for civil disagreement

M-13 - *Guru / pramanik*

Field	M-13a - <i>guru</i>	M-13b - <i>pramanik</i>
Normalized location	Locus: teacher-role in relation to an inquiring learner; operation: establishing conception as resolution of inquiry through education- <i>sanskar</i> ; consequence and evidence: learner understanding and capability; D/R/B/T/C (D/I)	Locus: evidence-bearing person; operation: living and carrying the holistic view, knowledge of <i>jeevan</i> , and humane conduct; consequence and evidence: relationship, experiment, work, and nature; J/B/D/R/C/E/T (D/I)
Internal dependency	Depends on teacher understanding, recognition of learner inquiry, pedagogical deliberation, and selected communication	Depends on realisation, understanding, all outer faculties, and repeated consonance across expression and consequence

Field	M-13a - <i>guru</i>	M-13b - <i>pramanik</i>
Development and orientation	Teacher understanding, listening, pedagogy, learner questions, and practical competence are necessary; learner resolution governs	Realisation, understanding, repeated practice, and exposure to consequences are necessary; fidelity governs
Expression and consequence	Teaching requires language, time, materials, demonstration, adaptation, and safeguarded authority	Evidence requires bodily capability, relationship and work opportunities, communicability, and access to affected fields
Evidence and evaluator	Learner, teacher, peers, and affected persons evaluate content, pedagogy, freedom, assimilation, and later application	Self, learners, close counterparts, coworkers, affected persons, and material results contribute convergent evidence
Correction	Permit questions about content and conduct, revise pedagogy, and provide outside protection where authority is misused	Admit contradiction, restore harm, reopen inquiry, change conduct, and permit independent scrutiny
Continuity and transmission	Trust without dependency, teacher accountability, material support, and succession by learner competence sustain teaching	Repeated evidence across roles and transmission of methods with living demonstration sustain credibility
External classification and risk	CONST; N-OCC; U-H; I , ENAB; N-EXP; U-H; I , PROT/CORR; N-COR; U-H; I , TRANS; N-CON; U-H; I ; risk: status, age, fluency, control, or learner obedience mistaken for teacherhood	EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I , TRANS; N-CON; U-H; I ; risk: reputation, selective conduct, lineage, or certification mistaken for evidential authenticity

M-14 - *Shishya / jigyasu*

Field	M-14a - <i>shishya</i>	M-14b - <i>jigyasu</i>
Normalized location	Locus: learner-role in an accepted teaching relationship; operation: readiness to receive and examine education- <i>sanskara</i> for awakening; consequence and evidence: learner assimilation; J/D/R/B/T (D/I)	Locus: learner or questioner; operation: active desire and expression seeking delusion-free education and knowledge of <i>jeevan</i> ; consequence and evidence: sustained inquiry; J/B/D/T (D/I)

Field	M-14a - <i>shishya</i>	M-14b - <i>jigyasu</i>
Internal dependency	Depends on <i>mun</i> receptivity, <i>vritti</i> questioning, <i>chitta</i> contemplation, and capacity to form definite understanding	Depends on recognised lack of understanding, desire directed by truth, and outer-faculty articulation of questions
Development and orientation	Safe access to a competent teacher, proposal, dialogue, practice, and freedom from submission are necessary or supportive	Access to knowledgeable interlocutors, permission to question, language, and evidence supports inquiry; freedom from delusion governs
Expression and consequence	Learnerhood requires attention, participation, application, and the ability to accept or reject with reasons	Inquiry becomes questions, investigation, experiment, and revision rather than endless curiosity
Evidence and evaluator	Learner understanding and later conduct are primary; teacher and peers can test articulation and application	Questioner, interlocutors, and evidence evaluate whether inquiry advances knowledge rather than displays doubt
Correction	Correct passive reception, dependency, credential seeking, or teacher worship; change teacher or method where needed	Clarify the question, test assumptions, seek evidence, and correct distraction, performative scepticism, or manipulation
Continuity and transmission	Sustained access, materials, practice, peer relation, and transition toward independent inquiry sustain learnerhood	Records of questions, investigative skill, and ability to formulate new inquiry transmit questioning competence
External classification and risk	CONST; N-OCC; U-H; I , ENAB; N-CON; U-H; I , PROT; N-COR; U-H; I ; risk: submission, enrolment, credential, or dependence mistaken for learnerhood	ENAB; S-EXP; U-H; I , EVID; N-EVD; U-H; I , TRANS; S-CON; U-H; I ; risk: curiosity, question volume, sceptical posture, or opposition mistaken for inquiry

M-15 - *Bhai-mitra / pragati*

Field	M-15a - <i>bhai-mitra</i>	M-15b - <i>pragati</i>
Normalized location	Locus: reciprocal sibling or sibling-like friendship; operation: brother-like acceptance; consequence and evidence: horizontal relationship and value-fulfilment; D/R/T (D/I)	Locus: persons in wider order; operation: participation evidencing resolution and prosperity with emphasis on resolution; consequence and evidence: human orderliness; J/B/D/R/C/E/T (D/I)
Internal dependency	Depends on relationship recognition, justice-sensitive evaluation, and <i>mun</i> 's value-bearing selection	Depends on resolution, understanding of order, productive participation, and coordination across faculties
Development and orientation	Shared experience, reciprocity, truthful boundaries, and freedom from in-group loyalty develop the relation	Real participation, public consequence, and opportunity to correct institutions develop progress; resolution governs prosperity
Expression and consequence	Relationship appears through trust, help, correction, and equal regard without ownership or imposed gender role	Progress requires responsible conduct, work, coordination, and attention to excluded persons and ecological cost
Evidence and evaluator	Both counterparts and persons affected by their alliance evaluate reciprocity and value-fulfilment	Participants, affected persons, material evidence, and later outcomes evaluate resolution-centred advancement
Correction	Correct factionalism, loyalty against justice, exclusion, entitlement, or biological-role coercion	Correct growth without resolution, expansion, output fixation, or local gain with wider harm
Continuity and transmission	Durable friendship, remembered repair, changing responsibility, and inclusion beyond the pair sustain the relation	Public records, participation, correction, and intergenerational competence sustain progress
External classification and risk	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, CORR; S-COR; U-H; I; risk: biology, alliance, loyalty, familiarity, or in-group protection mistaken for sibling-like friendship	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; N-CON; U-H; I; risk: growth, rank, output, expansion, or optimism mistaken for resolution-centred progress; pair interface remains O

M-16 - *Bahan / unnati*

Field	M-16a - <i>bahan</i>	M-16b - <i>unnati</i>
Normalized location	Locus: reciprocal sister or sister-like relationship; operation: sister-like acceptance; consequence and evidence: horizontal value-fulfilment; D/R/T (D/I)	Locus: persons in participation; operation: prosperity-centred advancement joined to resolution and awakening; consequence and evidence: material capability and continuity; J/B/D/R/C/E/T (D/I)
Internal dependency	Depends on relationship recognition, justice-sensitive evaluation, and <i>mun</i> 's value-bearing selection	Depends on understood prosperity, resolution, planning, consequence analysis, and embodied productive selection
Development and orientation	Reciprocity, truthful relationship, protected agency, and freedom from symbolic or gendered obligation support the relation	Need assessment, productive competence, public participation, and ecological knowledge develop advancement; prosperity remains joined to resolution
Expression and consequence	Relationship appears in value-fulfilment, care, correction, and equal participation without imposed honour or protection	Advancement requires useful production, access, maintenance, reserve, and participation without domination or depletion
Evidence and evaluator	Both counterparts and affected family or social participants evaluate reciprocity and actual values	Participants, users, workers, affected persons, and natural systems evaluate prosperity, resolution, and continuity
Correction	Correct biological entitlement, gendered duty, symbolic honour, exclusion, or silenced disagreement	Correct accumulation, upward mobility, output growth, unequal access, unsafe work, or ecological loss
Continuity and transmission	Durable reciprocal relation, remembered repair, and changing roles sustain sister-like acceptance	Maintenance, reserve, competence succession, ecological regeneration, and continuing awakening sustain advancement
External classification and risk	CONST; N-OCC; U-H; I, EVID; N-EVD; U-H; I, PROT; S-COR; U-H; I; risk: biology, gendered duty, honour, or paternal protection mistaken for sister-like relation	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; N-CON; U-H; I; risk: accumulation, mobility, growth, or display mistaken for prosperity-centred advancement; pair interface remains O

M-17 - *Sweekruti* / *swagat*

Field	M-17a - <i>sweekruti</i>	M-17b - <i>swagat</i>
Normalized location	Locus: <i>mun</i> expressed by the person; operation: faithful projection of signals received through realisation-based influence; consequence and evidence: recipients and conduct; J/B/D/C/E/T (D/I/O)	Locus: <i>mun</i> ; operation: preparation to evidence conception and realisation under law, justice, resolution, truth, and science aligned with wisdom; consequence: readiness for expression; J/B/D/C/E/T (D/I/O)
Internal dependency	Depends on inward realisation and conception, <i>vritti</i> fidelity, <i>chitta</i> articulation, and <i>mun</i> selection	Depends on accepted criteria from inward faculties, <i>chitta</i> planning, <i>vritti</i> assessment, and <i>mun</i> 's volitional readiness
Development and orientation	Practice in complete, non-selective expression, consequence review, and resistance to pressure is supportive	Study across named criteria, rehearsal, skill, material preparation, and anticipation of consequence support readiness
Expression and consequence	Projection requires language, skill, body, tools, and access to the field in which evidence is claimed	Preparation arranges attention, means, role, and safety but becomes evidence only when expression and consequence occur
Evidence and evaluator	Bearer, recipients, affected persons, and competent peers compare projected content with received indication and result	Bearer and later participants evaluate whether preparation was criterion-governed and adequate to actual expression
Correction	Restore omitted signals, correct distortion or selective projection, repair harm, and disclose uncertainty	Revise assumptions, means, skill, or timing; distinguish readiness from avoidance, hospitality, or acceptance of any content
Continuity and transmission	Repeated congruent projection, preserved source content, and open correction sustain acceptance-in-evidence	Checklists, practice, maintained means, shared criteria, and succession of competence sustain readiness
External classification and risk	ENAB; N-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: assent, confidence, selective expression, or institutional approval mistaken for faithful acceptance; member order remains O	ENAB; N-EXP; U-H; I , SUST; S-CON; U-H; I , EVID; N-EVD; U-H; I ; risk: welcome, politeness, planning, or preparedness without correct content mistaken for evidential readiness; distinction remains O

M-18 - *Ruchi* / *pehchan*

Field	M-18a - <i>ruchi</i>	M-18b - <i>pehchan</i>
Normalized location	Locus: embodied <i>mun</i> ; operation: recognition of results from conducive physicochemical contact with senses; consequence and evidence: bodily-material response; J/B/E , sometimes D/C/T (D/I)	Locus: embodied <i>mun</i> ; operation: identification of necessary elements and acceptance of the total result of material conjunction; consequence and evidence: whole contact-result; J/B/E/C/T (D/I)
Internal dependency	Depends on body and senses for contact, <i>mun</i> for recognition, and <i>vritti</i> for discriminating conduciveness from preference	Depends on sensory recognition, <i>chitta</i> representation of elements, and <i>vritti</i> analysis of total conjunction
Development and orientation	Diverse safe contact, bodily literacy, and attention to delayed effects develop recognition; conduciveness governs	Training in constituent analysis, context, dose, interaction, and whole consequence is necessary or supportive
Expression and consequence	Recognition guides selection and use, affecting health, safety, work, consumption, and environment	Identification guides preparation, design, diagnosis, and material combination with wider effects
Evidence and evaluator	Person, bodily response, skilled observer, and relevant measurement evaluate the contact result	Person, skilled peers, users, and affected material or ecological fields evaluate elements and total result
Correction	Correct craving, aversion, familiarity, sensory impairment, or partial observation; change contact or use	Add missing elements, remove harmful conjunctions, revise analysis, and retest whole consequence
Continuity and transmission	Repeated experience, accessible health knowledge, and maintained sensory or assistive capability sustain recognition	Records, recipes or protocols, measurement, apprenticeship, and consequence histories transmit identification
External classification and risk	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: liking, familiarity, attraction, or immediate sensation mistaken for recognised conduciveness	CONST; N-EVD; U-H; I , EVID; N-EVD; U-H; I , TRANS; S-CON; U-H; I ; risk: label, partial component list, or short-term result mistaken for whole identification; distinction remains partly O

M-19 - *Sukh* / *sfoorti*

Field	M-19a - <i>sukh</i>	M-19b - <i>sfoorti</i>
Normalized location	Locus: <i>mun</i> ; operation: resolution experienced as happiness; consequence: resolved selection; evidence: non-contradictory conduct; J , then B/D/C in evidence (D/I)	Locus: <i>mun</i> projected through the person; operation: tendency toward evidence of resolution; consequence and evidence: persons, work, and situations in the selected field; J/B/D/C/E/T (D/I)
Internal dependency	Depends on resolved deliberation and inward consonance; outer circumstances can support evidence but do not constitute happiness	Depends on <i>sukh</i> or resolution for orientation, <i>chitta/vritti</i> for form and judgement, and <i>mun/body</i> for projection
Development and orientation	Inquiry, meaningful choice, and freedom from sensation-only criteria support resolution; the definite answer governs	Opportunities for real responsibility, skill, and consequence-sensitive action develop evidential tendency
Expression and consequence	Happiness becomes visible in stable selection, relationship, and work without requiring pleasant circumstance	Tendency requires bodily capability, means, access, and participants according to the domain of evidence
Evidence and evaluator	Bearer evaluates resolution; counterparts and consequences test whether the claim survives action	Bearer, counterparts, users, and affected persons evaluate whether activity actually evidences resolution
Correction	Reopen unresolved questions, distinguish discomfort from contradiction, and correct sensory substitutes	Correct restless productivity, mood-driven action, misdirected effort, or evidence theatre; revise purpose and means
Continuity and transmission	Continuing understanding and self-correction sustain resolution; supportive relationships reduce distortion	Repeated responsible action, rest, maintained competence, and teachable reflection sustain evidential movement
External classification and risk	EVID; S-EVD; U-H; I, CORR; S-COR; U-H; I; risk: pleasure, comfort, favourable circumstance, calm, or reported satisfaction mistaken for happiness	ENAB; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; S-CON; U-H; I; risk: energy, stimulation, productivity, urgency, or enthusiasm mistaken for evidence-oriented tendency

M-20 - *Pati-patni* / *yatitva-satitva*

Field	M-20a - <i>pati-patni</i>	M-20b - <i>yatitva-satitva</i>
Normalized location	Locus: reciprocal spousal relationship and roles; operation: recognition and fulfilment of the relation; consequence and evidence: both spouses and shared life; D/R/B/T, often E/C (D/O)	Locus: persons in conduct; operation: researchful effort and truth-oriented steadfastness in understanding, work, and behaviour toward awakening; consequence and evidence: relationships and material fields; J/B/D/R/C/E/T (D/I)
Internal dependency	Depends on relationship recognition, justice, understood values, and <i>mun</i> 's reciprocal selection; local values and endpoint remain open	Depends on inquiry, resolve, truth-sensitive deliberation, planning, and embodied skill across work and behaviour
Development and orientation	Dialogue about expectations, consent, care, work, need, power, and correction is necessary; no role authority is derivable from the name	Study, experiment, skill, effort, and reflection on delusion and consequence develop the discipline; awakening governs
Expression and consequence	Relation requires reciprocal value-fulfilment, shared responsibility, bodily and material arrangements, and protected agency	Discipline appears in truthful work and behaviour, requiring time, means, cooperation, and willingness to revise
Evidence and evaluator	Both spouses are indispensable; dependants and affected persons enter where shared life affects them; silence is insufficient	Bearer, counterparts, coworkers, and material consequences evaluate researchfulness, truth, and continuity
Correction	Protect consent and voice, address domination or violence, renegotiate roles, restore values, or separate where protection requires	Correct endurance of domination, effort without understanding, role conformity, or harmful work; repair consequence
Continuity and transmission	Durable commitment, changing roles, material support, appeal, and intergenerational consequence sustain the relation if just	Continuing inquiry, skill, rest, mutual review, and transmission of method sustain awakened effort

Field	M-20a - <i>pati-patni</i>	M-20b - <i>yatitva-satitva</i>
External classification and risk	CONST; N-OCC; U-H; I , PROT/CORR; N-COR; U-H; I , SUST; C-CON; V-C; I ; risk: legal status, gender role, co-residence, endurance, or silence mistaken for spousal fulfilment; specific values remain O	ENAB; N-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: ascetic endurance, labour, conformity, or sacrifice mistaken for researchful awakened discipline; pair interface remains O

M-21 - *Mata / poshan*

Field	M-21a - <i>mata</i>	M-21b - <i>poshan</i>
Normalized location	Locus: mother-role in generative and care relation; operation: complementarity for bodily capability and awakening through nurturing, protection, production, education, and knowledge; consequence and evidence: child; D/R/B/E/T , often C (D/I/O)	Locus: conjunction of receiving and conducive units; operation: nurturing relation or condition; consequence and evidence: supported bodily or relational capability; B/D/R/E/T , sometimes C (D/I)
Internal dependency	Depends on relationship recognition, understanding of child development, deliberative care, and <i>mun/body</i> for performance	Depends on recognition of need and conduciveness, <i>vritti</i> evaluation, and <i>mun</i> selection in application
Development and orientation	Care, health, education, protection, productive, and relational competence are necessary or strongly supportive; child's capability and awakening govern	Knowledge of the receiving unit, material properties, timing, dose, and agency develops appropriate nurturing
Expression and consequence	Role requires time, bodily and material means, shared care, protection, provision, teaching, and respect for the child's agency	Nurturing requires access to conducive food, shelter, care, relationship, or material support and affects wider workload and ecology
Evidence and evaluator	Child experience and development are primary; caregiver, other parent, skilled peers, and later capability add evidence	Receiving person's response, bodily or relational outcome, caregivers, and affected systems evaluate conduciveness

Field	M-21a - <i>mata</i>	M-21b - <i>poshan</i>
Correction	Correct neglect, overprotection, control, exclusive maternal assignment, or harmful care; restore support and agency	Supply missing support, remove harmful conjunction, adjust dose or relation, treat injury, and repair displaced burden
Continuity and transmission	Shared responsibility, respite, material support, care succession, and growing child participation sustain the role	Reliable provision, maintenance, access without domination, and learned care sustain nurturing
External classification and risk	CONST; N-OCC; U-H; I , ENAB; N-EXP; U-H; I , PROT/SUST; N-CON; U-H; I ; risk: title, sacrifice, control, biological exclusivity, or provision alone mistaken for mother-role fulfilment; shared parental wording remains O	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , SUST; N-CON; U-H; I ; risk: supply, intention, proximity, consumption, or dependency mistaken for nurturing

M-22 - *Pita / sanrakshan*

Field	M-22a - <i>pita</i>	M-22b - <i>sanrakshan</i>
Normalized location	Locus: father-role in parental relation; operation: accepted nurturing and protection toward capability and awakening; consequence and evidence: child; D/R/B/E/T , often C (D/I/O)	Locus: responsible actor and protected field; operation: removing obstacles to unobstructed valid activity; consequence and evidence: safety, agency, and continuation; B/D/R/C/E/T (D/I)
Internal dependency	Depends on relationship recognition, understanding of child development, justice-sensitive judgement, and <i>mun/body</i> for care	Depends on recognition of the valid activity and relevant obstacle, deliberative proportionality, and selected protective action
Development and orientation	Care, safety, education, productive, and relational competence are necessary or supportive; child's capability and awakening govern	Risk knowledge, listening, prevention, rights, and non-dominating intervention develop protection; valid activity governs
Expression and consequence	Role requires presence, provision, teaching, bodily and material care, shared responsibility, and respect for agency	Protection may require design, boundary, removal, shelter, response, or public coordination and affects both protected and constrained parties

Field	M-22a - <i>pita</i>	M-22b - <i>sanrakshan</i>
Evidence and evaluator	Child experience and development are primary; other caregivers, skilled peers, and later independence add evidence	Protected person, affected persons, skilled assessors, and observed continuation evaluate whether obstacles were relevantly removed
Correction	Correct authority, patriarchal status, neglect, overprotection, exclusive paternal assignment, or provision without relation	Correct insulation from truth or consequence, excessive control, ignored voice, or protection that transfers harm; restore agency
Continuity and transmission	Shared care, material support, succession, accountability, and changing responsibility sustain the parental function	Maintained safeguards, response capacity, independent review, and learned self-protection sustain unobstructedness
External classification and risk	CONST; N-OCC; U-H; I, ENAB; N-EXP; U-H; I, PROT/SUST; N-CON; U-H; I; risk: title, authority, income, control, or biological exclusivity mistaken for father-role fulfilment; shared wording remains O	PROT; N-COR; U-H; I, ENAB; N-EXP; U-H; I, SUST; S-CON; U-H; I; risk: control, censorship, paternalism, insulation from difficulty, or security theatre mistaken for protection

M-23 - *Mridu-kathor / vahan-samvahan*

Field	M-23a - <i>mridu-kathor</i>	M-23b - <i>vahan-samvahan</i>
Normalized location	Locus: material object as tactile-mechanical quality and embodied person as discriminator; operation: recognition of softness and hardness under load; consequence and evidence: bodily-material contact; B/E/C/T (D/I)	Locus: material object or body as bearing response; operation: recognition and use of carrying, shared-bearing, contraction, or load transmission; consequence and evidence: load, structure, and users; B/E/C/T (D/I/O)
Internal dependency	Depends on touch/body mediation, <i>mun</i> recognition, and <i>vritti</i> comparison of actual response	Depends on sensory or measured evidence, <i>chitta</i> representation, <i>vritti</i> mechanical analysis, and <i>mun/body</i> for competent use
Development and orientation	Varied safe contact, load experience, measurement, material knowledge, and attention to bodily limits develop discrimination	Training in load, deformation, failure, safety factor, and material context is necessary or supportive

Field	M-23a - <i>mridu-kathor</i>	M-23b - <i>vahan-samvahan</i>
Expression and consequence	Discrimination guides handling, tool choice, comfort, safety, and design and can affect workers and users	Bearing performance requires actual materials, joints, load paths, tools, and safe operation; failure has distributed consequences
Evidence and evaluator	User report, observed deformation, measurement, and skilled peers evaluate softness or hardness in context	Operators, engineers or skilled workers, users, and affected persons evaluate carrying, deformation, and failure behaviour
Correction	Change material, pressure, contact, protective equipment, or classification when response diverges	Reduce or redistribute load, redesign support, replace material, repair damage, and revise the compound term mapping
Continuity and transmission	Reference materials, maintained tools, safety practice, and embodied skill sustain discrimination	Inspection, maintenance, records, standards, apprenticeship, and failure learning sustain bearing capability
External classification and risk	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: label, comfort, appearance, or one pressure point mistaken for mechanical quality	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; N-CON; U-H; I; risk: presumed strength, surface form, nominal capacity, or successful one-time load mistaken for safe bearing; subterm mapping remains O

M-24 - *Sheet-ushna / poshan*

Field	M-24a - <i>sheet-ushna</i>	M-24b - <i>poshan</i>
Normalized location	Locus: material contact as thermal quality and embodied person as discriminator; operation: recognition of cold and hot for bodily health; consequence and evidence: body and task; B/E/D/R/C/T (D/I)	Locus: bodily-material relation or result; operation: selection and recognition of conducive conjunction; consequence and evidence: continuing bodily capability and wider resource use; J/B/E/D/R/C/T (D/I/O)
Internal dependency	Depends on sensory-body mediation, <i>mun</i> recognition, and <i>vrutti</i> evaluation of health, duration, and purpose	Depends on recognition of bodily need, <i>vrutti</i> assessment, and <i>mun</i> selection; the AVD/MVD slot relation remains partly open

Field	M-24a - <i>sheet-ushna</i>	M-24b - <i>poshan</i>
Development and orientation	Functional sensation, attention to bodily signs, climate knowledge, and experience with materials are necessary or supportive	Knowledge of health, bodily variation, food, shelter, clothing, tools, and local climate is necessary or supportive
Expression and consequence	Safe discrimination requires communication and means to alter exposure; imposed conditions can create injury and unequal burden	Nurturing requires access to food, water, rest, shelter, clothing, care, and suitable tools according to circumstance
Evidence and evaluator	Person report is indispensable; bodily observation, measurement, and skilled care correct impairment or hidden risk	Person, caregiver, health competence, and affected public or ecological evidence jointly assess conduciveness
Correction	Change exposure, clothing, hydration, workload, shelter, or care; seek skilled assistance where needed	Supply missing conducive units, remove harmful conjunctions, treat injury, redesign environment, and prevent recurrence
Continuity and transmission	Maintained shelter, safe work, emergency response, and continuing ability to report need sustain thermal capability	Reliable provision, maintenance, access independent of domination, and regenerative material or energy use sustain nourishment
External classification and risk	CONST; N-EXP; U-H; I , PROT; N-COR; U-H; I , SUST; S-CON; U-H; I ; risk: comfort, habituation, preference, or a single measurement mistaken for safe thermal discrimination	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , SUST; N-CON; U-H; I ; risk: temporary comfort, over-control, consumption, or resource-intensive supply mistaken for nourishment; slot status remains O

The six taste positions M-25 through M-30 share a source pattern but retain separate records. In each, the left member is a sensory-material quality known through tongue-body contact. The right member repeats *poshan* as a conducive rather than depleting conjunction. Pass Two therefore repeats the lifecycle where the source repeats the slot and keeps the ontological question open; it does not manufacture six different definitions of *poshan*.

M-25 - *Khatta / poshan*

Field	M-25a - <i>khatta</i>	M-25b - <i>poshan</i>
Normalized location	Locus: physicochemical object as sour quality and embodied person as discriminator; operation: recognition of sour contact for bodily health; consequence and evidence: tongue, body, and later response; B/E/D/R/C/T (D/I)	Locus: conducive unit-relation or repeated criterion; operation: assessment of the sour conjunction as nourishing or depleting; consequence and evidence: receiving body and material cycle; J/B/E/D/R/C/T (D/I/O)
Internal dependency	Depends on tongue-body mediation, <i>mun</i> recognition, and <i>vritti</i> evaluation beyond liking	Depends on taste recognition, bodily need, and <i>vritti</i> assessment of dose, context, and consequence
Development and orientation	Safe varied exposure, bodily literacy, food knowledge, and attention to delayed effect are supportive; health governs	Knowledge of composition, preparation, amount, bodily variation, and ecological or labour consequence supports assessment
Expression and consequence	Selection and use require access, preparation skill, communication of reaction, and safe alternatives	Nourishment requires conducive material access and may affect caregivers, producers, waste streams, and future health
Evidence and evaluator	Person report, bodily response, skilled care, and relevant measurement evaluate sour contact	Person, caregiver or health competence, and material evidence evaluate whether the conjunction supports capability
Correction	Stop or adjust contact, distinguish aversion from injury, accommodate impairment, and revise preparation	Change amount or combination, remove harmful material, treat injury, restore access, and repair process effects
Continuity and transmission	Food literacy, records of reaction, safe provision, and maintained sensory capability sustain discrimination	Reliable provision, maintained knowledge, safe preparation, and regenerative production sustain nourishment
External classification and risk	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: liking, aversion, cultural preference, or sourness alone mistaken for health relevance	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , SUST; S-CON; U-H; I ; risk: supply, taste, quantity, or intention mistaken for nourishment; repeated-slot ontology remains O

M-26 - Meetha / poshan

Field	M-26a - meetha	M-26b - poshan
Normalized location	Locus: physicochemical object as sweet quality and embodied person as discriminator; operation: recognition of sweet contact for bodily health; consequence and evidence: tongue, body, and later response; B/E/D/R/C/T (D/I)	Locus: conducive unit-relation or repeated criterion; operation: assessment of the sweet conjunction as nourishing or depleting; consequence and evidence: receiving body and material cycle; J/B/E/D/R/C/T (D/I/O)
Internal dependency	Depends on tongue-body mediation, <i>mun</i> recognition, and <i>vritti</i> evaluation beyond pleasure or craving	Depends on taste recognition, bodily need, and <i>vritti</i> assessment of dose, context, and consequence
Development and orientation	Safe varied exposure, bodily literacy, food knowledge, and recognition of reward or habituation are supportive; health governs	Knowledge of composition, preparation, amount, bodily variation, and wider consequence supports assessment
Expression and consequence	Selection and use require access, preparation skill, communication of reaction, and alternatives to compulsive reward	Nourishment requires conducive access while accounting for chronic effect, production, waste, and dependency
Evidence and evaluator	Person report, bodily response over time, skilled care, and relevant measurement evaluate sweet contact	Person, caregiver or health competence, and material evidence evaluate whether the conjunction supports capability
Correction	Adjust contact, correct craving or reward substitution, accommodate impairment, and revise preparation	Change amount or combination, remove harmful material, treat consequence, restore healthy access, and repair process effects
Continuity and transmission	Food literacy, records of reaction, safe provision, and maintained sensory capability sustain discrimination	Reliable provision, maintained knowledge, safe preparation, and regenerative production sustain nourishment
External classification and risk	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: pleasure, craving, reward, or sweetness alone mistaken for conduciveness	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , SUST; S-CON; U-H; I ; risk: sweetness, calories, abundance, or immediate satisfaction mistaken for nourishment; repeated-slot ontology remains O

M-27 - *Chirchira-charpara / poshan*

Field	M-27a - <i>chirchira-charpara</i>	M-27b - <i>poshan</i>
Normalized location	Locus: physicochemical object as pungent quality and embodied person as discriminator; operation: recognition of pungent contact for bodily health; consequence and evidence: tongue, body, and later response; B/E/D/R/C/T (D/I/O)	Locus: conducive unit-relation or repeated criterion; operation: assessment of the pungent conjunction as nourishing or depleting; consequence and evidence: receiving body and material cycle; J/B/E/D/R/C/T (D/I/O)
Internal dependency	Depends on tongue-body mediation, <i>mun</i> recognition, and <i>vrutti</i> evaluation beyond intensity or preference	Depends on taste recognition, bodily need, and <i>vrutti</i> assessment of dose, context, and consequence
Development and orientation	Safe varied exposure, bodily literacy, food knowledge, and attention to irritation or delayed effect are supportive; health governs	Knowledge of composition, preparation, amount, bodily variation, and wider consequence supports assessment
Expression and consequence	Selection and use require access, preparation skill, communication of reaction, and safe alternatives	Nourishment requires conducive access while accounting for irritation, interaction, production, and waste
Evidence and evaluator	Person report, bodily response, skilled care, and relevant measurement evaluate pungent contact	Person, caregiver or health competence, and material evidence evaluate whether the conjunction supports capability
Correction	Stop or adjust contact, distinguish stimulation from injury, accommodate impairment, and revise preparation	Change amount or combination, remove harmful material, treat injury, restore access, and repair process effects
Continuity and transmission	Food literacy, reaction records, safe provision, and maintained sensory capability sustain discrimination	Reliable provision, maintained knowledge, safe preparation, and regenerative production sustain nourishment
External classification and risk	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: intensity, stimulation, aversion, or the lexical label itself mistaken for health relevance; name variant remains O	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; S-CON; U-H; I; risk: stimulation, tolerance, quantity, or immediate response mistaken for nourishment; repeated-slot ontology remains O

M-28 - *Kadua / poshan*

Field	M-28a - <i>kadua</i>	M-28b - <i>poshan</i>
Normalized location	Locus: physicochemical object as bitter quality and embodied person as discriminator; operation: recognition of bitter contact for bodily health; consequence and evidence: tongue, body, and later response; B/E/D/R/C/T (D/I)	Locus: conducive unit-relation or repeated criterion; operation: assessment of the bitter conjunction as nourishing or depleting; consequence and evidence: receiving body and material cycle; J/B/E/D/R/C/T (D/I/O)
Internal dependency	Depends on tongue-body mediation, <i>mun</i> recognition, and <i>vritti</i> evaluation beyond aversion	Depends on taste recognition, bodily need, and <i>vritti</i> assessment of dose, context, and consequence
Development and orientation	Safe varied exposure, bodily literacy, food knowledge, and attention to toxicity or benefit are supportive; health governs	Knowledge of composition, preparation, amount, bodily variation, and wider consequence supports assessment
Expression and consequence	Selection and use require access, preparation skill, communication of reaction, and safe alternatives	Nourishment requires conducive access while accounting for toxicity, interaction, production, and waste
Evidence and evaluator	Person report, bodily response, skilled care, and relevant measurement evaluate bitter contact	Person, caregiver or health competence, and material evidence evaluate whether the conjunction supports capability
Correction	Stop or adjust contact, distinguish aversion from warning or benefit, accommodate impairment, and revise preparation	Change amount or combination, remove harmful material, treat injury, restore access, and repair process effects
Continuity and transmission	Food literacy, reaction records, safe provision, and maintained sensory capability sustain discrimination	Reliable provision, maintained knowledge, safe preparation, and regenerative production sustain nourishment
External classification and risk	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: aversion, medicinal reputation, or bitterness alone mistaken for depletion or benefit	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , SUST; S-CON; U-H; I ; risk: avoidance, intention, medicinal label, or quantity mistaken for nourishment; repeated-slot ontology remains O

M-29 - *Kasaila / poshan*

Field	M-29a - <i>kasaila</i>	M-29b - <i>poshan</i>
Normalized location	Locus: physicochemical object as astringent quality and embodied person as discriminator; operation: recognition of astringent contact for bodily health; consequence and evidence: tongue, body, and later response; B/E/D/R/C/T (D/I)	Locus: conducive unit-relation or repeated criterion; operation: assessment of the astringent conjunction as nourishing or depleting; consequence and evidence: receiving body and material cycle; J/B/E/D/R/C/T (D/I/O)
Internal dependency	Depends on tongue-body mediation, <i>mun</i> recognition, and <i>vritti</i> evaluation beyond preference or intensity	Depends on taste recognition, bodily need, and <i>vritti</i> assessment of dose, context, and consequence
Development and orientation	Safe varied exposure, bodily literacy, food knowledge, and attention to dryness or delayed effect are supportive; health governs	Knowledge of composition, preparation, amount, bodily variation, and wider consequence supports assessment
Expression and consequence	Selection and use require access, preparation skill, communication of reaction, and safe alternatives	Nourishment requires conducive access while accounting for interaction, hydration, production, and waste
Evidence and evaluator	Person report, bodily response, skilled care, and relevant measurement evaluate astringent contact	Person, caregiver or health competence, and material evidence evaluate whether the conjunction supports capability
Correction	Stop or adjust contact, distinguish preference from injury, accommodate impairment, and revise preparation	Change amount or combination, remove harmful material, treat consequence, restore access, and repair process effects
Continuity and transmission	Food literacy, reaction records, safe provision, and maintained sensory capability sustain discrimination	Reliable provision, maintained knowledge, safe preparation, and regenerative production sustain nourishment
External classification and risk	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, CORR; N-COR; U-H; I; risk: unfamiliarity, intensity, or astringency alone mistaken for health effect	CONST; N-EXP; U-H; I, EVID; N-EVD; U-H; I, SUST; S-CON; U-H; I; risk: sensory acceptance, intention, or traditional use mistaken for nourishment; repeated-slot ontology remains O

M-30 - Khara / poshan

Field	M-30a - khara	M-30b - poshan
Normalized location	Locus: physicochemical object as salty quality and embodied person as discriminator; operation: recognition of salty contact for bodily health; consequence and evidence: tongue, body, and later response; B/E/D/R/C/T (D/I)	Locus: conducive unit-relation or repeated criterion; operation: assessment of the salty conjunction as nourishing or depleting; consequence and evidence: receiving body and material cycle; J/B/E/D/R/C/T (D/I/O)
Internal dependency	Depends on tongue-body mediation, <i>mun</i> recognition, and <i>vritti</i> evaluation beyond craving or habit	Depends on taste recognition, bodily need, and <i>vritti</i> assessment of dose, context, and consequence
Development and orientation	Safe varied exposure, bodily literacy, food knowledge, and attention to hydration or chronic effect are supportive; health governs	Knowledge of composition, preparation, amount, bodily variation, and wider consequence supports assessment
Expression and consequence	Selection and use require access, preparation skill, communication of reaction, and safe alternatives	Nourishment requires conducive access while accounting for hydration, chronic effect, production, and waste
Evidence and evaluator	Person report, bodily response over time, skilled care, and relevant measurement evaluate salty contact	Person, caregiver or health competence, and material evidence evaluate whether the conjunction supports capability
Correction	Adjust contact, correct craving or habituation, accommodate impairment, and revise preparation	Change amount or combination, remove harmful material, treat consequence, restore access, and repair process effects
Continuity and transmission	Food literacy, reaction records, safe provision, and maintained sensory capability sustain discrimination	Reliable provision, maintained knowledge, safe preparation, and regenerative production sustain nourishment
External classification and risk	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , CORR; N-COR; U-H; I ; risk: craving, habit, culinary norm, or saltiness alone mistaken for health relevance	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , SUST; S-CON; U-H; I ; risk: quantity, preservation, familiarity, or immediate satisfaction mistaken for nourishment; repeated-slot ontology remains O

M-31 - *Sugandh-durgandh* / *shvasan-nihshvasan*

Field	M-31a - <i>sugandh-durgandh</i>	M-31b - <i>shvasan-nihshvasan</i>
Normalized location	Locus: emitting material as olfactory quality and embodied person as discriminator; operation: recognition of pleasant and unpleasant smell; consequence and evidence: body, air, and source; B/E/D/C/T (D/I/O)	Locus: body as respiratory process or correlate; operation: inhalation and exhalation mediating olfactory contact; consequence and evidence: breathing, air, and bodily function; B/E/D/C/T (D/I/O)
Internal dependency	Depends on olfactory-body mediation, <i>mun</i> recognition, and <i>vritti</i> discrimination; source gives no universal health or moral value to pleasantness	Depends on body physiology, <i>mun</i> attention, and <i>vritti</i> interpretation; the process is not a separate private mental activity
Development and orientation	Safe exposure, source identification, bodily literacy, and knowledge of adaptation or impairment support discrimination	Respiratory awareness, health knowledge, air-quality understanding, and ability to report difficulty support capability
Expression and consequence	Smell guides approach, avoidance, diagnosis, food or material use, and environmental response with possible social bias	Breathing depends on air, health, activity, and environment; impairment affects sensing, work, and survival
Evidence and evaluator	Person report is primary; source measurement, other observers, and health evidence correct adaptation or impairment	Person report, bodily observation, clinical competence, and air measurement evaluate respiratory function
Correction	Remove hazard, identify source, ventilate, accommodate anosmia, and correct aesthetic or social prejudice	Restore air access, treat impairment, change workload or environment, and respond to acute obstruction
Continuity and transmission	Clean air, monitoring, source control, and shared olfactory-safety knowledge sustain discrimination	Air quality, preventive care, emergency response, and practical breathing or safety knowledge sustain function
External classification and risk	CONST; N-EXP; U-H; I , EVID; N-EVD; U-H; I , PROT; N-COR; U-H; I ; risk: pleasantness, aversion, adaptation, perfume, or social association mistaken for safety or value	CONST; N-EXP; U-H; I , PROT; N-COR; U-H; I , SUST; N-CON; U-H; I ; risk: visible breathing, one measurement, or moralised breath practice mistaken for adequate respiratory function; lexical variants remain O

M-32 - *Suroop-kuroop* / *swagat-aswagat*

Field	M-32a - <i>suroop-kuroop</i>	M-32b - <i>swagat-aswagat</i>
Normalized location	Locus: visible form as material quality or evaluation and embodied person as perceiver; operation: recognition of beautiful or ugly form; consequence and evidence: seen object and later treatment; B/E/D/C/T (D/O)	Locus: <i>mun</i> in response to perceived form; operation: affinity or otherness, rendered as welcome or non-welcome in AVD; consequence and evidence: treatment of the visible entity; J/B/D/C/E/T (D/O)
Internal dependency	Depends on visual-body mediation, <i>chitta</i> form representation, and <i>vritti</i> judgement; no local universal beauty endpoint is supplied	Depends on perceived form, <i>vritti</i> evaluation, and <i>mun</i> selection; the criterion governing affinity and otherness is not stated
Development and orientation	Accurate perception, awareness of image manipulation, exposure to variation, and separation of form from human worth are necessary or supportive	Relationship, justice, truth, and consequence must constrain response, but importing a specific positive endpoint would exceed the source
Expression and consequence	Beauty judgement affects attention, design, approach, exclusion, status, and resource allocation	Affinity or otherness becomes welcome, avoidance, inclusion, exclusion, or treatment with direct effects on persons and objects
Evidence and evaluator	Observer and object evidence test visible form; affected persons evaluate prejudicial consequences of the judgement	Perceiver and affected entity or person evaluate response and consequence; independent review is needed where bias or power operates
Correction	Correct manipulated image, sensory error, cultural absolutism, halo effect, and appearance-based prejudice	Interrupt exclusion or attraction that violates justice, expose bias, restore equal regard, and preserve the unresolved source criterion
Continuity and transmission	Visual literacy, diverse representation, and correction of inherited standards sustain accurate perception	Norms protecting equal participation, bias review, and intergenerational critique sustain responsible response without fixing one aesthetic

Field	M-32a - <i>suroop-kuroop</i>	M-32b - <i>swagat-aswagat</i>
External classification and risk	EVID; N-EVD; U-H; I , PROT/CORR; N-COR; U-H; I ; risk: fashion, familiarity, symmetry, manipulated image, or social status mistaken for a universal beauty criterion; endpoint remains O	CONST; N-EXP; U-H; I , PROT/CORR; N-COR; U-H; I , EVID; N-EVD; U-H; I ; risk: attraction, aversion, exclusion, hospitality convention, or cultural appearance standard mistaken for correct response; governing criterion remains O

6. Findings across the 122-member lifecycle matrix

6.1 Internal constitution and external dependence occupy different logical levels

The records consistently distinguish constitutional orientation from embodied availability. Realisation, enlightenment, contemplation, deliberation, and selection form internal dependencies at **U-J**. No family, teacher, procedure, material resource, or institution is coded as necessary for their constitutional presence. External conditions become structurally relevant when an inward member must be developed through receptivity, expressed through the body, evidenced before another standpoint, corrected after contradiction, or maintained across persons and time.

This distinction prevents two opposite errors. The first is environmental creationism: treating education, relationship, or organisation as if it supplied an activity absent from *jeevan*. The second is inward isolationism: treating a private claim of realisation or understanding as complete evidence even where the member's definition concerns authenticity, relationship, work, care, production, communication, or continuity.

6.2 Entry form changes the lifecycle question

The normalized matrix contains five recurrent entry-form families without reducing every record to one of them.

- Inward operations and orientations require right criterion, outer-faculty coordination, and protection of inquiry; their external evidence can be necessary even when outward conditions are not necessary for occurrence.
- Roles and relationships require a recognisable counterpart and reciprocal or asymmetric responsibilities; their occurrence is partly relational, so **CONST; N-OCC; U-H** is justified where the definition itself names the relation.
- Material and sensory properties require body-object contact, discrimination, and consequence evaluation; the property is not converted into a second private mental act.
- Bodily processes and states require capability, observation, care, restoration, and accommodation; first-person report remains indispensable but not exhaustive.

- Criteria and results require the operations that produce or recognise them, evidence distinguishing them from imitation, affected-party access, and a continuity test.

The residual entries remain visible rather than being forced into these families. *Satya*, *dharma*, *jati*, *kaal*, repeated *poshan*, and the closing visible-form response retain their disputed activity grammar.

6.3 Evidence is standpoint-dependent and normally convergent

No single evaluator covers all evidence fields. The bearer has privileged access to resolution, intention, felt contradiction, sensory contact, pain, and bodily experience. A relational counterpart has access to expectation, value-fulfilment, consent, satisfaction, domination, and repair. Skilled peers can assess competence, causal explanation, measurement, treatment, design, or technical consequence. Users, workers, dependants, and affected publics can disclose burdens hidden from the immediate bearer. Material, ecological, and future evidence can contradict present satisfaction or output.

Pass Two therefore treats convergence as stronger than substitution. A public body cannot declare another person's inward resolution, while first-person conviction cannot settle a claim about justice, safe work, health, useful production, or ecological regeneration. Apparent disagreement first triggers a standpoint audit: which evidence is directly available to each evaluator, what is being claimed, and whether the conflict concerns criterion, observation, means, role, or consequence.

6.4 Correction must match the failure mechanism

The matrix discloses several irreducible correction paths:

- renewed inquiry for error in meaning, truth claim, or inward criterion;
- dialogue and changed fulfilment for relational contradiction;
- protection, appeal, boundary, or separation where power defeats direct reciprocity;
- retraining or changed means where understanding is sound but competence is insufficient;
- repair, restitution, or restoration where conduct has already caused harm;
- redesign where roles, incentives, tools, or procedures repeatedly produce the distortion;
- treatment, rehabilitation, or accommodation for bodily impairment; and
- ecological restoration and long-horizon monitoring where material costs are delayed or displaced.

An arrangement that offers only inward reflection, only punishment, or only technical redesign cannot correct every class of failure. Pass Four may later ask which correction paths require durable organisation; Pass Two establishes only that the paths must remain available where the corresponding failure is possible.

6.5 Continuity recurs through several media

Continuity is not one generic act of transmission. Understanding continues through proposal, dialogue, learner verification, and the capacity to teach without status substitution. Relationship continues through remembered expectations, value-fulfilment, repair, changing responsibilities, and protected voice. Care continues through competence, respite, material support, succession, and the growing agency of the cared-for person. Work and production continue through maintained tools, safe practice, records, reserve, apprenticeship, and regenerative inputs. Public evidence continues through preserved disagreement, independent review, and access to consequences. No one medium can substitute for all the others.

6.6 Universal invariants do not yet determine institutional bundles

The recurring **U-H** requirements include embodied capability, truthful communication, reciprocal recognition, affected-party voice, protection from domination, visible consequence, correction, care through dependency, productive competence, material access, maintenance, reserve, and ecological continuity. These are candidate invariants because they recur from member anatomy and lifecycle, not because an institutional label was supplied.

The means of satisfying them remain **V-C** where the member does not select a concrete form. A teacher-learner relation does not by itself determine a school system. Need assessment and productive capability do not determine one property or exchange regime. Protection does not determine one court or police form. Intergenerational continuity does not determine one household composition. Pass Two therefore supplies constraints and comparison features, not a pre-clustered family or five-function conclusion.

7. Residual and sensitivity register

The following fields remain open and must be carried into Pass Three without imputation:

1. the two source formulations of *medha* and their exact relation to *kala*;
2. the narrow distinction between *shraddha* and *pujyata*;
3. the criterion that makes an exemplar worthy in *gaurav*;
4. whether *satya* and *dharma* name operations, objects, governing criteria, or mixed slots;
5. the pair rationale and activity grammar of *jati/kaal*;
6. the lexical and role variants around *sathi/swami*, *ullas/haas/hras*, and *sugandh-durgandh/shvasan-nihshvasan*;
7. the mixed parent-child syntax and the non-exclusive allocation of nurturing, protection, education, and provision;
8. the specific values and endpoint of the spousal slot and its relation to *yatitva-satitva*;
9. the one-to-one mapping of softness, hardness, bearing, shared-bearing, and contraction;

10. whether the seven *poshan* assignments represent independent members, a repeated criterion, or tabular shorthand;
11. a correctness criterion for beauty judgement and affinity or otherness after visible form; and
12. several pair interfaces whose two definitions are individually clear but whose pairing is not explained.

Sensitivity analysis must test at least three treatments of these records: include them with open features, exclude the unresolved feature while retaining the member, and hold the member as a residual outside clustering. A sphere that exists only under one imputed interpretation is not stable.

8. Completion statement and frozen handoff to Pass Three

Pass Two is complete at the declared analytical grain. The register contains sixty-one pair sections and 122 independently coded member columns. Every member now has a normalized location, an internal dependency statement, development and orientation conditions, expression and consequence conditions, evaluator standpoints, a correction path, continuity and transmission conditions, an external-classification summary, a false-positive test, and explicit open fields where warranted.

Completion does not mean that every inference is established beyond revision. It means that the same questions have been asked of every source slot and that uncertainty is encoded rather than hidden. The lifecycle claims remain structural inferences to be challenged by counterexample, primary-text review, and later practical evidence.

Pass Three must export one feature vector per member in the following frozen order:

Position	Feature
1	Entry-form family and residual flag
2	Ontological locus
3	Operation field
4	Consequence field
5	Evidence field and evaluator standpoints
6	Constitutive counterpart and participation topology
7	Internal dependencies
8	Endpoint and governing criterion provenance
9	Development and orientation requirements

Position	Feature
10	Expression requirements
11	Evidence requirements
12	Correction and protection paths
13	Sustaining and transmission requirements
14	External relation types and strength-scope codes
15	Universality levels
16	False-positive class and unresolved fields

Before clustering, replace member names, faculties, pair numbers, source-embedded role terms, and all family or institutional vocabulary with anonymous IDs. Do not use the pilot sphere atlas as starting centroids. Permit overlap and residual membership, compare coarse, middle, and fine granularities, and test stability under the alternate treatments in §7. Names and source structure may be restored only after the blind cluster result is recorded.

This handoff is completed in the [Pass-Three Activity-Sphere Derivation](#). The blind analysis selects three coarse domains, eight middle clusters, and fourteen fine clusters. Four middle clusters remain stable under both residual treatments, two operate as boundary-sensitive bridges, and two remain residual groupings. The subsequent [Pass-Four durable-function analysis](#) tests every member for durable responsibility and compares five alternative bundles. It derives five continuity channels covering all 122 members and finds the five-function basis sufficient and practically minimal at the selected grain without claiming five organisations or numerical uniqueness.
